September 27, 2016

Karen Ross, Secretary

California Department of Food and Agriculture
and

The Honorable Board of Supervisors, County of Imperial

Supervisor Jesus "Jack" Terrazas, Chairman, District 2
Supervisor John Renison, District 1
Supervisor Michael W. Kelley, District 3
Supervisor Ryan E. Kelley, District 4
Supervisor Raymond Castillo, District 5

I am pleased to present the 2015 Imperial County Agricultural Crop and Livestock Report in accordance with the requirements of Section 2279 of the California Food and Agricultural Code. This report summarizes the estimated acreage, yield, and gross value of Imperial County's agricultural production for the 2015 calendar year. Also included is a report on sustainable agriculture pursuant to Section 2272 of the California Food and Agricultural Code.

The values presented in this report represent the gross value for products and do not reflect the cost of production, marketing, storage, or transportation. No attempt is made to reflect the net income, profit, or loss to producers.

Gross production for 2015 was valued at \$1,925,134,000. This is an increase of \$66,345,000 (3.57%) compared to the 2014 gross value of \$1,858,789,000. Winter vegetables were harvested earlier this year due to early warm weather which left gaps in the supply chain and drove prices up later in the season. Livestock production increased due to increases in the number of cattle and sheep and higher market prices.

Cattle again ranked as our #1 commodity with a gross value of \$444,887,000, a substantial increase of 28% from 2014. This was due to a 7% increase in head count and a 24% increase in market price. Leaf lettuce moved back into the Top Ten Commodities from #20 in 2014 to #5 in 2015 due to more planted acres, higher yields, and higher prices. Sudan grass hay dropped in the commodity ranking from #7 in 2014 to #17 in 2015.

In 2015, there was an increase of 25,347 in total harvested acres, up 4.98% from 2014. This increase occurred in the Field Crop, Vegetable Crop, and Seed Crop categories. Wheat showed the largest increase in harvested acres, up 70% with an increase of 26,670 acres.

Thank you to all of the growers, processors, industry groups, and agencies who provided the information and statistics for this report; your help in this effort is truly appreciated. Thank you also to this year's crop report team, Phyllis Cason (retired), Victoria Huber, and Sandra Mendivil. In addition, I would like to express my appreciation to all of the members of my staff for their continued hard work and dedication.

Sincerely,

A handwritten signature in cursive script that reads "Connie Valenzuela".

Connie Valenzuela
Agricultural Commissioner
Sealer of Weights and Measures

2015 Production Summary

Category	Harvested Acres		Change in Harvested Acres	Gross Value		Change in Gross Value
	2014	2015		2014	2015	
Livestock				\$410,512,000	\$502,065,000	22.30%
Field Crops	322,589	349,687	8.40%	\$530,849,000	\$422,319,000	-20.44%
Vegetable & Melon Crops	122,279	121,284	-0.81%	\$723,260,000	\$805,021,000	11.30%
Fruit & Nut Crops	9,685	8,778	-9.36%	\$95,909,000	\$83,277,000	-13.17%
Seed & Nursery Crops	54,888	55,039	0.28%	\$93,818,000	\$107,673,000	14.77%
Apiary Products				\$4,441,000	\$4,779,000	7.61%
Total	509,441	534,788	4.98%	\$1,858,789,000	\$1,925,134,000	3.57%

Total harvested acres includes multiple cropping on individual fields throughout the year.

Top Ten Commodities

Rank 2015		Gross Value 2015	Rank 2014

California Agricultural Statistics – 2014

California Agricultural Statistics are compiled annually from County Agricultural Commissioner Crop Reports

• In 2014, Imperial County ranked #11 out of 58 California Counties with a gross value of agricultural production at \$1,858,789,000.

• According to a 2014-15 review of the 2013 Ag Statistics by CDFA, Imperial County was the sole producer of sugar beets; #1 producer of onion, wheat, Sudangrass and alfalfa seed; and among the top five producers of cattle, lettuce, alfalfa hay, broccoli, celery, carrots, cauliflower, corn, sheep, dates, melons, spinach, potatoes, salad greens, cabbage, and grapefruit.

• In 2014, California remained the leading state in cash farm receipts with the leading crops being fruits, nuts and vegetables. California produces over 1/3 of the vegetables and 2/3 of the fruit & nuts in the US; California produces nearly all the national production of almonds, dates, figs, kiwifruit, olives, peaches, pistachios, dried plums, raisins and walnuts.

Agricultural Production Areas

Imperial County has three areas of production: Imperial Valley, Bard/Winterhaven, & Palo Verde

2015 Total County Farmable Acres

Imperial Valley	457,695
Bard/Winterhaven	14,452
Palo Verde	7,630
Total	479,777

Mission Statement

To promote and protect our agricultural industry by providing clear direction and appropriate regulatory oversight while protecting our citizens and the environment through the enforcement of pesticide laws, and the detection and eradication of pests harmful to our agricultural industry, human health and other plant resources.

Pest Detection, Eradication and Management

This program is mandated to monitor agricultural and urban areas for harmful exotic pests using trapping and visual surveys, and to control or eradicate exotic pests as appropriate in order to protect the local agricultural industry, environment, the public, and landscaping. Surveys continue for Mediterranean fruit fly, Mexican fruit fly, oriental fruit fly, melon fly, gypsy moth, Japanese beetle, glassy-winged sharpshooter, Asian citrus psyllid, and red imported fire ant. The department also provides field inspection services for growers that wish to export commodities, pest identification services, and enforcement of pest related laws and regulations intended to protect the local agricultural industry.

Pest Detection Trapping

Target Pest	Pest Detection Method	Number of Traps	Annual Trap Services	Host Crops
Asian Citrus Psyllid	Yellow Sticky Trap	480	11,520	Citrus
ACP population monitoring	2 mile delimitation from the International Border - finds result in State treatment			
European Corn Borer	Pheromone	12	120	Corn & Sorghum
Various Exotic Fruit Flies	Feeding Attractant	109	1,090	Fruit Trees & Vegetables
Glassy-winged Sharpshooter	Yellow Sticky Trap	488	10,532	Crops & Ornamentals
Gypsy Moth	Pheromone	60	360	Shade Trees
Japanese Beetle	Pheromone	60	360	Turf & Flowers
Khapra Beetle	Feeding Attractant/Pheromone	36	432	Stored Food Products
Mediterranean Fruit Fly	Pheromone	121	4,840	Fruit Trees
Melon Fruit Fly	Pheromone	121	4,840	Vegetables
Mexican Fruit Fly	Feeding Attractant	121	4,840	Fruit Trees
Oriental Fruit Fly	Pheromone	121	4,840	Fruit Trees

Pest Detection Surveys

Target Pest/Survey Sites	Area Surveyed	Inspections & Finds	Actions
Noxious Weeds / Ag & Urban: Puncture Vine, C-rated Johnson Grass, C-rated	553 Total Miles	35 Total Positive Sites: 20 Positive Sites 15 Positive Sites	5 Sites Mechanical Removal 1 Site Mechanical Removal
Karnal Bunt / Wheat	10 Fields	No Finds	No Action Needed
Red Imported Fire Ant	43 High Risk Sites	No Finds	No Action Needed
Glassy-winged Sharpshooter	Retail Nursery Stock Shipments	1,322 Inspections 23 Rejections	5 Finds: Returned to Origin 18 Rejections not due to finds
	Bulk Citrus Fruit	117 Inspections	No Finds - No Action Needed
Pathogens of Concern for Seed Export	Seed Fields	241 Fields Surveyed (By Request Only)	151 Target Pests of Concern (Listed on Field Walk Report)

Plant Quarantine, Exclusion, and Certification

The department is mandated to exclude exotic agricultural, urban, and environmental pests and to prevent movement of newly discovered pests within the state. This is accomplished through inspection of incoming agricultural products and enforcement of quarantines that prohibit or restrict the movement of plants, seeds, and other items capable of harboring harmful pests. In addition, certificates of quarantine compliance and phytosanitary certificates are issued for commodities originating here in order to assist growers in moving their products to other counties, states, or countries.

Plant Quarantine

Pest Exclusion Inspections (Shipments Entering Imperial County)

Type of Inspection	Inspections	Pounds	Origin
Field & Vegetable Seed	921	15,080,404	Arizona, Canada, Chile, Florida, Idaho, Maine, Michigan, Nebraska, Oregon, Tennessee, Texas, and Washington
Plants	136	-	Arizona, Florida, Illinois, Michigan, Pennsylvania, and Texas
	88	-	California
Bees for Pollination	18	-	Canada

Nursery and Seed Inspection

The goals of the nursery inspection programs are to prevent the introduction and spread of agricultural pests through nursery stock and to protect agriculture and the consumer against economic losses resulting from the sale of inferior, defective, or pest-infested nursery stock. The seed law enforcement program protects seed consumers by regulation of the marketing of seed, inspection of seed grown or sold locally, verification of purity and germination, investigation of seed complaints, and prevention of the spread of noxious weed seeds through seed products. Also included in this program is the California Certified Seed Program in which superior varieties of seed are grown, processed, and distributed under close supervision.

Nursery Inspections

Type of Inspection	Locations	Production Acres	Nursery Stock Type
Production Nursery	19	449	Palms, Bamboo, Vegetable Transplants, Ornamentals, Cut Flowers, Succulents
Retail Nursery	37	-	Retail Flowers, Trees and Shrubs

California Crop Improvement Association Inspections and Certification

Type of Inspection	Inspections	Seed Transfer Certificates	Number of Certificates
Harvest Equipment	33	In-State	90
		Out of State	54

Organic Grower Program

The Organic Program is responsible for enforcement of the federal Organic Foods Production Act of 1990 and the California Organic Products Act of 2003. These statutes protect consumers, producers, handlers, processors and retailers by monitoring and inspecting fresh commodities grown, labeled or sold as organic.

5 Year Comparison of Organic Production

Year	Growers	Acres	Gross Value
2015	36	31,934	\$275,382,000
2014	28	25,156	\$159,938,000
2013	20	19,433	\$80,904,000
2012	26	11,989	\$36,396,000
2011	26	7,487	\$39,386,000

August 1, 2017

Karen Ross, Secretary
California Department of Food and Agriculture
and
The Honorable Board of Supervisors, County of Imperial
Supervisor Michael W. Kelley, Chairman, District 3
Supervisor John R. Renison, District 1
Supervisor Luis A. Plancarte, District 2
Supervisor Ryan E. Kelley, District 4
Supervisor Raymond "Ray" Castillo, District 5

I am pleased to present the 2016 Imperial County Agricultural Crop and Livestock Report in accordance with the requirements of Section 2279 of the California Food and Agricultural Code. This report summarizes the estimated acreage, yield, and gross value of Imperial County's agricultural production for the 2016 calendar year. Also included is a report on sustainable agriculture pursuant to Section 2272 of the California Food and Agricultural Code.

The values presented in this report represent the gross value for products and do not reflect the cost of production, marketing, storage, or transportation. No attempt is made to reflect the net income, profit, or loss to producers.

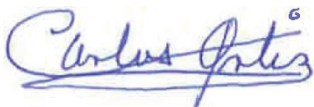

Gross production for 2016 was valued at \$2,063,214,000. This is an increase of \$138,080,000 (7.1%) compared to the 2015 gross value of \$1,925,134,000. The increase was mainly due to winter vegetables having better prices overall. Lettuce and spinach had much higher prices with generally good quality. Alfalfa seed production had an increase of 9,921 acres (31.77%) with a slightly higher yield when compared to last year.

Cattle again ranked as our #1 commodity with a gross value of \$400,614,000 despite a decrease of 10% from 2015. This was due to a 4% decrease in head count and an 11% decrease in market price. Spinach moved back into the Top Ten Commodities from #14 in 2015 to #7 in 2016 mainly due to more planted acres and higher prices. Romaine Lettuce also moved back into the Top Ten Commodities from #16 in 2015 to #9 in 2016 mainly due to higher prices.

In 2016, there was an increase of 7,275 in total harvested acres, up 1.36% from 2015. This increase occurred in the Vegetable Crop, Fruit Crop and Seed Crop categories. Spinach showed the largest increase in harvested acres, up 65% with an increase of 3,994 acres.

Thank you to all the growers, processors, industry groups, and agencies who provided the information and statistics for this report; your help in this effort is truly appreciated. In addition, I would like to express my appreciation to all of the members of my staff for their continued hard work and dedication and particularly to Sandra Mendivil, Special Projects Coordinator, for her work in compiling this annual report.

Sincerely,

Carlos Ortiz
Agricultural Commissioner
Sealer of Weights and Measures

2016 Production Summary

Category	Harvested Acres		Change in Harvested Acres	Gross Value		Change in Gross Value
	2015	2016		2015	2016	
Livestock				\$502,065,000	\$468,176,000	-6.75%
Field Crops	349,687	333,762	-4.55%	\$422,319,000	\$381,181,000	-9.74%
Vegetable & Melon Crops	121,284	133,593	10.15%	\$805,021,000	\$1,006,345,000	25.01%
Fruit & Nut Crops	8,778	9,443	7.57%	\$83,277,000	\$80,098,000	-3.82%
Seed & Nursery Crops	55,039	65,266	18.58%	\$107,673,000	\$123,057,000	14.29%
Apiary Products				\$4,779,000	\$4,357,000	-8.83%
Total	534,788	542,063	1.36%	\$1,925,134,000	\$2,063,214,000	7.17%

Total harvested acres include multiple cropping on individual fields throughout the year.

California Agricultural Statistics—2015

California Agricultural Statistics are compiled annually from County Agricultural Commissioner Crop Reports

- In 2015, Imperial County ranked #11 out of 58 California Counties with a gross value of agricultural production at \$1,925,134,000.
- According to the 2015-16 review of the 2015 Ag Statistics by CDFA, Imperial County was the sole producer of sugar beets; #1 producer of alfalfa hay, onion, wheat, corn, alfalfa seed and Sudan grass hay; and among the top five producers of cattle, lettuce, broccoli, celery, carrots, cauliflower, spinach, potatoes, cantaloupes, salad greens, cabbage, watermelon, grapefruit, sheep, honeydew melon and dates.
- In 2015, California remained the leading state in cash farm receipts with the leading crops being fruits, nuts and vegetables. California is the sole exporter of many agricultural commodities supplying 99 percent or more of the following: almonds, artichokes, dates, dried plums, figs, garlic, kiwi, olives and olive oil, pistachios, raisins, table grapes, and walnuts.

Export Commodities^{1/}

Pest Detection, Eradication & Management

This program is mandated to monitor agricultural and urban areas for harmful exotic pests using trapping and visual surveys, and to control or eradicate exotic pests as appropriate in order to protect the local agricultural industry, environment, the public and landscaping. Surveys continue for the Mediterranean fruit fly, Mexican fruit fly, oriental fruit fly, melon fly, gypsy moth, Japanese beetle, glassy-winged sharpshooter, Asian Citrus psyllid, and red imported fire ant. The department also provides field inspection services for growers that wish to export commodities, pest identification services, and enforcement of pest related laws and regulations intended to protect the local agricultural industry.

Pest Detection Trapping

Target Pest	Pest Detection Method	Number of Traps	Annual Trap Services	Host Crops
Asian Citrus Psyllid	Yellow Sticky Trap	165	6,087	Citrus
ACP population monitoring	2 mile delimitation from the International Border — finds result in state treatment			
European Corn Borer	Pheromone	12	84	Corn & Sorghum
Various Exotic Fruit Flies	Feeding Attractant	110	1,322	Fruit Trees & Vegetables
Glassy-winged Sharpshooter	Yellow Sticky Trap	479	9,836	Crops & Ornamentals
Gypsy Moth	Pheromone	59	433	Shade Trees
Japanese Beetle	Pheromone	59	433	Turf & Flowers
Khapra Beetle	Feeding Attractant/Pheromone	36	379	Stored Food Products
Mediterranean Fruit Fly	Pheromone	121	5,265	Fruit Trees
Melon Fruit Fly	Pheromone	121	4,464	Vegetables
Mexican Fruit Fly	Feeding Attractant	121	5,262	Fruit Trees
Oriental Fruit Fly	Pheromone	121	5,262	Fruit Trees

Pest Detection Surveys

Target Pest/Survey Sites	Area Surveyed	Inspections & Finds	Actions
Noxious Weeds/Ag & Urban:	970 Total Miles	11 Total Positive Sites:	
Puncture Vine, C-rated		5 Positive Sites	1 Site Mechanical Removal
Johnson Grass, C-rated		5 Positive Sites	
Cucumis melo var. Dudaim. A-rated		1 Positive Site	1 Site Mechanical Removal
Karnal Bunt/Wheat	10 Fields	No Finds	No Action Needed
Red Imported Fire Ant	43 High Risk Sites	No Finds	No Action Needed
Glassy-winged Sharpshooter	Retail Nursery Stock Shipments	1,443 Inspections	5 Finds: Returned to Origin
		23 Rejections	121 Rejections not due to finds
	Bulk Citrus Fruit	132 Inspections	No Finds—No Action Needed
Pathogens of Concern for Seed Export	Seed Fields	447 Fields Surveyed (By Request Only)	293 Target Pest of Concern (Listed on Field Walk Report)

Plant Quarantine, Exclusion & Certification

The division is mandated to exclude exotic agricultural, urban, and environmental pests and to prevent movement of newly discovered pests within the state. This is accomplished through inspection of incoming agricultural products and enforcement of quarantines that prohibit or restrict the movement of plants, seeds and other items capable of harboring harmful pests. In addition, certificates of quarantine compliance and phytosanitary certificates are issued for commodities originating here, in order to assist growers in moving their products to other counties, states or countries.

Plant Quarantine

Pest Exclusion Inspections ~ Shipments Entering Imperial County

Type of Inspection	Inspections	Pounds	Origin
Field & Vegetable Seed	770	15,954,264	Argentina, Arizona, California, Chile, Florida, Idaho, Illinois, Nebraska, Oregon, Tennessee, Texas, Washington, Wyoming
Plants	159	-	Arizona, Michigan, Pennsylvania, Texas, Iowa, New Jersey, Mississippi, California
	82	-	
Bees	5	-	Arizona, Montana

Nursery & Seed Inspection

The goals of the nursery inspection programs are to prevent the introduction and spread of agricultural pests through nursery stock and to protect agriculture and the consumer against economic losses resulting from the sale of inferior, defective, or pest-infested nursery stock. The seed law enforcement program protects seed consumers by regulation of the marketing of seed, inspection of seed grown or sold locally, verification of purity and germination, investigation of seed complaints, and prevention of the spread of noxious weed seeds through seed products. Also included in this program is the California Certified Seed Program in which superior varieties of seed are grown, processed and distributed under close supervision.

Nursery Inspections

Type of Inspection	Locations	Production Acres	Nursery Stock Type
Production Nursery	20	541	Palms, Bamboo, Vegetable Transplants, Ornamentals, Cut Flowers, Succulents
Retail Nursery	39	-	Retail Flowers, Trees and Shrubs

California Crop Improvement Association Inspections & Certification

Type of Inspection	Inspection
Harvest Equipment	56

Seed Transfer Certification	Number of Certificates
In-State	63
Out of State	72

Organic Grower Program

The Organic Program is responsible for enforcement of the Federal Organic Foods Production Act of 1990 and the California Organic Products Act of 2003. These statutes protect consumers, producers, handlers, processors and retailers by monitoring and inspecting fresh commodities grown, labeled or sold as organic.

Year	Growers	Acres	Gross Value
2016	48	33,505	\$242,404,000
2015	36	31,934	\$275,382,000
2014	28	25,156	\$159,938,000
2013	26	19,433	\$80,904,000
2012	26	11,989	\$39,396,000

Mission Statement

To promote and protect our agricultural industry by providing clear direction and appropriate regulatory oversight while protecting our citizens and the environment through the enforcement of pesticide laws, weight and measurement standards, the detection and eradication of pests harmful to our agricultural industry, human health, and other plant resources.

Department Description

The County Agricultural Commissioner is charged with enforcing the laws of the California Food and Agricultural Code. These laws and the regulations of the California Code of Regulations address the many aspects and complexities of agricultural production in California. The Agricultural Commissioner must carry out the mandated duties required by the above mentioned codes.

Significant activities include Pesticide Use Enforcement, Pest Detection and Eradication, Pest Exclusion and Quarantine Certification of Agricultural Produce for Export, Pest Management, Seed Law Enforcement, Nursery Inspection, and Crop Statistics. Additional activities may include Fruit and Vegetable Quality Control, Inspections of Imported Produce at the Port of Entry Calexico-East, and Egg Quality Control.

The Agricultural Commissioner is also mandated to enforce the Weights and Measures laws in the Business and Professions Code. These activities include the inspection and certification of all commercial weighing and measuring devices in the County. Inspection of all gasoline pumps, water meters, truck scales and retail scales are a few examples of the activities in this area.

Meet our Agricultural Commissioner/Sealer

In December 2016, Carlos Ortiz was named Imperial County Agricultural Commissioner and Sealer of Weights and Measures. He began his position following a nearly 30-year-career in the Agricultural Commissioner's Office.

The son of a field worker who immigrated to the United States under the Bracero program, Ortiz grew up between two countries, Mexico and the United States, and he spent his youth - after school and during summers - working

with his father in the fields of Southern California and on his father's own ranch in Mexico.

In his current role, Ortiz leads a staff of 38 dedicated men and women. For Ortiz and his staff, partnerships are critical to the success of the County's billion-dollar agricultural economy with crops grown on some 400,000 farmable acres. He and his staff are there to serve and support growers, businesses, and the public.

July 10, 2018

Karen Ross, Secretary

California Department of Food and Agriculture
and

The Honorable Board of Supervisors, County of Imperial

Supervisor Raymond "Ray" Castillo, Chairman, District 5
Supervisor John R. Renison, District 1
Supervisor Luis A. Plancarte, District 2
Supervisor Michael W. Kelley, District 3
Supervisor Ryan E. Kelley, District 4

I am pleased to present the 2017 Imperial County Agricultural Crop and Livestock Report in accordance with the requirements of Section 2279 of the California Food and Agricultural Code. This report summarizes the estimated acreage, yield, and gross value of Imperial County's agricultural production for the 2017 calendar year. Also included is a report on sustainable agriculture pursuant to Section 2272 of the California Food and Agricultural Code.

The values presented in this report represent the gross value for products and do not reflect the cost of production, marketing, storage, or transportation. No attempt is made to reflect the net income, profit, or loss to producers.

Gross production for 2017 was valued at \$2,065,600,000. This is an increase of \$2,386,000 (0.12%) compared to the 2016 gross value of \$2,063,214,000. The increase was mainly due to an increase in some winter vegetable prices. Cabbage, cauliflower and particularly leaf lettuce had much higher prices. The miscellaneous certified and non-certified seed category also saw an increase in harvested acres.

Cattle ranked as our #1 commodity with a gross value of \$387,170,000 despite a decrease of 3.36% from 2016. This was due to a 5% decrease in market price. Leaf Lettuce moved from #3 in 2016 to #2 and Head Lettuce from #6 in 2016 to #4 in 2017 mainly due to better market prices. Sugar beets moved from #12 in 2016 to #10 in 2017.

In 2017, there was a decrease of 2,792 total harvested acres, down 0.52% from 2016. Although the Field, Vegetable & Melon Crop categories saw a decrease in harvested acres, a significant increase in harvested acres occurred in the Fruit and Nut Crops and Seed and Nursery Products categories. Sudan showed the largest increase in harvested acres, up 11.7% with an increase of 5,064 acres.

Thank you to all the growers, processors, industry groups, and agencies who provided the information and statistics for this report; your help in this effort is truly appreciated. In addition, I would like to express my appreciation to all of the members of my staff for their continued hard work and dedication and particularly to Sandra Mendivil, Special Projects Coordinator, for her work in compiling this annual report.

Sincerely,

A handwritten signature in blue ink that reads "Carlos Ortiz".

Carlos Ortiz
Agricultural Commissioner
Sealer of Weights and Measures

California Agricultural Statistics—2016

California Agricultural Statistics are compiled annually from County Agricultural Commissioner Crop Reports

- ❖ In 2016, Imperial County ranked #9 out of 58 California Counties with a gross value of agricultural production at \$2,063,214,000.
- ❖ According to the 2016-2017 review of the 2016 Ag Statistics by CDFA, Imperial County was the sole producer of sugar beets; #1 producer of alfalfa hay, onions, wheat, sweet corn, alfalfa seed, and Sudan hay; and among the top five producers of cattle and calves, lettuce, broccoli, carrots, celery, cauliflower, spinach, potatoes, cantaloupes, watermelon, sheep and lambs, salad greens, grapefruit, dates and honeydew melons.
- ❖ In 2016, California remained the leading state in cash farm receipts with the leading crops being fruits, nuts and vegetables.

Livestock

Item	Year	Production			Unit	Value	Gross Value
		Head	Unit Gain	Total Gain		Per Unit	
Cattle (Feedlot)	2017	344,937	10.05	3,467,192	Cwt	\$111.67	\$387,170,000
	2016	337,286	10.06	3,394,630	Cwt	\$118.01	\$400,614,000
Sheep (Feeders)	2017	60,000	0.53	31,620	Cwt	\$136.05	\$4,302,000
	2016	62,000	0.54	33,700	Cwt	\$136.11	\$4,587,000
Sheep (Wool)	2017	60,000	4.60	276,000	Lbs.	\$1.26	\$347,000
	2016	62,000	6.60	409,200	Lbs.	\$1.50	\$614,000
Aquatic Products (Fish & Algae)	2017						\$10,494,000
	2016						\$12,298,000
Misc. Livestock	2017						\$50,395,000
	2016						\$50,063,000
Total 2017						Value	\$452,708,000
Total 2016						Value	\$468,176,000
Misc. Livestock may include: Calves, Replacement Cattle, Dairy Animals, Milk, Manure/Compost, California Mid-Winter Fair & Fiesta Show Animals. Cwt = 100 Pounds

California and the Global Market Place

According to the 2016-2017 California Agricultural Statistics Review^{1/}, California leads the country as the largest agricultural producer and exporter.

- ❖ California exported approximately 26% of its agricultural production by volume. This translates to \$20.04 billion in value.
- ❖ California is the sole exporter of many agricultural commodities supplying 99% or more of the following:

- ♦ almonds
- ♦ artichokes
- ♦ dates
- ♦ dried plums
- ♦ figs
- ♦ garlic
- ♦ kiwifruit
- ♦ olives and olive oil
- ♦ pistachios
- ♦ raisins
- ♦ table grapes
- ♦ walnuts

Sustainable Agriculture

Pest Detection & Eradication

This division is mandated to monitor agricultural and urban areas for harmful exotic pests in order to protect the local agricultural industry environment, the public and urban landscaping. This is largely accomplished through trapping, visual surveys, and the inspection of incoming nursery stock. This division also provides field inspection services for seed exporters where inspection of the mother plant is required and provides pest identification services.

Pest Detection Trapping

Target Pest	Pest Detection Method	Number of Traps	Annual Trap Services	Host Crops
European Corn Borer	Pheromone	12	108	Corn & Sorghum
Various Exotic Fruit Flies	Feeding Attractant	110	1,100	Fruit Trees & Vegetables
Glassy-winged Sharpshooter	Yellow Sticky Trap	486	7,660	Crops & Ornamentals
Gypsy Moth	Pheromone	60	419	Shade Trees
Japanese Beetle	Pheromone	60	416	Turf & Flowers
Khapra Beetle	Feeding Attractant/Pheromone	36	426	Stored Food Products
Mediterranean Fruit Fly	Pheromone	121	4,496	Fruit Trees
Melon Fruit Fly	Pheromone	121	4,493	Vegetables
Mexican Fruit Fly	Feeding Attractant	121	4,500	Fruit Trees
Oriental Fruit Fly	Pheromone	121	4,494	Fruit Trees

Pest Detection Survey

Target Pest/Survey Sites	Area Surveyed	Inspections & Finds	Actions
Asian Citrus Psyllid/Huanglongbing	Residential citrus trees within 2 miles of the international border	700 sites surveyed: 1060 plant samples, 12 insect samples	No action needed
Glassy-winged Sharpshooter	Retail nursery stock shipments	1,277 Inspections; No finds 22 Rejections not due to finds	No action needed Return to origin
	Bulk citrus fruit	136 Inspections; No finds	No action needed
Karnal Bunt/Wheat	10 Fields	No Finds	No action needed
Noxious Weeds/Ag & Urban	772.5 Total Miles	18 Total positive sites:	
Puncture Vine, C-rated		18 Positive sites	10 Sites mechanical removal
Pathogens of concern for seed export	Seed fields	471 Fields surveyed (by request only)	236 Target pests of concern (listed on certificate)
Red Imported Fire Ant	17 High risk sites	No finds	No action needed

Sustainable Agriculture

Pest Exclusion & Quarantine

This division is mandated to exclude exotic agricultural, urban, and environmental pests and to prevent movement of newly discovered pests within the state. This is accomplished through inspection of incoming agricultural products and enforcement of quarantines that prohibit or restrict the movement of plants, seeds and other items capable of harboring harmful pests. In addition, certificates of quarantine compliance and phytosanitary certificates are issued for commodities originating here, in order to assist growers in moving their products to other counties, states or countries.

Plant Quarantine

Pest Exclusion Inspection ~ Shipments Entering Imperial County

Type of Inspection	Inspections	Pounds	Origin
Field & Vegetable Seed	943	16,738,128	Arizona, Idaho, Montana, Ohio, Washington
Plants	186	-	Arizona, Canada, Florida, Michigan, Mississippi, North Carolina, Oregon, Pennsylvania, Texas, Virginia
	115	-	California
Bees	3	-	Arizona, Montana

Nursery & Seed Inspection

The goal of the nursery inspection program is to prevent the introduction and spread of agricultural pests through nursery stock and to protect agriculture and the consumer against economic losses resulting from the sale of inferior, defective, or pest-infested nursery stock. The seed law enforcement program protects seed consumers by regulation of the marketing of seed, inspection of seed grown or sold locally, verification of purity and germination, investigation of seed complaints, and prevention of the spread of noxious weed seeds through seed products. Also included in this program is the California Certified Seed Program in which superior varieties of seed are grown, processed and distributed under close supervision.

Nursery Inspections

Type of Inspection	Locations	Production Areas	Nursery Stock Type
Production Nursery	24	896	Ornamental trees and shrubs, palms, succulents, cut flowers, vegetable transplants
Retail Nursery	1	-	Fruit trees and shrubs, succulents and cacti, annual and cut flowers

California Crop Improvement Association Inspections & Certification

Type of Inspection	Inspections
Harvest Equipment	73

Seed Transfer Certification	Inspections
In-state	19
Out of state	64

Organic Grower Program

The Organic Program is responsible for enforcement of the federal Organic Foods Production Act of 1990 and the California Organic Products Act of 2003. These statutes protect consumers, producers, handlers, processors and retailers by monitoring and inspecting fresh commodities grown, labeled or sold as organic.

Year	Growers	Acres
2017	55	45,216
2016	48	33,505
2015	36	31,935
2014	28	25,156
2013	26	19,433
