Economic Analysis of Research and Promotion

*Proceedings from the symposium sponsored by
NC-208 and NEC-63*

New Orleans, Louisiana
March 21-22, 1997

Edited by:
Jennifer L. Ferrero
Cynda R. Clary
Timothy J. Richards

Sponsored by and published with the support of:
The Research Committee on Commodity Promotion (NEC-63)
and
The National Institute for Commodity Promotion Research and Evaluation (NICPRE)

About the Editors and Contributors

Editors:

Jennifer L. Ferrero is an editor in the Department of Agricultural, Resource, and Managerial Economics at Cornell University. She received her B.A. in International Relations from the University of California, Davis and prior to coming to Cornell in the fall of 1995, worked for three years on the UCD campus newspaper and in the information technology department of a capital investment firm in San Francisco. Ferrero frequently does freelance work for various publications and authors. Her current focus is on technical editing and design work in the commodity promotion research area.

Cynda R. Clary is an assistant professor of Agricultural Economics and Agricultural Business at New Mexico State University. Clary attended her first NEC-63 meeting while a graduate student attending North Carolina State University. Her Ph.D. dissertation examined generic and brand advertising effects in the dairy promotion program. Since her arrival at NMSU in 1993, Clary has worked on both commodity promotion and agri-marketing teaching issues. She received the 1997 Donald C. Roush Award for Teaching Excellence for her work with NMSU agri-marketing students. Clary received her B.S. in Agricultural Business Management from California Polytechnic State University, her M.S. in Management from Purdue University, and her Ph.D. from North Carolina State University.

Timothy J. Richards received a B. Comm. degree from the University of British Columbia in 1988, majoring in Economics. He then went on to the Food Research Institute at Stanford University, receiving an A.M. in 1989 and a Ph.D. in 1994. He is currently an assistant professor in the School of Agribusiness at Arizona State University and works closely with the National Food and Agricultural Policy Project (NFAPP) there. His principal research interests include the promotion of agricultural commodities, market power relationships in the fruit and vegetable industry, and efficiency and productivity of regulated dairy industries. But, when he grows up, he really wants to be a major league baseball player.

Authors:

Wally Huffman is a professor of Economics at Iowa State University.

Giancarlo Moschini and Harvey Lapan are professors in the Department of Economics at Iowa State University.

Daniel Sellen is an agricultural economist at the Economic Development Institute (World Bank); Ellen Goddard and Stephen Duff are associate professor and research associate, respectively, in the Department of Agricultural Economics and Business at the University of Guelph.

George Frisvold is an associate specialist (extension) at the University of Arizona and Stephen Vogel works for the Economic Research Service, USDA.

Julian M. Alston is a professor at the University of California, Davis and Philip G. Pardey works for the International Food Policy Research Institute in Washington, DC.

Sharon Till represents the Grains Research and Development Corporation, Canberra, ACT, Australia.

The Honorable John Kerin is a past chairman of the Australian Meat and Livestock Corporation.

Lynn Macias is a branch chief of the marketing division at the California Department of Food and Agriculture.
