SOYMEAL DATA BOOK

by

CTAP Staff

CTAP Staff Report No. 14
August 1985

Prepared by

S. Devadoss, Model Research and Development Coordinator
Anisossadat Bahrenian, Data Book Coordinator
Duane Schouten, Data Base Manager
Michael Helmar, Soymeal Specialist
Jess Robinson, Computer Support Manager
Patrick Westhoff, Editor
William H. Meyers, Professor-in-Charge

Data Source

Original data were obtained from the OASIS Databank, World Analysis Branch, International Economics Division, Economic Research Service, U.S.D.A. Data were adjusted in some regions and years to maintain consistency between ending stocks and beginning stocks and between supply and demand. Data are on a crop year basis for the respective regions. In the tables, a "." indicates missing data.

Annotated Index - Soymeal

<u>Country or Region*</u>	<u>Page</u>
United States	11
<p>Production more than doubled between the mid 60's and early 80's. Exports more than tripled, and accounted for more than one-fourth of production at the end of the period. Production and exports both peaked in 1980, while consumption reached its highest level in 1983. Only in 1974 and 1975 did stocks exceed 2% of production.</p>	
Canada	15
<p>Production doubled between 1965 and 1983, with most of the increase occurring after 1979. Consumption tripled during the period, so the country shifted from being a marginal net exporter to being a significant net importer. Net imports peaked in 1979 and supplied about 30% of domestic demand in the early 80's.</p>	
Brazil	19
<p>Production increased rapidly until the peak year of 1981. Exports grew at an even more rapid pace, and accounted for 80% of production in the early 80's. Production, consumption and exports all declined modestly after 1981. Except in 1980, stocks were less than 5% of production.</p>	
Argentina	23
<p>Production increased dramatically, particularly in the 70's and early 80's. Consumption grew until the mid 70's, but then fluctuated considerably before declining sharply in 1983. Exports grew dramatically from 0 in 1971 to 90% of production in 1983.</p>	
Mexico	27
<p>Production increased rapidly before leveling off in the early 80's. Imports varied considerably from year to year, but generally declined in relative importance. Imports supplied less than 15% of domestic demand in the early 80's. Significant ending stocks were held in 1981 and 1983.</p>	
Venezuela	31
<p>Production was limited. Consumption and imports grew rapidly in the 70's and early 80's. Imports supplied 90% of domestic demand at the end of the period.</p>	
Central America & Caribbean Islands	35
<p>Production increased rapidly after 1974, but remained limited. Consumption and net imports both grew rapidly in the 70's and early 80's. Net imports supplied about 60% of domestic demand in the early 80's.</p>	

*Regional definitions are found on page 6.

<u>Country or Region</u>	<u>Page</u>
Other South America	37
<p>Production increased five-fold between the mid 60's and early 80's. Consumption generally changed with production. The region was a net importer in some years, but was a net exporter in the early 80's.</p>	
Egypt	39
<p>Data are unavailable for years prior to 1976. Production increased five-fold between 1976 and 1983. Consumption fluctuated considerably, but increased dramatically in 1983, resulting in large imports.</p>	
High Income North Africa & Middle East	41
<p>Production more than doubled between the mid 60's and early 80's. Consumption increased more rapidly, and imports grew from negligible levels to supply about 60% of domestic demand in the early 80's.</p>	
Other Low Income North Africa & Middle East	43
<p>Production was limited. No imports were recorded prior to 1972, but consumption and imports grew rapidly in the late 70's and early 80's. Net imports supplied three-fourths of domestic demand in the early 80's.</p>	
Republic of South Africa	45
<p>Data are unavailable for years prior to 1974. Production was limited. Consumption and imports grew rapidly in the early 80's.</p>	
Central Africa	47
<p>Data are unavailable for years prior to 1979. No production was recorded. Consumption and imports were limited.</p>	
East Africa	49
<p>Data are unavailable for years prior to 1973. Production was limited, but it increased rapidly in the late 70's. Net exports accounted for as much as half of production in some years, but net trade was 0 in other years.</p>	
People's Republic of China	51
<p>Production varied considerably from year to year, but generally increased over time. No trade was reported prior to 1977, but exports accounted for almost 20% of production in 1983.</p>	
Japan	55
<p>Production almost tripled between 1965 and 1983. Consumption generally changed with production, so net imports were modest. Net imports supplied less than 10% of domestic demand in the early 80's.</p>	

<u>Country or Region</u>	<u>Page</u>
India	59
<p>Production increased rapidly in the 70's and early 80's. Consumption fluctuated considerably, but generally increased until 1981. No exports were recorded until 1978, but two-thirds of production was exported in 1983.</p>	
Other South Asia	61
<p>Data are unavailable for years prior to 1978. Production, consumption and imports were negligible.</p>	
Thailand	63
<p>Production increased during the late 60's and 70's, but remained limited. Consumption grew rapidly in the late 70's and early 80's, so imports also increased. Imports supplied approximately three-fourths of domestic demand in the early 80's.</p>	
Indonesia	65
<p>Data are unavailable for years prior to 1975. No production was reported. Consumption and imports increased rapidly in the late 70's and early 80's.</p>	
High Income East Asia	67
<p>Production increased rapidly between the mid 60's and the early 80's. Consumption increased more rapidly in the late 70's and early 80's, so net imports increased. Net imports supplied one-fourth of domestic demand in 1983.</p>	
Other Low Income East Asia	71
<p>Production was limited until a sharp increase occurred in 1981. Consumption increased rapidly, as did imports. Imports supplied three-fourths of domestic demand in the early 80's.</p>	
Australia	73
<p>Production was limited, but it generally increased until the early 80's. Consumption also generally increased over time, but imports varied considerably from year to year. Imports supplied about 20% of domestic demand in the early 80's.</p>	
New Zealand	75
<p>No production was recorded. Negligible imports were reported in the late 70's and early 80's.</p>	

<u>Country or Region</u>	<u>Page</u>
USSR	77
<p>Production varied dramatically from year to year and peaked in 1977. Consumption also fluctuated considerably, but it increased rapidly in the early 80's. The country first imported soy meal in 1979, but imports supplied over 70% of domestic demand by 1983.</p>	
EC-10	81
<p>Production increased four-fold between 1965 and 1980 before declining slightly. Consumption and net imports also increased rapidly, and both reached their peak in 1982. Net imports supplied over 40% of domestic demand in the early 80's. Ending stocks were considerably higher in years after 1978 than in earlier years.</p>	
Other Western Europe	85
<p>Production increased rapidly between the mid 60's and early 80's. Consumption also grew rapidly until it leveled off in the early 80's. Net imports increased until the late 70's, but then declined. Net imports supplied just 15% of domestic demand in the early 80's.</p>	
Eastern Europe	89
<p>Production increased until 1980, declined in 1981 and 1982, and then increased again in 1983. Consumption peaked in 1981, as did imports. Imports supplied about three-fourths of domestic demand in the early 80's.</p>	
Developed Countries	95
<p>Production almost tripled between 1965 and the peak year of 1980 before declining somewhat. Consumption generally changed with production. Developed countries were marginal net exporters until the mid 70's, and they were marginal net importers in most later years.</p>	
Centrally Planned Countries	99
<p>Production doubled between the mid 60's and the early 80's. Consumption more than tripled during the same period, so imports increased very rapidly. Net imports supplied half of demand in the early 80's.</p>	
Developing Countries	103
<p>Complete information on developing country production, consumption and trade is unavailable. Production and consumption increased rapidly in the late 70's and early 80's. Net exports also increased, and they accounted for over 40% of production in the early 80's.</p>	

Country or RegionPage

World

105

World production tripled between the mid 60's and the early 80's. Trade increased even more rapidly. One-third of all soymeal produced was traded internationally in the early 80's. Ending stocks were greatest in 1974 and at the end of the period.
