## **EUROPEAN REVIEW OF AGRICULTURAL ECONOMICS**

**Editor:** Alison Burrell, Wageningen Agricultural University, The Netherlands

**Book Review Editors:** Stephan von Cramon-Taubadel, Institute for Agricultural Economy, Kiel, Germany

The **European Review of Agricultural Economics** serves as a forum for discussion and dissemination of theoretical and applied agricultural economic research in Europe and for stimulating ideas relating to the economic problems of agriculture in Europe and other parts of the world.

The Review strives throughout for a balanced coverage of all issues within the broad subject matter of agricultural economics. Among the topics included are, for example, production economics and farm management, agricultural policy, regional planning and rural development, factor markets, supply and demand analysis, marketing of agricultural and food products, international trade and development, and methodology. Original articles are published as well as full or abstracted articles, shorter features, including book reviews, comments on previously published articles, and information about activities in the field of European agricultural economics, such as meetings and conferences. This ensures coverage of the most recent information available.

The **European Review of Agricultural Economics** is published as one volume of four issues per year (approx. 560 pages).
