SOYOIL DATA BOOK

by

CTAP Staff

CTAP Staff Report No. 15
August 1985

Prepared by

S. Devadoss, Model Research and Development Coordinator
Anisossadat Bahrenian, Data Book Coordinator
Duane Schouten, Data Base Manager
Michael Helmar, Soyoil Specialist
Jess Robinson, Computer Support Manager
Patrick Westhoff, Editor
William H. Meyers, Professor-in-Charge

Data Source

Original data were obtained from the OASIS Databank, World Analysis Branch, International Economics Division, Economic Research Service, U.S.D.A. Data were adjusted in some regions and years to maintain consistency between ending stocks and beginning stocks and between supply and demand. Data are on a crop year basis for the respective regions. In the tables, a "." indicates missing data.

Annotated Index - Soyoil

<u>Country or Region*</u>	<u>Page</u>
United States	11
<p>Production more than doubled between the mid 60's and early 80's. Consumption also doubled during the period. Exports fluctuated considerably, but generally increased until 1980. After a sharp decline in 1981, exports recovered somewhat in 1982 and 1983. Approximately 15% of production was exported in the early 80's. Ending stocks also varied considerably from year to year, and actually exceeded exports in 1976 and 1981.</p>	
Canada	15
<p>Production doubled between 1965 and 1983. Domestic consumption generally matched production, and net trade was insignificant. The country was a marginal net importer in the 70's and a marginal net exporter in the early 80's.</p>	
Brazil	17
<p>Production increased rapidly until the peak year of 1981. Domestic consumption also increased dramatically between the mid 60's and the early 80's. Exports were first reported in 1970, but in the peak year of 1981, nearly half of production was exported. Ending stocks were generally less than 10% of total demand.</p>	
Argentina	21
<p>Production increased substantially, particularly in the 70's and early 80's. Consumption varied considerably from year to year, but generally increased over time. Exports grew from 0 in 1972 to more than two-thirds of production in 1982 and 1983.</p>	
Mexico	23
<p>Production increased rapidly before levelling off in the early 80's. Domestic consumption also increased rapidly during the period. Imports were substantial relative to total consumption in the mid 70's, but imports supplied less than 15% of domestic demand in the early 80's.</p>	
Venezuela	25
<p>Production was limited. Consumption and imports were considerably greater after 1978 than before. Imports supplied approximately 80% of domestic demand in the early 80's.</p>	

*Regional definitions are on page 6.

<u>Country or Region</u>	<u>Page</u>
Central America & Caribbean Islands	27
<p>Production increased rapidly after 1975, but remained limited. Consumption and net imports both grew rapidly in the 70's and levelled off in the early 80's. Imports supplied three-fourths of domestic demand in the early 80's.</p>	
Other South America	29
<p>Production increased six-fold between the mid 60's and early 80's. Consumption and imports both increased even more rapidly. Imports supplied more than 85% of domestic demand in the early 80's.</p>	
Egypt	33
<p>Production increased rapidly in the late 70's and early 80's, but remained limited. Consumption and imports fluctuated considerably but generally increased over time. Imports supplied most of domestic demand in the early 80's.</p>	
High Income North Africa & Middle East	35
<p>Production more than doubled between the mid 60's and early 80's. Consumption and imports grew more rapidly, and both reached their highest level in 1982. Imports supplied three-fourths of domestic demand in the early 80's.</p>	
Other Low Income North Africa & Middle East	37
<p>Production was limited. Consumption and imports increased more than five-fold between the mid 60's and the early 80's. Imports supplied more than 95% of domestic demand at the end of the period.</p>	
Republic of South Africa	41
<p>Production and consumption were limited. Consumption and imports increased modestly in the late 70's and early 80's.</p>	
Central Africa	43
<p>No production was recorded. Consumption and imports increased rapidly in the late 70's and early 80's.</p>	
East Africa	45
<p>Production was limited, but increased in the late 70's. Consumption and imports increased dramatically in 1977, and then fluctuated thereafter. Imports supplied two-thirds of domestic demand in the early 80's.</p>	

<u>Country or Region</u>	<u>Page</u>
People's Republic of China	47
<p>Production varied considerably from year to year, but generally increased over time. Trade was limited, except in 1973 and between 1977 and 1981, when substantial imports were recorded. Imports supplied one-third of domestic demand in 1978, but just 2% in 1983.</p>	
Japan	51
<p>Production more than doubled between 1965 and 1983. Consumption generally changed with production, so net trade was negligible. Net imports supplied less than 10% of domestic demand in the early 80's. Only in 1982 did imports supply more than 5% of domestic demand.</p>	
India	55
<p>Production increased rapidly in the late 70's and early 80's. Consumption increased seven-fold in 1977 and reached its peak in 1980. Imports supplied approximately 85% of domestic demand in the early 80's.</p>	
Other South Asia	59
<p>No production was reported. Consumption and imports fluctuated considerably, but generally increased over time.</p>	
Thailand	61
<p>Production increased during the late 60's and 70's, but remained limited. Consumption and imports increased considerably in the early 80's. Imports supplied most of domestic demand in the early 80's.</p>	
Other Southeast Asia	63
<p>No production was reported. Limited consumption and imports occurred in the late 70's and early 80's.</p>	
High Income East Asia	65
<p>Production increased rapidly between the mid 60's and early 80's. Domestic consumption generally changed with production, and net imports were small throughout the period. Net imports supplied about 10% of domestic demand in the early 80's.</p>	
Other Low Income East Asia	67
<p>A major increase in production occurred in 1981, but production remained limited. Consumption was negligible until 1983. The region was a net importer before 1980 and a net exporter thereafter.</p>	

<u>Country or Region</u>	<u>Page</u>
Australia	69
<p>Production was limited, but it generally increased until 1981. Consumption also generally increased over time, but imports varied considerably from year to year. Imports supplied over half of domestic demand in the early 80's.</p>	
New Zealand	71
<p>No production was recorded. Imports were limited, but increased over time.</p>	
USSR	73
<p>Production varied dramatically from year to year and peaked in 1977. Consumption also fluctuated considerably, but it increased considerably after 1975. The country first imported soyoil in 1978, but imports supplied almost 40% of domestic demand in the early 80's.</p>	
EC-10	77
<p>Production increased four-fold between 1965 and the peak year of 1980, before declining slightly. Consumption grew slightly less rapidly, so net exports increased. Net exports accounted for approximately 20% of domestic production in the early 80's. Ending stocks were considerably greater after 1979 than before.</p>	
Other Western Europe	81
<p>Production increased rapidly between the mid 60's and early 80's. Consumption grew less rapidly, so the region shifted from being a net importer in the 60's and early 70's to being a significant net exporter in the late 70's and early 80's. Net exports accounted for over half of production in the early 80's.</p>	
Eastern Europe	85
<p>Production increased until 1980, declined in 1981 and 1982, and then increased again in 1983. Consumption and imports both fluctuated considerably, but generally increased over time. Imports supplied about half of domestic demand in the early 80's.</p>	
Developed Countries	91
<p>Production almost tripled between 1965 and the peak year of 1980 before declining somewhat. Consumption increased slightly less rapidly, and net exports increased over time. Net exports accounted for about 20% of production in the early 80's.</p>	

Country or RegionPage**Centrally Planned Countries**

95

Production more than doubled between 1965 and its peak in 1980, before declining modestly. Consumption and imports grew more rapidly, and reached their highest levels at the end of the period. Net imports supplied approximately 30% of domestic demand in the early 80's.

Developing Countries

99

Production increased dramatically between the mid 60's and the early 80's. Consumption and import data are unavailable for years prior to 1978. After 1978, consumption and imports generally increased. Net imports supplied one-fourth of domestic demand in the early 80's.

World

101

World production tripled between the mid 60's and the early 80's. Trade increased even more rapidly. One-fourth of all soyoil produced was traded internationally in the early 80's. Ending stocks were generally greater after 1979 than they were in previous years.
