1985

Mr. Clare Berryhill, Director  
Calif. Dept. of Food & Agriculture

- and -

The Honorable Board of Supervisors  
County of Kern

I am pleased to submit this 1985 Agricultural Crop Report, which was compiled in accordance with Section 2279 of the California Food and Agricultural Code.

\$1,218,983,200 is less than 2% increase over 1984 income and is about 4% under 1980 figures.

Major crops recording substantial decrease in value were Pistachios (42.9%), Almonds (36.8%), Onions (29%), Potatoes (16.1%), Cattle/Calves (14.5%) and Cotton (10.5%).

Major crops recording substantial increase in value were Apples (67.8%), Garlic (56%), Peaches (47.3%), Citrus (44.8%), Plums (32.6%), Carrots (32.2%), Lettuce (21.4%), Grapes, (16%), Milk (14.6%), Nursery (11.7%) and Wheat (6.9%).

In the "Top Twenty Crops" ranking, Citrus moved up from 5th rank to 3rd. Sugar Beets and Silage/Forage were replaced by Garlic and Olives.

The great increase in Apple value resulted from new acreage coming into production and increased price. The great decrease in Pistachios was caused by reduction of total production.

My sincere thanks to the individuals and firms whose cooperation made this report possible; and to Deputy Commissioner Charles Bennett and Agricultural Biologist III Sharon Wilbur, who compiled the report.

Respectfully submitted,

Robert A. Edwards  
Agricultural Commissioner

AGRICULTURAL COUNCIL OF THE

*Kern County Chamber of Commerce*

The Kern County Agricultural Building was dedicated on November 4, 1938, by the Honorable Frank F. Merriam, Governor of California. The Spanish style building was designed by architect, Stan Willard and built as a W.P.A. project. The Agricultural Commissioner's Administrative building had a floor space of 1764 square feet. The "L" shaped building, which also contained the Agricultural Extension Service, was constructed of adobe and Spanish tile. It was located on approximately ten acres at the corner of 26th and "M" Streets until its removal in 1986. The Commissioners who served during its 48 year history were: Lewis A. Burtch, Charles W. Grimm, C. Seldon Morley, James W. Stockton and the current Commissioner, Robert A. Edwards.

1986

Mr. Clare Berryhill, Director  
Calif. Dept. of Food & Agriculture

- and -

The Honorable Board of Supervisors  
County of Kern

I am pleased to submit this 1986 Agricultural Crop Report, which was compiled in accordance with Section 2279 of the California Food and Agricultural Code.

A 12.4% increase in total value over the previous year is an indicator that agriculture is starting to work out of a financial slump. This is the highest value ever attained by Kern County, but I must emphasize that these are **gross** receipts of the producers and **do not** take into account the various costs of production, marketing or transportation. **No attempt is made to reflect net income of the producer.**

The most noteworthy change is that cotton, which has long been the leading income producer, has slipped to second place and was replaced by grapes. A combination of less acreage and less per acre production of cotton and increased prices and producing acreage of grapes resulted in this switch.

The most significant percent increase was 72% for plums, which resulted from a combination of more producing acreage, more production per acre and increased prices.

Pistachios, an alternate year heavy bearing crop, was on an "up" year which resulted in a 62% increase in value of the crop.

The production of almonds was down because of poor weather conditions; but the price went up considerably, resulting in a 61% increase.

Value of apples increased 51% and was due to increased prices and Granny Smith acreage coming into production.

The largest decrease of 26% was in cattle, and this was mainly the result of the Government Dairy Buy-Out Program.

My sincere thanks to the individuals and firms whose cooperation made this report possible; and to Agricultural Biologist III, Sharon Wilbur, who compiled the report.

Respectfully submitted,

Robert A. Edwards  
Agricultural Commissioner

1987

Mr. Jack Parnell, Director  
Calif. Dept. of Food & Agriculture

- and -

The Honorable Board of Supervisors  
County of Kern

I am pleased to submit this 1987 Agricultural Crop Report, which was compiled in accordance with Section 2279 of the California Food and Agricultural Code.

Using revised figures of 1986 production, the comparison with 1987 indicates a 1% increase in value.

1987 was a year with several extreme variations in crop value. Crops with large increases were Lettuce 55%, Cotton 42%, Onions 35%, and Cattle & Calves 31%. Crops with large decreases were Pistachios 53%, Garlic 23%, Apples 19%, Potatoes 17%, Grapes & Almonds 13%.

Cotton, with increases in acreage, production and price, once more took over as the top income producing crop. Grapes once more took second place after a one year reign as top producer.

I must again emphasize that these are GROSS receipts of producers and DO NOT take into account the various costs of production, marketing or transportation. NO ATTEMPT IS MADE TO REFLECT NET INCOME OF THE PRODUCER.

My sincere thanks to the individuals whose cooperation made this report possible; and especially to Agricultural Biologist III, Sharon Wilbur, who compiled the report.

Respectfully submitted,

Robert A. Edwards  
Agricultural Commissioner

1988

Mr. Jack Parnell, Director  
Calif. Dept. of Food & Agriculture

- and -

The Honorable Board of Supervisors  
County of Kern

I am pleased to submit this 1988 Agricultural Crop Report, which was compiled in accordance with Section 2279 of the California Food & Agriculture Code.

Cotton remained the number one producer even though suffering a 13% decrease in value caused by lower production and price.

Grapes increased by 23%, falling about 5 million short of the cotton value.

The largest increase was 63-1/2% recorded for Apple production. Prices were up and production increased significantly because of recent plantings of Granny Smith variety coming into production.

Other crops bringing increases of more than 50% were: 1) Melons (other); 2) Pistachios; 3) Plums and 4) Sugar Beets.

Other crops showing largest losses were citrus, lettuce, potatoes and onions.

While the total value was \$1,511,805,000 an 8.7% increase over 1987, it is important to realize that these are GROSS receipts of producers and DO NOT take into account the various costs of production, marketing or transportation. NO ATTEMPT IS MADE TO REFLECT NET INCOME OF THE PRODUCER.

My sincere thanks to the individuals whose cooperation made this report possible; and especially to Agricultural Biologist III, Sharon Wilbur, who compiled the report.

Respectfully submitted,

Robert A. Edwards  
Agricultural Commissioner

RAE:sc

RED GLOBE

The Red Globe is an attractive new seeded table grape variety. It was introduced by Dr. H. P. Olmo of the University of California in 1980, the same year he brought out Christmas Rose. Each of these varieties was developed from the Emperor grape.

In spite of the fact that consumers are known to prefer seedless varieties, Red Globe was brought out to anticipate the season for red grapes. It matures before the Emperor and holds well in cold storage conditions. An extremely popular export variety, half the crop is shipped to the Far East where the large berries are highly prized.

Like the Emperor, the Red Globe vines thrive in the soil and climate of California's central grape growing region. These vines are highly productive but require a certain amount of special care. The thin skin so valued by consumers must be protected from direct afternoon sun by a wide cover of leafy vines. The bunches are heavy with fruit and may need support. The result is worth the care needed. Red Globe is a highly unusual grape, sure to find favor with those who delight in a mild sweet taste.

KERN COUNTY AGRICULTURAL COMMISSIONER  
1001 SOUTH MT. VERNON AVENUE  
BAKERSFIELD, CA 93307

TO:

THEODORE K. DAVIS  
Agricultural Commissioner

Assistant Commissioner

DEPARTMENT OF AGRICULTURE

1001 South Mt. Vernon Ave.  
Bakersfield - 93307  
Telephone (805) 861-2306

1989

Mr. Henry Voss, Director  
Calif. Dept. of Food & Agriculture

- and -

The Honorable Board of Supervisors  
County of Kern

I am pleased to submit the 1989 Agricultural Crop Report, which was compiled in accordance with Section 2279 of the California Food and Agriculture Code.

Grapes have once again gained prominence as the number one crop out producing cotton.

Each of the top ten crops reflect an increase over the previous year with potatoes and onions showing a 42.5 and 39.0 percent increase, respectively.

Apples suffered a 40.1% decrease over their tremendous gains in 1988, primarily due to a down turn in production. Pistachios demonstrated a 64.1% decrease due to this being the alternate producing year.

Other crops showing losses were sugar beets and plums.

The 1989 total value of \$1,606,925,000 was a 6.1% increase over 1988. This however, represents a **GROSS** receipt of producers and **DOES NOT** take into account the various costs of production, marketing, and transportation. **NO ATTEMPT IS MADE TO REFLECT NET INCOME OF THE PRODUCER.**

Respectfully submitted,

Theodore K. Davis  
Agricultural Commissioner

## PLEASE NOTE!

If you wish to remain on mailing list, you **MUST** notify this office.

The 1989 Agricultural Crop Report is dedicated to Robert A. Edwards. The Department's respect and admiration must go to Bob, who retired as Agricultural Commissioner after 36 years with the Kern County Agricultural Commissioner's Office on March 23, 1990. Without his devotion to duty and leadership, this Department would not be poised to accept the challenges ahead.
