CHICKENS AND EGGS:

Final Estimates for 1976-79

United States Department of Agriculture
Economics and Statistics Service
Crop Reporting Board

Statistical Bulletin No. 654

CHICKENS AND EGGS: FINAL ESTIMATES FOR 1976-79. Crop Reporting Board, Estimates Division, Economics and Statistics Serivce, U.S. Department of Agriculture. Statistical Bulletin No. 654.

ABSTRACT

This publication presents final chicken and egg estimates, including some revisions, for 1976-79. Data covered include estimates for December 1 inventory and value of chickens and monthly layers, rate of lay, and egg production. This report continues the official series published in Statistical Bulletin No. 590, issued January 1978.

Washington, D.C. 20250 January 1981

All Chickens: Number, value per head, total value, and classes, United States, December 1, 1976-79	5
All Chickens: Number, value per head, total value, by States, December 1, 1976-79	6
All Chickens: Number, classes, and by States, December 1, 1976-79	8
Hens and Pullets of Laying Age and Potential Layers: By regions, March 1, June 1, September 1, and December 1, 1976-79	15
Egg Production: Average number of layers, eggs per 100 layers, by months, United States, 1976-79	17
Egg Production: Annual average number of layers, eggs per layer, by States, 1976-79	18
Egg Production: By quarters, 1976-79	20
Layers: Average number, by months and by States, 1976-79	22
Eggs: Number laid per 100 layers, by months and by States, 1976-79	30
Egg Production: By months and by States, 1976-79	38
Layers: Number on hand first day of the month, by months and by States, 1976-79	46
Eggs: Number laid per 100 layers, first day of the month, by months and by States, 1976-79	54

INTRODUCTION

Chicken and egg estimates were published on a current basis in monthly and annual reports during 1976-79. Primary data were obtained through producer surveys which included all known large producers and a sample of smaller producers. Producer lists were updated annually.

Revisions were made only after a thorough review of the original data, with consideration given to all additional data now available, including the 1978 Census of Agriculture. Among the check data was information on egg-type chicks hatched, Pullorum-typhoid disease testings, and chicken slaughter. Revisions at the national level were less than 1 percent for all chickens and egg production.

Data for the 1978 Census of Agriculture were collected with the request to report inventories as of December 31, 1978. The Crop Reporting Board (CRB) inventory numbers are as of December 1.

Estimates of average value per head were based on CRB crop and livestock reporters' estimates of average price per head in their localities as of December 1 each year. These chicken and egg producers reported the value per head for hens and pullets of laying age and all other chickens. Values per head for each State were weighted together by the number of hens and pullets of laying age and all other chickens. The total value is the weighted average value multiplied by the total number of chickens. For the United States, the total value is the sum of the State estimates; value per head is derived by dividing the total U.S. value by the total number of chickens.

The number of chickens by classes is estimated as of December 1. These estimates are based on survey and historical data relationships of the various classes to layers and total chickens.
