Growers' Marketing Seasons

Oranges: Florida--Early and mid-season, September 15 to April 1; Valencia, February 1 to July 5;
California--Navel, November 5 to June 20; Valencia, March 15 to December 15;
Texas--September 25 to May 15;
Arizona--November 1 to June 30.

Grapefruit: California--Desert Valleys, November 15 to July 15; other areas, March 20 to October 31;
Florida--September 5 to June 10;
Arizona--November 1 to July 31;
Texas --September 25 to May 30.

Lemons: California--November 1 to October 31;
Arizona--September 15 to March 1.

Limes: Florida--April 1 to March 31.

Tangelos: Florida--October 20 to March 31.

Tangerines: Florida--October 20 to February 15;
California--November 20 to April 15 (Light volume of late mandarin varieties continues into June.)
Arizona--November 15 to April 15 (Light volume of late mandarin varieties continues into June.)

Temples: Florida--December 1 to May 1.

Net Weight Per Box

Oranges:	Florida and Texas	90 pounds
	California and Arizona	75 pounds
Grapefruit:	Florida	85 pounds
	Texas	80 pounds
	California Desert Valleys and Arizona	64 pounds
	Other California Areas	67 pounds
Lemons:	California and Arizona	76 pounds
Limes:	Florida	80 pounds
Tangelos:	Florida	90 pounds
Tangerines:	Florida	95 pounds
	California and Arizona	75 pounds
Temples:	Florida	90 pounds

CITRUS FRUITS

Revised Estimates, By States, 1964-65 through 1969-70

Production, Use, Value

This report presents estimates by States of the production, value, and utilization of production of citrus fruits for the crop seasons 1964-65 through 1969-70. These estimates have been revised where necessary by reviewing marketing agreement records, recorded truck and rail movement, quantities inspected, quantities used by processors, and the 1969 Census of Agriculture. Separate estimates of home use have been discontinued in this series of statistics and included with fresh utilization. Estimates of Louisiana citrus were discontinued after the 1964-65 season.

Historical Series

Historical series for States, and the United States, were published in "Citrus Fruits, Production, Use, and Value, by States, 1909-10 - 1964-65," Statistical Bulletin No. 380, issued in January 1967.

Crop Seasons

Orange and grapefruit trees generally bloom in late winter and early spring, and fruit is picked 8 to 18 months after blooming. Harvest extends from the fall of the year of bloom to the fall of the following year. Harvest of early and midseason oranges, including navels, starts in the early fall and continues until spring. Harvest of valencia oranges in Florida, Texas, and Arizona extends from about the first of February to early summer. In northern California, valencia harvest starts in March and is usually completed by early summer. In southern California, however, harvest generally starts about May 1 of the year after bloom and extends into December.

Grapefruit harvest, except for the California summer crop, begins in the fall in all States and ends by early summer of the next year. California summer grapefruit move to market mostly from early summer through September of the year after bloom.

California lemons, which make up the major part of the Nation's lemon production, are harvested in all months of the year. The crop year in this publication is considered to be from November 1 to October 31.

Nearly all U. S. limes are grown in Florida and are picked mostly from April through December.

The values shown in this report relate to the crop seasons and should not be confused with estimates of calendar-year cash income.
