California Department of Food and Agriculture

Agricultural Commissioners' Crop Reports

# Colusa County

1990-1999

California County Agricultural Commissioners' Reports from the California Department of Food and Agriculture. This collection consists of annual crop and livestock data from each of the 58 California Counties. The collection covers 1915-1981; digitization of the rest of the collection is forthcoming.

This digitization project was funded by the Giannini Foundation of Agricultural Economics, <http://giannini.ucop.edu/>.

The work was completed by the staff of the Giannini Foundation Library, University of California, Berkeley, <http://are.berkeley.edu/library/>. **Please contact the Library to consult the originals.**

# Agricultural Crop Report County of Colusa CO., CA.

1990

HARRY A. KRUG

AGRICULTURAL COMMISSIONER

COLUSA COUNTY DEPARTMENT OF AGRICULTURE

TO: Mr. Henry J. Voss, Director  
California Department of Food and Agriculture  
and The Honorable Board of Supervisors, Colusa County

1990

In accordance with the provisions of Section 2279, of the California Food and Agricultural Code, I am pleased to submit the 1990 Colusa County Agricultural Crop Report. The 1990 production value of \$207,430,000 is nearly a \$20,000,000 decrease from 1989 record high of \$227,258,200. The decrease is a direct reflection of the impact that the on-going drought condition is having on the agricultural industry.

Rice acreage decreased from the 1989 figure of 113,840 acres to 90,440 in 1990. The associated decrease in value was a total of \$23,085,000. Tomatoes and seed crops continued to increase value, which offset some of the overall decrease in value. Processing tomatoes increased in acreage to 22,400 from 17,800 in 1989, which accounted for an increase in value of over \$8,500,000, for a total of \$37,713,000. Seed crop production increased slightly from \$22,359,000 to \$25,519,000.

I must stress that these figures show gross values only, and do not reflect a net return to the producer.

I wish to thank everyone who contributed to this report. I also express appreciation to my staff, and especially to Jon Richter, Agricultural Biologist and Standards Officer III, who compiled this report.

Respectfully submitted,

  
Harry A. Krug  
Agricultural Commissioner

HARRY A. KRUG

1991 JAN 1 10 15 AM '91 AGRICULTURAL COMMISSIONER

COLUSA COUNTY DEPARTMENT OF AGRICULTURE

TO: Mr. Henry J. Voss, Director  
California Department of Food and Agriculture  
and The Honorable Board of Supervisors, Colusa County

1991

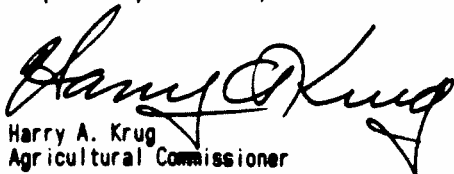

In accordance with the provisions of Section 2279, of the California Food and Agricultural Code, I am pleased to submit the 1991 Colusa County Agricultural Crop Report. The 1991 production value of \$217,674,000 is over a \$10,000,000 increase from 1990 and the second highest county record.

Rice continues to be the county's largest crop with a total value, including rice seed, of \$71,957,000. Rice acreage decreased from the 1990 figure by 5,440 acres for a 1991 total of 85,000 acres. Processing tomatoes continue to increase in value over prior years. Processing tomatoes increased in acreage to 25,725 from 22,400 in 1990, which accounted for an increase in value of over \$6,750,000, for a total of \$44,453,000.

I must stress that these figures show gross values only, and do not reflect a net return to the producer.

I wish to thank everyone who contributed to this report. I also express appreciation to my staff, and especially to Jon Richter, Agricultural Biologist and Standards Officer III, who compiled this report.

Respectfully submitted,

  
Harry A. Krug  
Agricultural Commissioner

*Agricultural Commissioner*

*Annual*  
**Agricultural Crop Report**  
**County of Colusa**

1 9 9 2

Harry A. Krug

Agricultural Commissioner

COLUSA COUNTY DEPARTMENT OF AGRICULTURE

1992

TO: Mr. Henry J. Voss, Director  
California Department of Food and Agriculture  
and The Honorable Board of Supervisors, Colusa County

In accordance with the provisions of Section 2279, of the California Food and Agricultural Code, I am pleased to submit the 1992 Colusa County Agricultural Crop Report. The 1992 production value of \$238,222,000 is a new record high for Colusa County. The previous record of \$227,258,000 was set in 1989.

Rice continues to be the county's largest crop with a total value, and it lead the way with increased acreage, production and price over 1991. Processing tomatoes did an about face with a dramatic decrease in acreage to 18,600 acres in 1992 from 25,725 in 1991. This was a result of over supply in the market place.

I must stress that these figures show gross values only, and do not reflect a net return to the producer.

I wish to thank everyone who contributed to this report. I also express appreciation to my staff, and especially to Jon Richter, Agricultural Biologist and Standards Officer III, who compiled this report.

Respectfully submitted,

  
Harry A. Krug  
Agricultural Commissioner

COLUSA COUNTY DEPARTMENT OF AGRICULTURE

# **Agricultural Crop Report** **County of Colusa Co.,**

**1993**

**Harry A. Krug**  
**Agricultural Commissioner**

*Annual Report, crop statistics*

**COLUSA COUNTY DEPARTMENT OF AGRICULTURE**

TO: Mr. Henry J. Voss, Director  
California Department of Food and Agriculture  
and The Honorable Board of Supervisors, Colusa County

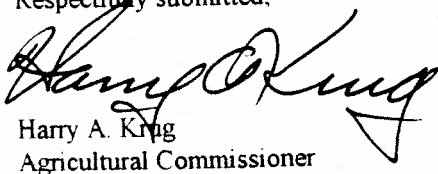

In accordance with the provisions of Section 2279, of the California Food and Agricultural Code, I am pleased to submit the 1993 Colusa County Agricultural Crop Report. The 1993 production value of \$273,475,000 is a new record high for Colusa County. The previous record of \$238,222,000 was set in 1992.

Rice continues to be the county's largest crop with a total value of \$98,737,000, and it lead the way with increased acreage, production and price over 1992. Almonds surpassed processing tomatoes as the second highest crop, with a value of \$35,612,000, and processing tomatoes decreasing to \$31,434,000.

I must stress that these figures show gross values only, and do not reflect a net return to the producer.

I wish to thank everyone who contributed to this report. I also express appreciation to my staff, and especially to Jon Richter, Agricultural Biologist and Standards Officer III, who compiled this report.

Respectfully submitted,

  
Harry A. Krug  
Agricultural Commissioner

# Agricultural Crop Report County of Colusa

1994

Harry A. Krug  
Agricultural Commissioner

*Annual report*

**COLUSA COUNTY DEPARTMENT OF AGRICULTURE**

TO: Mr. Henry J. Voss, Secretary  
California Department of Food and Agriculture  
and The Honorable Board of Supervisors, Colusa County

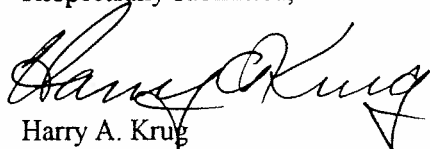

In accordance with the provisions of Section 2279, of the California Food and Agricultural Code, I am pleased to submit the 1994 Colusa County Agricultural Crop Report. With the devastating start of the 1995 crop year, it is with mixed feelings that I present the 1994 report. The 1994 production value of \$284,931,000 is a new record high for Colusa County for the second year in a row. The 1993 value was \$273,475,000 which results in a 4.2% increase for 1994.

Rice continues to be the county's largest crop with a total value of \$112,961,000, which is the first time the value has exceeded the hundred million dollar value. Tomatoes for processing had a 36.1% increase over 1993 with a value of \$42,778,000 for 1994. Almonds had a 33% decrease in value from \$35,613,000 in 1993 to \$23,856,000 in 1994 because of a major reduction in the per unit value for the crop.

I must stress that these figures show gross values only, and do not reflect a net return to the producer.

I wish to thank everyone who contributed to this report. I also express appreciation to my staff, and especially to Jon Richter, Agricultural Biologist and Standards Officer III, who compiled this report.

Respectfully submitted,

  
Harry A. Krug  
Agricultural Commissioner

TO: Ms. Ann M. Veneman, Secretary  
California Department of Food and Agriculture  
and The Honorable Board of Supervisors, Colusa County

In accordance with the provisions of Section 2279, of the California Food and Agricultural Code, I am pleased to submit the 1995 Colusa County Agricultural Crop Report. I have dedicated this report in memory of Kay K. Nordyke, Supervisor, District 3. Supervisor Nordyke was a dedicated government servant and a very strong supporter of Colusa County Agriculture. Her insight and knowledge is greatly missed.

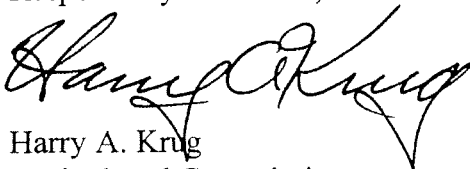

The 1995 crop year started with devastating predicaments towards the agricultural industry in the county. Wide spread flooding and late planting contributed to serious problems for many growers. Even with the terrible start in 1995, total county production value set another all time high of \$304,900,000. This is nearly a \$20,000,000 increase over the previous record of 1994.

The county's largest crop, rice, took a reduction in value from a 1994 all time high value of \$112,961,000 to a 1995 value of \$95,645,000. This was a result of a reduction in planted acreage and production. Tomatoes for processing continued its growth in the county by increasing in production acreage from 24,100 in 1994 to 31,600 in 1995. This resulted in an increase in value to \$59,448,000 for 1995, compared to a 1994 value of \$42,778,000. Almonds realized a 98% increase in total production value for 1995 over 1994. The 1995 value was \$47,320,000 and the 1994 value was \$23,856,000. This was a direct result of a significant increase in the value per unit offered for the product and it should also be noted that the 1993 almond value was \$35,613,000. Significant changes also occurred in both Livestock and Livestock Products categories due to new and changed listings.

I must stress that these figures show gross values only, and do not reflect a net return to the producer.

I wish to thank everyone who contributed to this report. I also express appreciation to all of my staff, especially Debbie Light and Bonnie Carrion who worked on the charts and layout, and Jon Richter who compiled this report.

Respectfully submitted,

Harry A. Krug  
Agricultural Commissioner

## County of Colusa

1996

Harry A. Krug  
Agricultural Commissioner

COLUSA COUNTY  
DEPARTMENT OF AGRICULTURE - AIR POLLUTION CONTROL DISTRICT  
HARRY A. KRUG  
AGRICULTURAL COMMISSIONER & SEALER OF WEIGHTS & MEASURES - (916) 458-0580  
DIRECTOR OF AIR QUALITY STANDARDS - (916) 458-0590  
100 SUNRISE BLVD., SUITE F, COLUSA, CALIFORNIA 95932

TO: Ms. Ann M. Veneman, Secretary  
California Department of Food and Agriculture  
and The Honorable Board of Supervisors, Colusa County

In accordance with the provisions of Section 2279, of the California Food and Agricultural Code, I am pleased to submit the 1996 Colusa County Agricultural Crop Report.

The 1996 crop year total county production value set another all time high of \$306,908,000. This was only slightly higher than the previous high in 1995 of \$304,900,000.

The county's largest crop, rice, took another reduction in value from a 1994 all time high value of \$112,961,000, a 1995 value of \$95,645,000 to a 1996 value of \$92,374,000. In 1996 there was an increase in rice acreage, however, both production per acre and value per unit decreased. Rice has experienced over an 18% drop in overall value in the last two years. Tomatoes for processing took a slight downturn in overall value to \$57,892,000. This was caused by a decrease in acreage from a 1995 total of 31,600 to a 1996 total of 29,780. Almonds had a total production value for 1996 nearly identical to 1995. The 1996 value was \$47,124,000 and the 1995 value was \$47,320,000. This was a result of an increase in acreage and production, but a decrease in the value per unit offered for the product. Wheat made a significant gain from 1995 with an increase of acreage, production and price in 1996 for a total value of \$14,048,000. This was a 38.5% increase over the 1995 value of \$10,143,000.

I must stress that these figures show gross values only, and do not reflect a net return to the producer.

I wish to thank everyone who contributed to this report. I also express appreciation to all of my staff, especially Debbie Light and Bonnie McCullough who worked on the charts and layout, and Jon Richter who compiled this report.

Respectfully submitted,

  
Harry A. Krug  
Agricultural Commissioner

GIANNINI FOUNDATION OF  
AGRICULTURAL ECONOMICS

Annual report, crop statistics

Riverboats are part of California's colorful history. The demand for transportation along the Sacramento River and the San Joaquin River, as well as other smaller rivers in California, began in the 1850's with the discovery of gold. In the mid 1800's to early 1900's riverboats and barges were used to transport cargo, mail, and passengers along these rivers. The use of riverboats began to decline with the introduction of the railroad and by the 1870's many of the steamboats were converted to ferryboats, destroyed, or left to rot.

The *Red Bluff*, shown here being loaded with grain in Colusa along with the barge, Illinois, was built in 1894. Later, the *Red Bluff* was used in movies. The *Red Bluff* was destroyed by a fire in Broderick, across from Sacramento.

Cover: The *Valletta* at the Barley Harvest Festival in Grimes in 1905. The *Valletta* along with many other idle steamers and barges, including the *Colusa*, were destroyed in Broderick by fire in 1932.

AGRICULTURAL COMMISSIONER & SEALER OF WEIGHTS & MEASURES - (916) 458-0580  
DIRECTOR OF AIR QUALITY STANDARDS - (916) 458-0590  
100 SUNRISE BLVD., SUITE F, COLUSA, CALIFORNIA 95932

TO: Ms. Ann M. Veneman, Secretary  
California Department of Food and Agriculture  
and The Honorable Board of Supervisors, Colusa County

In accordance with the provisions of Section 2279, of the California Food and Agricultural Code, I am pleased to submit the 1997 Colusa County Agricultural Crop Report. This year's Crop Report is dedicated to Robert L. Capehart, Agricultural Biologist and Standards Officer III, retired, for his thirty three years of county service. His knowledge and friendship at the office has been missed, but we wish him well in his retirement.

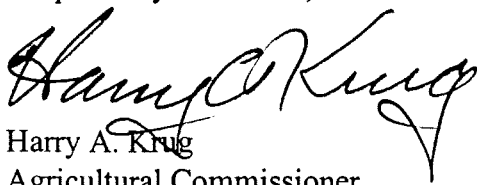

The 1997 crop year total county production value set another all time high of \$322,922,000. This was 5% higher than the previous high in 1996 of \$306,908,000.

The county's largest crop, rice, made a come back in value with an increase to \$112,941,000 from a 1996 value of \$92,374,000. This was just short of the 1994 all time high value of \$112,961,000. The increase was attributed to an exceptional growing season. Tomatoes for processing continued to decrease in value to \$45,523,000, compared to 1996 value of \$57,892,000. This was caused by a continued decrease in planted acreage. Almonds decreased in value to \$40,320,000 compared to the 1996 value of \$47,124,000. This was a result of a continued increase in acreage and production, but a major decrease in the value per unit offered for the product. Most field crops, except wheat, and seed crops increased in overall value to which made up for the reduction in values for the orchard crops and tomatoes.

I must stress that these figures show gross values only, and do not reflect a net return to the producer.

I wish to thank everyone who contributed to this report. I also express appreciation to all of my staff, especially Debbie Light and Bonnie McCullough who worked on the charts and layout, and Jon Richter who compiled this report.

Respectfully submitted,

Harry A. Krug  
Agricultural Commissioner

COLUSA COUNTY  
DEPARTMENT OF AGRICULTURE - AIR POLLUTION CONTROL DISTRICT  
**HARRY A. KRUG**

AGRICULTURAL COMMISSIONER & SEALER OF WEIGHTS & MEASURES - (530) 458-0580  
DIRECTOR OF AIR QUALITY STANDARDS - (530) 458-0590  
100 SUNRISE BLVD., SUITE F, COLUSA, CALIFORNIA 95932

TO: Mr. William J. Lyons, Jr., Secretary  
California Department of Food and Agriculture  
and The Honorable Board of Supervisors, Colusa County

In accordance with the provisions of Section 2279, of the California Food and Agricultural Code, I am pleased to submit the 1998 Colusa County Agricultural Crop Report. This year's Crop Report is dedicated to Susan MacPherson, Agricultural Aide, retired, for her many years of service to this department. Her knowledge, artistry and friendship at the office has been missed, but we wish her well in retirement.

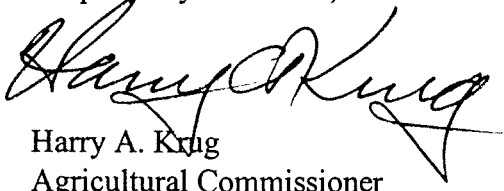

The 1998 crop year total county production value was \$293,633,000. This value is a 10.3% reduction from the 1997 value of \$322,922,000. Weather conditions played the major role in this large reduction in crop value. Late spring storms and widespread flooding delayed planting and caused a shorter than normal growing season.

The county's largest crop, rice, held total value of \$112,567,000 compared to 1997 of \$112,941,000. This was attributed to an increase in price, although both acreage and production decreased. Tomatoes for processing significantly decreased in value to \$38,806,000 compared to 1997 value of \$45,523,000. This was caused by a continued decrease in planted acreage and a greater reduction in production. Almonds decreased in value to \$38,728,000 compared to the 1997 value of \$40,320,000. This was a result of a decrease in production, although there was an increase in acreage and value.

I must stress that these figures show gross values only, and do not reflect a net return to the producer.

I wish to thank everyone who contributed to this report. I also express appreciation to all of my staff, especially Debbie Light who worked on the charts and layout, and Jon Richter who compiled this report.

Respectfully submitted,

Harry A. Krug  
Agricultural Commissioner

# AGRICULTURAL CROP REPORT <sup>=Annual</sup>

County of Colusa

California

1999

Harry A. Krug  
Agricultural Commissioner

COLUSA COUNTY  
DEPARTMENT OF AGRICULTURE  
**HARRY A. KRUG**  
AGRICULTURAL COMMISSIONER  
100 SUNRISE BLVD., SUITE F, COLUSA, CALIFORNIA 95932

TO: Mr. William J. Lyons, Jr., Secretary  
California Department of Food and Agriculture  
and The Honorable Board of Supervisors, Colusa County

In accordance with the provisions of Section 2279, of the California Food and Agricultural Code, I am pleased to submit the 1999 Colusa County Crop Report.

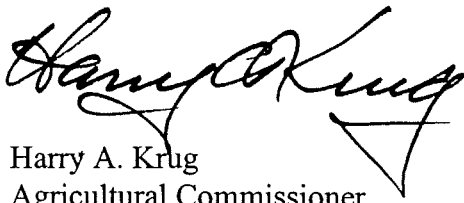

The 1999 crop year total county production value was \$351,278,000. This value was an all time high for the county, exceeding the previous high of 1997 with a value of \$322,922,000. 1999 was a rebound year from the 1998 value of \$293,633,000.

The county's largest crop, rice, made a comeback in value with an increase to \$154,836,000 from a 1998 value of \$112,567,000. The increase was a result of increased acreage, production and a Market Loss Assistance payment. The second highest value crop, processing tomatoes, made a 70 percent increase over the 1998 value of \$38,806,000 with a 1999 value of \$65,875,000. This was a result of an increase in acreage from 22,760 to 30,500, increase in production from 31.0 tons per acre to 35.7 tons per acre, and an increase in payment of \$55.00 per ton to \$60.50 per ton. Almonds, the county's third leading crop, had a significant decline in value. The 1999 value of \$20,612,000 was a 47 percent decrease from the 1998 value of \$38,728,000. This was a result of a slight decrease in production and a large decrease in the payment received which was \$1,700 per ton down from \$3,100 the prior year.

I must stress that these figures show gross values only, and do not reflect a net return to the producer.

I wish to thank everyone who contributed to this report. I also express appreciation to all of my staff, especially Debbie Light who worked on the charts and layout, and Jon Richter who compiled this report.

Respectfully submitted,

  
Harry A. Krug  
Agricultural Commissioner
