California Department of Food and Agriculture

Agricultural Commissioners' Crop Reports

Colusa County 2000-2004

California County Agricultural Commissioners' Reports from the California Department of Food and Agriculture. This collection consists of annual crop and livestock data from each of the 58 California Counties. The collection covers 1915-1981; digitization of the rest of the collection is forthcoming.

This digitization project was funded by the Giannini Foundation of Agricultural Economics, http://giannini.ucop.edu/.

The work was completed by the staff of the Giannini Foundation Library, University of California, Berkeley, http://are.berkeley.edu/library/. Please contact the Library to consult the originals.

Harry A. Krug

Agricultural Commissioner

Daryl Brown Assistant Agricultural Commissioner Retired May 31, 2000

Daryl served Colusa County from April 1, 1967 to May 31, 2000, and was a great asset to the Agricultural Commissioner's office and for the

Agricultural Industry in Colusa County. He continues to serve on a part-time basis helping out wherever he is needed. Congratulations Daryl.

DIRECTOR OF AIR QUALITY STANDARDS - (530) 458-0590
100 SUNRISE BLVD., SUITE F, COLUSA, CALIFORNIA 95932

TO: Mr. William J. Lyons, Jr., Secretary
California Department of Food and Agriculture
and The Honorable Board of Supervisors, Colusa County

In accordance with the provisions of Section 2279, of the California Food and Agricultural Code, I am pleased to submit the 2000 Colusa County Crop Report. This year's crop report is dedicated to Daryl Brown, Assistant Agricultural Commissioner, who retired in 2000 after 33 years of service to agriculture and Colusa County.

The 2000 crop year total county production value was \$345,906,000. This value was a decrease from last year's all time high for the county at the value of \$351,278,000.

The county's largest crop, rice, increased in value from 1999 with a total 2000 value of \$159,876,000 over the 1999 value of \$154,836,000. This was due to an increase in acreage of 147,270 from 140,920 and increase in average production of 4.0 tons to the acre from 3.75 tons in 1999. Price per ton decreased from \$293.00 per ton in 1999 to \$271.40 in 2000. Processing tomatoes, the county's second largest crop, showed a sharp decrease from 1999 totals. The 2000 value of \$41,842,000 was a 36.5 percent decrease from the 1999 crop value of \$65,875,000. This was a result of decreased acreage of 20,900 from 30,500 and decrease price of \$52.00 per ton from \$60.50 per ton in 1999. The third largest crop, almonds, increased in acreage, production and price per unit for a 2000 year value of \$28,166,000 from a value of \$20,612,000 in 1999. Onion seed production made a dramatic increase from tenth in value in 1999 to fourth in county value in 2000 with a total value of \$11,561,000. Cucumber seed production, which was fourth in value in 1999, reversed the order and dropped in value from fourth to tenth in the county.

I must stress that these figures show gross values only, and do not reflect a net return to the producer.

I wish to thank everyone who contributed to this report. I also express appreciation to all of my staff, especially Jon Richter who compiled this report.

Respectfully submitted,

Harry A. Krug

Agricultural Commissioner

AGRICULTURAL CROP REPORT

County of Colusa county, Calif. 2001

Harry A. Krug

Agricultural Commissioner

LIBRARY

APR | 5 2007

GIANNINI FOUNDATION OF AGRICULTURAL ECONOMICS

Annual report, crop statistics

On the cover is the new 2001 Colusa County weight truck. This 40,000 pound vehicle is used to check the 60 plus vehicle scales in Colusa County. The truck doubles the capacity of the old truck which was purchased in 1964. Weights and measures is an important function of the Colusa County Department of Agriculture because all agricultural commodities in Colusa County go over a scale at least once and usually several times. Accurate scales provide a fair transaction. The weight truck was purchased through a joint effort and is shared among Glenn, Butte and Colusa Counties.

The 2001 Colusa County Crop Report is dedicated to Robert E. Herkert in memory of his untimely passing on December 19, 2000 at the age of 42. I first met Bob in 1988 when he was the Colusa County Farm Bureau Manager and I became the Colusa County Agricultural Commissioner. We were friends from the beginning because we spoke the same language about promoting agriculture. He and I were not always understood by the ones we were trying to help in the early days, but we persevered knowing that it was for the best. This was evident by the career path that Bob followed with the California Rice Industry Association as Manager of Environmental Affairs. I miss his hard work, smiling face and fun ribing he would always give me. He was a great loss to Colusa County and the agricultural industry of California.

COLUSA COUNTY

DEPARTMENT OF AGRICULTURE - AIR POLLUTION CONTROL DISTRICT HARRY A. KRUG

AGRICULTURAL COMMISSIONER & SEALER OF WEIGHTS & MEASURES - (530) 458-0580 DIRECTOR OF AIR QUALITY STANDARDS - (530) 458-0590 100 SUNRISE BLVD., SUITE F, COLUSA, CALIFORNIA 95932

TO: Mr. William J. Lyons, Jr., Secretary
California Department of Food and Agriculture
and The Honorable Board of Supervisors, Colusa County

In accordance with the provisions of Section 2279, of the California Food and Agricultural Code, I am pleased to submit the 2001 Colusa County Crop Report. This year's crop report is dedicated to Robert E. Herkert, who passed away suddenly in December of 2000. He had many years of service to agriculture in Colusa County and the rice industry.

The 2001 crop year total county production value was \$277,826,000. The value is indicative of the continued decrease from the prior two years. Last year's value was \$345,906,000 and 1999 was the all time high for the county at the value of \$351,278,000.

The county's largest crop, rice, decreased in value from 2000 with a total 2001 value of \$115,330,000 well below the 2000 value of \$159,876,000. This was due to a decrease in acreage from 147,270 to 111,250. Production had a slight increase from 4 tons per acre to 4.15 tons. Price per ton decreased slightly from \$271.40 per ton in 2000 to \$249.80 in 2001. Processing tomatoes, the county's second largest crop, showed a slight decrease from 2000 totals. The 2001 value of \$36,776,000 compared to the 2000 value of \$41,842,000. This was a result of slight decreased acreage of 20,250 from 20,900 and decrease price of \$49.35 per ton from \$52.00 per ton in 2000. The third largest crop, almonds, stayed constant with production and price per unit for a 2001 year value of \$28,035,000 from a value of \$28,166,000 in 2000. Cotton became the number four crop, moving up from the number six position in 2000. This was due to an increase in acreage and the reduction in last year's number four and five categories which are cattle and calves, and onion seed.

I must stress that these figures show gross values only, and do not reflect a net return to the producer.

I wish to thank everyone who contributed to this report. I also express appreciation to all of my staff, especially Jon Richter who compiled this report and Lee Ann Price who did the layout work.

Respectfully submitted,

Harry A. Krug

Agricultural Commissioner

Colusa County Commodities and Their Destinations

Colusa County exports these vegetable and flower seeds overseas:

Cucumber

Dill

Gourd

Lettuce

Melon

Kale

Asparagus
Basil
Bean
Broccoli
Calendula
Cantaloupe
Carrot
Cauliflower
Coriander

Carrot Mustard
Cauliflower Onion
Coriander Parsley
Corn Peas

Pepper
Pumpkin
Radish
Squash
Sunflower
Tomato
Turnip

Watermelon

Peas

Food crops that are exported overseas include:

Almonds Plums Rice

Beans Prunes

Importing countries that purchase commodities produced in Colusa County:

COLUSA COUNTY, CALF. DEPARTMENT OF AGRICULTURE

2002

CROP REPORT

Harry A. Krug Agricultural Commissioner

COLUSA COUNTY DEPARTMENT OF AGRICULTURE

HARRY A. KRUG

AGRICULTURAL COMMISSIONER/SEALER OF WEIGHTS AND MEASURES 100 SUNRISE BLVD.. SUITE F COLUSA, CA 95932 530-458-0580

TO: Mr. William J. Lyons, Jr., Secretary

California Department of Food and Agriculture

and The Honorable Board of Supervisors, Colusa County

In accordance with the provisions of Section 2279, of the California Food and Agricultural Code, I am pleased to submit the 2002 Colusa County Crop Report.

The 2002 crop year total county production value was \$290,264,000. The value is an increase from last year's value of \$277,826,000, but is still less than the 2000 value of \$345,906,000 and the 1999 value of \$351,278,000.

The county's largest crop, rice, increased in value from 2001 with a total 2002 value of \$136,832,000, but still below the 2000 value of \$159,876,000. This was due to an increase in acreage from 111,250 to 134,300. Processing tomatoes, the county's second largest crop, showed a slight increase from 2001 totals. The 2002 value of \$39,481,000 compared to the 2001 value of \$36,776,000. This was a result of a slight increase in per acre production. The third largest crop, almonds, stayed fairly constant with an overall production value of \$27,196,000 compared to the 2001 value of \$28,035,000. Cotton dropped to the number five crop with rice seed moving up to fourth in the county. Seed crop production dropped from a total 2001 dollar value of \$27,070,500 to a 2002 value of \$21,719,000, due to a large decrease in onion seed production.

I must stress that these figures show gross values only, and do not reflect a net return to the producer.

I wish to thank everyone who contributed to this report. I also express appreciation to all of my staff, especially Jon Richter who compiled this report and Lee Ann Price who did the layout work. This year's crop report is lacking the usual color pictures and graphs to reduce the expense of reproduction during these tight budget times.

Respectfully submitted.

Agricultural Commissioner

HARRY A. KRUG

AGRICULTURAL COMMISSIONER/SEALER OF WEIGHTS AND MEASURES
100 SUNRISE BLVD., SUITE F
COLUSA, CA 95932
530-458-0580

TO: Mr. A. G. Kawamura, Secretary
California Department of Food and Agriculture
and The Honorable Board of Supervisors, Colusa County

In accordance with the provisions of Section 2279, of the California Food and Agricultural Code, I am pleased to submit the 2003 Colusa County Crop Report.

The 2003 crop year total county production value was \$361,573,000, a new record high. The value is an increase from last year's value of \$290,264,000, and is \$10,295,000 more than the 1999 record high value of \$351,278,000.

The county's largest crop, rice, increased in value from 2002 with a total 2003 value of \$160,971,000. This was due to an increase in production value from \$248.50 per ton to \$320.00 per ton in 2003 even though there was a decrease in acreage from 134,000 to 127,350. Almonds moved to number two in county ranking with a huge increase in overall 2003 value of \$73,206,000 from a 2002 value of \$27,196,000. This was a result of an increase in acreage, production and unit value. Processing tomatoes dropped to number three with a reduced 2003 value of \$32,318,000 compared to the 2002 value of \$39,481,000. This was a result of a decrease in acreage, production and unit value. Cattle and Calves moved up from sixth to fourth with a value of \$11,628,000 in 2003 compared to \$7,685,000 in 2002. Seed crop production increased from a total 2002 dollar value of \$21,719,000 to a 2003 value of \$32,161,000 due to a large acreage increase in cucumber, onion, squash and watermelon seed production.

I must stress that these figures show gross values only, and do not reflect a net return to the producer.

I wish to thank everyone who contributed to this report. I also express appreciation to all of my staff, especially Jon Richter who compiled this report. I would also like to specially thank Debra Light, who retired in 2003, for her 12 years of service and dedicated work to the county and this department. Again, this year's crop report is lacking the usual color pictures and graphs to reduce the expense of reproduction during these tight budget times.

Respectfully submitted,

Harry A. Krud

Agricultural Commissioner

COLUSA COUNTY, Calif. Agricultural commissioner

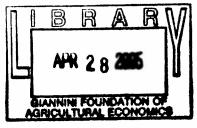

DEPARTMENT OF AGRICULTURE

2004

Annual ROP REPOR

HARRY A. KRUG **Agricultural Commissioner**

COLUSA COUNTY DEPARTMENT OF AGRICULTURE HARRY A. KRUG

AGRICULTURAL COMMISSIONER/SEALER OF WEIGHTS AND MEASURES
100 SUNRISE BLVD., SUITE F
COLUSA, CA 95932
530-458-0580

TO: Mr. A. G. Kawamura, Secretary
California Department of Food and Agriculture
and The Honorable Board of Supervisors, Colusa County

In accordance with the provisions of Section 2279, of the California Food and Agricultural Code, I am pleased to submit the 2004 Colusa County Crop Report.

The 2004 crop year total county production value was \$351,604,000, which was a \$9,969,000 reduction from the all time record high of \$361,573,000 in 2003. This was a 2.8 percent reduction in gross value.

The county's largest crop, rice, decreased in value from 2003 with a total 2004 value of \$122,956,000. This was due to a decrease in production value from \$320.00 per ton to \$195.00 per ton in 2004 even though there was an increase in acreage from 127,350 to 150,130. Almonds remained number two in county ranking with a continued increase in overall 2004 value of \$77,555,000 from a 2003 value of \$73,206,000. This was a result of an increase in acreage and unit value even though production was lower. Processing tomatoes remained number three with an increased 2004 value of \$44,251,000 compared to the 2003 value of \$32,318,000. This was a result of an increase in acreage, production and unit value. Cattle and Calves remained fourth with a value of \$12,870,000 in 2004 compared to \$11,628,000 in 2003. Seed crop production continued the increase from a total 2003 dollar value of \$32,161,000 to a 2004 value of \$41,571,000 due to continued acreage increases in cucumber, onion, squash and watermelon seed production.

I must stress that these figures show gross values only, and do not reflect a net return to the producer.

I wish to thank everyone who contributed to this report. I also express appreciation to all of my staff, especially Lee Ann Price and Jon Richter who set up and compiled this report.

Respectfully submitted,

Harry A. Krug
