FOREWORD

This publication reports the major discussions of the ninth national agricultural policy conference planned by the National Committee on Agricultural Policy and sponsored by the Farm Foundation. Eighty-six representatives from 44 states, the United States Department of Agriculture, and other interested agencies participated in the conference.

This report supplements the material included in the proceedings of the eight previous policy conferences. The purpose of these annual policy conferences is to assist extension workers who deal with agricultural policy problems through: (1) presentation of timely and useful information and (2) discussion of effective techniques for presenting this information to groups. This year special emphasis was again given to the development of discussion guides for use in state and local extension programs (contained in Part II).

The exchange of experiences and ideas at these conferences is designed to broaden the knowledge of participants, stimulate their thinking, and extend their horizons, thereby increasing their competence in dealing with the complex and multiple aspects of agricultural policy issues.

The Farm Foundation, following its policy of close cooperation with the state extension services, assisted in developing the program for the 1959 conference, financed the instructional staff, provided a portion of the necessary expenses of those in attendance, and agreed to make this report of the conference available to all the states. The Center for Agricultural and Economic Adjustment, Iowa State University, provided funds for the work groups to meet prior to the conference to prepare resource materials and also helped finance the printing of this report.

Joseph Ackerman, *Managing Director*
