California Department of Food and Agriculture

Agricultural Commissioners' Crop Reports

Glenn County

2005-2009

California County Agricultural Commissioners' Reports from the California Department of Food and Agriculture. This collection consists of annual crop and livestock data from each of the 58 California Counties. The collection covers 1915-1981; digitization of the rest of the collection is forthcoming.

This digitization project was funded by the Giannini Foundation of Agricultural Economics,
<http://giannini.ucop.edu/>.

The work was completed by the staff of the Giannini Foundation Library, University of California, Berkeley, <http://are.berkeley.edu/library/>. **Please contact the Library to consult the originals.**

GLENN COUNTY

2005

Annual Crop & Livestock Report

William R. Duckworth

John F. B. Tolley

The 2005 crop report is dedicated to both William (Bill) Duckworth and John Tolley.

Bill started in Glenn County in February of 1969 as an Agricultural Inspector I. He quickly moved up and was the Deputy Commissioner in 1974. In December of 2003 he became the Commissioner/Sealer. Bill retired in April of 2005 after 36 years of serving the agriculture industry and community. We miss him and wish him well in all his new adventures.

John started one year after Bill in May of 1970 as an Agricultural Inspector I. He retired 35 years later as an Environmental Biologist 4. He was a tireless worker who never failed to bring joy to the office with a ready smile and quick wit. He is continuing to help our Department out, between hunting and fishing trips, as new staff is bought up to speed. We wish him much success.

Mark Black, Agricultural Commissioner
Sealer of Weights and Measures

Jean Miller, Assistant Commissioner
Assistant Sealer of Weights & Measures

TO: A. G. Kawamura, Secretary		The Honorable Board of Supervisors
State of California	and	Chairman: Keith Hansen District 5
Department of Food and Agriculture		Denny Bungarz District 1
		Gary Freeman District 2
		Tom McGowan District 4
		John Amaro District 3

I am pleased to submit the 2005 annual crop and livestock report for Glenn County as required by Section 2279 of the California Food and Agriculture Code. This report summarizes the acreage, production and gross value of Glenn County agricultural and forest commodities.

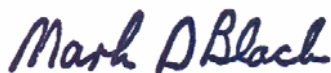

Agriculture continues to be the county's major industry. The 2005 gross production of agricultural commodities was valued at \$393,605,000. This represents an increase of 12 percent from the 2004 gross production value of \$347,896,000.

For the first time since the 1930s, rice is not the number one leading commodity. Almonds have taken the lead with a production value of \$134,541,000. This is a 42% jump from 2004 due to a significant increase in value per ton and a slight increase in production. Walnuts and prunes also showed an increase in value but olives and pistachios have declined due to their alternate bearing characteristic. Dairy and cattle & calves saw a decrease in total value but still hold the #3 and #4 spot with an 8% and a 2% percent decrease respectively. Another notable increase was the timber value. 2005 production was \$476,000 versus a 2004 value of \$131,000. The cost of pollination of almonds was almost double of what it was in 2004.

Values given in this report are gross receipts received by growers and do not reflect their net income. They do not take into account the various costs of production, marketing or transportation.

I want to express my appreciation for the cooperation and assistance of all individuals, related agencies and members of the agricultural industry for their help in compiling this report. Members of my staff should be commended for their countless hours and extra efforts to gather this year's information and to Jean Miller for the compilation of the report.

Respectfully submitted,

Mark D. Black
Agricultural Commissioner

Glenn County

Glenn County is located in the heart of the Sacramento Valley and is primarily an agricultural community. The Coast Range mountains are on the west and for most of the County, the Sacramento River is located on the east. Interstate 5 runs north and south through the middle of this rich farm land.

With over 1,000 farms, agriculture remains the primary source of Glenn County's economy.

Glenn County was incorporated on March 5, 1891 and the county seat, Willows, was created 6 days later on March 11, 1891. Glenn County was created out of the northern portion of Colusa County, then called Colusi County and was named for Dr. Hugh L. Glenn, the largest wheat farmer in California in his lifetime.

TO: A. G. Kawamura, Secretary
State of California
Department of Food and Agriculture

and

The Honorable Board of Supervisors
Chairman: Tom McGowan District 1
Tracey Quarne District 2
John Amaro District 3
Michael Murray District 4
Keith Hansen District 5

I am pleased to submit the 2006 annual crop and livestock report for Glenn County as required by Section 2279 of the California Food and Agriculture Code. This report summarizes the acreage, production and gross value of Glenn County agricultural and forest commodities.

Agriculture continues to be the county's major industry. The 2006 gross production of agricultural commodities was valued at \$368,878,000. This represents a decrease of 6 percent from the 2005 gross production value of \$393,605,000.

Rice is the number one leading commodity again with a total value of \$94,717,000. Almonds took the lead last year but are now in the number two spot with a production value of \$77,238,000. Rice and almonds represent 55% of the total crop and livestock value for 2006.

Prunes, pistachios and walnuts all showed an increase in value and production but olives and citrus had a decrease in production. The weather was unusually warm in January which was followed by freezing weather in February. Heavy rains fell in April and May which affected many crops including olives. The heavy rains knocked off most of the olives blossoms which caused a production decrease of 58%.

Some new specialty seed crops were planted which increased the value of the seed crops by 51%.

Values given in this report are gross receipts received by growers and do not reflect their net income. These values do not take into account the various costs of production, marketing or transportation.

I want to express my appreciation for the cooperation and assistance of all individuals, related agencies and members of the agricultural industry for their help in compiling this report. Members of my staff should be commended for their countless hours and extra efforts to gather this year's information and to Jean Miller for the compilation of the report.

Respectfully submitted,

Mark D. Black
Agricultural Commissioner

GLENN COUNTY

2007

Annual Crop & Livestock Report

Almonds in Glenn County by Lisa
Hunter and Jean Miller

Glenn County

Glenn County is located in the heart of the Sacramento Valley and is primarily an agricultural community. The Coast Range mountains are on the west (dark part of map below) and the Sacramento River is located on the east. Interstate 5 runs north and south through the middle of this rich farm land.

With over 1,000 farms, agriculture remains the primary source of Glenn County's economy. Major commodities include rice, almonds, dairies, walnuts and prunes.

Glenn County was incorporated on March 5, 1891 and the county seat, Willows, was created 6 days later on March 11, 1891. Glenn County was created out of the northern portion of Colusa County, then called Colusi County and was named for Dr. Hugh L. Glenn, the largest wheat farmer in California in his lifetime.

Bob Birdseye inspecting bee hives for colony strength, American foulbrood and small hive beetle.

County Of Glenn

DEPARTMENT OF AGRICULTURE

Mark Black, Agricultural Commissioner

Jean Miller, Assistant Commissioner
Assistant Sealer of Weights & Measures

TO: A. G. Kawamura, Secretary
State of California
Department of Food and Agriculture

and

The Honorable Board of Supervisors
Chairman: Michael Murray District 4
Tom McGowan District 1
Tracy Quarne District 2
John Amaro District 3
Keith Hansen District 5

I am pleased to submit the 2007 annual crop and livestock report for Glenn County as required by Section 2279 of the California Food and Agriculture Code. This report summarizes the acreage, production and gross value of Glenn County agricultural and forest commodities.

Agriculture continues to be the county's major industry. The 2007 gross production of agricultural commodities was valued at \$493,324,000. This represents an increase of 34 percent from the 2006 gross production value of \$368,878,000.

Almonds captured the lead this year as the number one commodity with a total value of \$109,918,000. Rice is in the number two spot with a value of \$106,039,000. Rice and almonds represent 51% of the top 10 commodities for 2007.

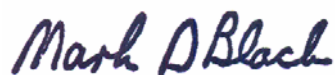

Corn and wheat both had a significant increase in acreage and value and corn is back in the top ten list. Milk increased notably due to its higher value. Olives rebounded vigorously from the devastating weather experienced in 2006.

Many different seed crops are grown in Glenn County, especially sunflowers. The acreage was down by 25% overall due to the increase in corn and wheat acreage.

Values given in this report are gross receipts received by growers and do not reflect their net income. These values do not take into account the various costs of production, marketing or transportation.

I want to express my appreciation for the cooperation and assistance of all individuals, related agencies and members of the agricultural industry for their help in compiling this report. Members of my staff should be commended for their countless hours and extra efforts to gather this year's information and to Jean Miller for the compilation of the report.

Respectfully submitted,

Mark D. Black
Agricultural Commissioner

GLENN COUNTY

2008

Annual Crop & Livestock Report

Rice in Glenn County

Dedication

The 2008 Crop and Livestock Report is dedicated to Bob Birdseye who retired on December 31, 2008. He joined the Glenn County Agricultural Commissioner's office in 1993 as a Biologist Aide and rose to the position of Environmental Biologist 4. He was our key apiary specialist and has started his own apiary business so he can continue to work with bees. We miss him and wish him well in his new adventures and thank him for the great banana bread he bakes and brings to us- warm from the oven.

Glenn County

Glenn County is located in the heart of the Sacramento Valley and is primarily an agricultural community. The Coast Range mountains are on the west (dark part of map below) and the Sacramento River is located on the east. Interstate 5 runs north and south through the middle of this rich farm land. The population of Glenn County is slightly over 29,000 and the two major cities, Willows and Orland, lie along Interstate 5.

With over 1,000 farms, agriculture remains the primary source of Glenn County's economy. Major commodities include rice, almonds, dairies, walnuts and prunes.

Glenn County was incorporated on March 5, 1891 and the county seat, Willows, was created 6 days later on March 11, 1891. Glenn County was created out of the northern portion of Colusa County, then called Colusi County and was named for Dr. Hugh L. Glenn, the largest wheat farmer in California in his lifetime.

County Of Glenn

DEPARTMENT OF AGRICULTURE

Mark Black, Agricultural Commissioner
Sealer of Weights and Measures

Jean Miller, Assistant Commissioner
Assistant Sealer of Weights & Measures

TO: A. G. Kawamura, Secretary
State of California
Department of Food and Agriculture

and

The Honorable Board of Supervisors
Chairman: Michael Murray District 4
John Viegas District 1
Tracy Quarne District 2
Steve Soeth District 3
Leigh McDaniel District 5

I am pleased to submit the 2008 annual crop and livestock report for Glenn County as required by Section 2279 of the California Food and Agriculture Code. This report summarizes the acreage, production and gross value of Glenn County agricultural and forest commodities.

Agriculture continues to be the county's major industry. The 2008 gross production of agricultural commodities was valued at \$558,467,000. This represents an increase of 13 percent from the 2007 gross production value of \$493,324,000.

Rice returned to the lead this year as the number one commodity with a total value of \$193,089,000. Almonds are in the number two spot with a value of \$87,931,000. Rice and almonds represent 59% of the top 10 commodities for 2008.

The almond industry took a beating between the powerful storm that hit on January 4, 2008 and a devastating fire at a large processing facility that occurred after harvest. In addition, both the yield and price were down.

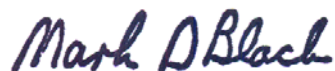

The table olive industry suffered greatly when frost hit at bloom time on April 20, 2008 and then again when abnormal hot, dry winds blew for two weeks in May 2008. The winds were also devastating to the citrus industry.

Our rangeland is still experiencing drought conditions which are creating hardships for our cattle industry. We are entering our third year of below average rainfall which also creates difficulties for all water users.

Values given in this report are gross receipts received by growers and do not reflect their net income. These values do not take into account the various costs of production, marketing or transportation.

I want to express my appreciation for the cooperation and assistance of all individuals, related agencies and members of the agricultural industry for their help in compiling this report. Members of my staff should be commended for their countless hours and extra efforts to gather this year's information and to Jean Miller for the compilation of the report.

Respectfully submitted,

Mark D. Black
Agricultural Commissioner

GLENN COUNTY

2009

Annual Crop & Livestock Report

harvest time for high density
olives for oil

Dedication

This year's crop report is dedicated to two special people who both retired in 2009.

Candice Woods joined our Air Pollution staff in 1990 and retired in May as the Administrative Services Officer for Air Pollution. We miss her and wish her well in her active community involvement in Willows.

Deb Hubbard joined our Agriculture staff in 1996 and retired in December as the Administrative Services Officer for the Agriculture Department. We miss her and wish her well in her new adventure as she continues with her goal of completing her college degree at Chico State University.

Glenn County

Glenn County is located in the heart of the Sacramento Valley and is primarily an agricultural community. The Coast Range mountains are on the west (dark part of map below) and the Sacramento River is located on the east. Interstate 5 runs north and south through the middle of this rich farm land. The population of Glenn County is slightly over 29,000 and the two major cities, Willows and Orland, lie along Interstate 5.

With over 1,000 farms, agriculture remains the primary source of Glenn County's economy. Major commodities include rice, almonds, dairies, walnuts and prunes.

Glenn County was incorporated on March 5, 1891 and the county seat, Willows, was created 6 days later on March 11, 1891. Glenn County was created out of the northern portion of Colusa County, then called Colusi County and was named for Dr. Hugh L. Glenn, the largest wheat farmer in California in his lifetime.

County Of Glenn

DEPARTMENT OF AGRICULTURE

Mark Black, Agricultural Commissioner
Sealer of Weights and Measures

Jean Miller, Assistant Commissioner
Assistant Sealer of Weights & Measures

TO: A. G. Kawamura, Secretary
State of California
Department of Food and Agriculture

and

The Honorable Board of Supervisors
Chairman: Steve Soeth District 3
John Viegas District 1
Tracy Quarne District 2
Michael Murray District 4
Leigh McDaniel District 5

I am pleased to submit the 2009 Annual Crop and Livestock Report for Glenn County as required by Section 2279 of the California Food and Agriculture Code which requires each County Agricultural Commissioner to summarize the acreage, production and gross value of Glenn County agricultural and forest commodities. Section 2272 of the California Food and Agriculture Code requires each County Agricultural Commissioner to report on actions taken to eradicate, control or manage pests in their county.

Agriculture continues to be the county's major industry. The 2009 gross production of agricultural commodities was valued at \$477,363,000. This represents a decrease of 15 percent from the 2008 gross agricultural production value of \$558,467,000.

Rice again is in the lead this year as the number one commodity with a total value of \$156,873,000. Almonds are in the number two spot with a value of \$81,219,000. Rice and almonds represent 41% of the top 10 commodities for 2009.

The effects of the powerful storm that hit California and especially Glenn County in January of 2008 will continue to play a role in the almond industry. Production will continue to be lower than in the last few years as newly planted almond trees come into bearing age.

The table olive industry suffered again when abnormally high temperatures at the end of May 2009 occurred during pollination resulting in a substantial loss of fruit.

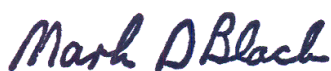

The three year drought which parched our rangelands and created hardships for our cattle industry has ended with plentiful rains received during the winter months. All water users went through a lot of stress during spring planting when water was rationed.

A devastating freeze mid-December greatly affected our navel orange industry with many growers losing their entire crop. This freeze also affected many of our other tree crops by killing branches on the trees which now involves major pruning to restore the trees' vitality.

Values given in this report are gross receipts received by growers and do not reflect their net income. These values do not take into account the various costs of production, marketing or transportation.

I want to express my appreciation for the cooperation and assistance of all individuals, related agencies and members of the agricultural industry for their help in compiling this report. Members of my staff should be commended for their countless hours and extra efforts to gather this year's information and to Jean Miller for the compilation of the report.

Respectfully submitted,

Mark D. Black
Agricultural Commissioner
