## FOREWORD

This publication reports the major discussions of the eighth national agricultural policy conference planned by the National Committee on Agricultural Policy and sponsored by the Farm Foundation. Seventy-six representatives from 46 states, the United States Department of Agriculture, and other interested agencies participated in the conference.

This report supplements the material included in the proceedings of the seven previous policy conferences. These annual policy conferences are designed to assist extension workers who deal with agricultural policy problems through: (1) presentation of timely and useful information and (2) discussion of effective techniques for presenting this information to groups. This year in addition special emphasis was given to the development of discussion guides for use in state and local extension programs (contained in Part I).

The exchange of experiences and ideas at these conferences has broadened the knowledge of participants, stimulated their thinking, and extended their horizons. These discussions have helped extension workers keep abreast of new trends, emerging needs, and improved methods and have increased their competence in dealing with the complex and multiple aspects of agricultural policy issues.

The Farm Foundation, following its policy of close cooperation with the state extension services, assisted in developing the program for the 1958 conference, financed the instructional staff, provided a portion of the necessary expenses of those in attendance, and agreed to make this report of the conference available to all the states.
