The Los Angeles Wholesale Produce Market

Los Angeles County

Agricultural Commissioner/
Weights and Measures Department

Year 2000

Crop and Livestock Report

In the late 1800's, the wholesale distribution of fruits and vegetables in Los Angeles County had its beginning in downtown Los Angeles at the old plaza located near Olvera Street. Local farmers would bring in their produce daily by horse and wagon and offer it for sale. Customers strolled among the horses and wagons purchasing fruits and vegetables. For years the market place flourished. It was the place where everyone in the County came to buy fresh produce. Over time, as the population of the County of Los Angeles expanded and a greater percentage of products came from points outside the immediate Los Angeles area, the inadequacy of maintaining a market away from railroad facilities became apparent. Around 1901, the city leased some property at Third Street and Central Avenue to alleviate the problem. However, the distributors decided that their needs would be better served by a privately owned company. In 1903, they formed the **Los Angeles Market Company**, took over the city lease and constructed sheds on the site to house the operations of the distributors. In 1909, Southern Pacific Railroad, wanting to expand its rail terminal facilities, exchanged property located at Sixth and Alameda Streets for the Third Street site and the produce market moved to the new location in 1909. However, not all of the distributors moved to the new quarters. A new market, known as the **City Market Company of Los Angeles**, was incorporated in April of 1909. This market, one of the oldest in the County of Los Angeles, encompasses ten acres and is located on San Pedro Street between Ninth and Twelfth Streets.

In 1918, the **Los Angeles Market Company** constructed elaborate marketing facilities on a site located at Seventh Street and Central Avenue. The following year the market had financial difficulty and was acquired by the Los Angeles Union Terminal Company, a subsidiary of Southern Pacific Railroad. The Railroad Company moved the market from the Sixth and Alameda Street location to the Seventh Street and Central Avenue location.

The Plaza

Commonly known as the Seventh Street Market, the produce section covers 12 acres, has railroad facilities, and is now called the Terminal Market. In 1986, construction was completed on a new facility, the Los Angeles Wholesale Produce Market. Located on Olympic Boulevard and between Central Street and Alameda Avenue. The market encompasses 30 acres and is separated from the Terminal Market by Eight Street.

Today, Los Angeles County has two wholesale produce markets and a total of **740** licensed wholesalers and brokers to handle the volume. Although a large volume of California's fruits and vegetables are shipped directly to the Los Angeles metropolitan area from farmers throughout the State, approximately 60% transits through the Los Angeles wholesale produce markets. The Los Angeles wholesale produce markets easily rank first in the nation on quality and variety of products. Each year more than 95,000 carload equivalents of produce are handled which include more than 80 different fruit and vegetable commodities and numerous varieties of each. The Los Angeles wholesale produce markets play a key role in distributing California's agricultural products along with fresh fruits and vegetables from over 32 states and 20 foreign countries.

2000 CROP AND LIVESTOCK REPORT

The gross value of agricultural crops and products in Los Angeles County increased 8% in 2000 to **\$268,200,000**. This is the 7th time in 8 years that agricultural production has increased after several years of declines. As in the last few years, the increase is driven for the most part by the continuing expansion of food production in the Antelope Valley. Acreage in the categories, Vegetables, and Fruit and Nuts, increased significantly, 28% and 15% respectively. Values increasing over 30%. Also contributing was the inclusion, for the first time since 1994, of figures for Livestock and Poultry, with a value of \$1,770,000.

Ornamental nursery production continues to be our leading crop, but despite a strong market, value is down 6%, based on a decrease in acreage and green house space of approximately 10%. Causes for this decline include consolidations in the industry, the growth of large chain store nurseries, and the high cost of land in Los Angeles County. The presence of the Glassy Winged Sharpshooter could also be a factor.

In spite of being one of the largest metropolitan areas in the country, Los Angeles County produces 25 different crops, of which 16 are on the Million Dollar list: ornamental trees and shrubs, bedding plants, root vegetables, dry onions, peaches, alfalfa hay, foliage indoor plants, herbs, dairy products, ground covers, strawberries, flowering indoor plants, poultry, rangeland, vine crops and table greens.

Finally, I want to express my sincere appreciation to all the producers and individuals who provided information for this report, particularly the compilers, Richard Sokulsky, Deputy Agricultural Commissioner and Julia Chen, Staff Assistant.

Respectfully submitted,

Cato R. Fiksdal
Agricultural Commissioner/
Director of Weights and Measures

This annual publication presents statistical information on acreage, yield and gross value of agricultural products produced in Los Angeles County. This is in accordance with Sections 2279 and 2279 of the California Food and Agricultural Code. The production values in this report represent gross values and do not reflect the cost of production, net income or loss to producers.

Million Dollar Commodities

1.	Ornamental Trees and Shrubs	\$ 123,563,000
2.	Bedding Plants	32,002,000
3.	Root Vegetables	28,011,000
4.	Dry Onions	20,050,000
5.	Peaches	20,009,000
6.	Alfalfa Hay	6,081,000
7.	Indoor Plants, Foliage	4,594,000
8.	Herbs	3,770,000
9.	Dairy Products	2,445,000

This report was made possible only through the cooperation of all the nursery owners, growers, governmental and private agencies, and others who provided the information necessary for its products.

A special acknowledgment and thank you to staff members: Richard G. Sokulsky, Deputy Commissioner, for overseeing the compilation of the report; Julia Chen for collecting, compiling, and computerizing the statistics and designing the report layout; Cindy Werner for collecting the historical information and photographs; and other staff members for their input. A special thank you to the following agencies for contributing the historical photographs:

Agricultural Crop Report

FRESH PRODUCE
FARMERS MARKET
TODAY 9:AM-1:PM

Certified Farmers' Markets

Farmers have always had the need to sell their produce to the people. In the "olden" days, a farmer would set up a stand outside the farm, haul his produce to a market location, or join a cooperative of other farmers and set up a store to sell their produce. The photograph shows a 1930's produce stand; the Horticultural Inspector is in the foreground. As the years went by, farmers would sell their commodities through produce brokers who would then sell the produce to local and foreign markets. The interfacing between the farmer and the consumer was lost.

In 1977, the California Legislature declared that direct marketing of agricultural products benefits the agricultural community and the consumers by, among other things, providing an alternative method for growers to sell their products while benefitting the consumer by supplying quality produce at reasonable prices. In 1978, Governor Jerry Brown signed the Direct Marketing Act which

authorized the establishment of Certified Farmers' Markets (CFM) in California. The first Certified Farmers' Market in Los Angeles County was established in 1979 in the city of Gardena. It operated on Saturday mornings and started with just four farmers who were referred to as certified producers. The photograph on the left shows the Santa Monica Certified Farmers' Market during the 1980's. The photograph on the right shows an overview of one block of the Santa Monica Market today; it is the largest venue in the state spread out over three city blocks. There are now three markets operating in Santa Monica with more than 130 certified producers attending each week.

Certified Farmers' Markets have blossomed in the state and especially here in Los Angeles County.

There are now 80 markets throughout Los Angeles County and 400 markets across the State. Each location must be approved by the County Agricultural Commissioner's office and has a market manager supervising the site.

The county Agricultural Inspector must visit each growing site to verify what specific commodities are produced. The certification allows the farmer to sell his products at any Certified Farmers' Market within California. Participants offer for sale those agricultural products they produce themselves, including specialty crops not normally found at retail stores. The Certified Farmers' Markets provide an opportunity for the public to interact directly with the producers. This is the uniqueness, value and importance of these markets. The photograph on the left shows a vendor displaying the certified producer's certificate.

The California Legislature's decision in 1977 recognized the importance of the direct marketing concept for both farmer and consumer. The results are obvious; just ask the 3,500 farmers who participate as certified producers or the tens of thousands of loyal customers who support their local Certified Farmers' Markets.

2002 CROP AND LIVESTOCK REPORT

Overall another growth year for Los Angeles County Agriculture

The total gross value of agricultural crops and products produced in Los Angeles County increased 6.7% in 2002 to a value of **\$275,969,000**. Rebounding from last year, vegetable crop acreage increased overall by 28.3% and commodities such as root vegetables, table greens, vine crops and herbs increased in value between 37% and 54%. Production yields of dry onions were slightly lower than the previous year; however, higher market prices caused total value to increase by 9.6%.

Los Angeles County's number one crop, ornamental nursery products, experienced a modest increase of 3% over last year. Although limited, greenhouse space and field acreage for indoor foliage plants increased by 44% and value by 178%. Growing areas and total values declined for ground cover while production of bedding plants increased only to see a reduction in value.

However, even with an overall increase for the year, it was still a tough year for many of the County's growers. Market prices for peaches were higher but production and acreage dropped to half of the previous year's amount. Total fruit and nut crop acreage declined by 28% and value by 21%.

This year's crop report salutes the certified farmers and the 80 Certified Farmers' Markets in Los Angeles, where our residents can purchase hundreds of varieties of products directly from the growers. We express our sincere appreciation to all the individuals who provided information for this report; without their support, this report would not be possible.

Respectfully submitted,

Cato R. Fiksdal
Agricultural Commissioner/Director of Weights and Measures

Los Angeles County Certified Producers

The faces of the growers are as diverse as the commodities that they bring each week to the Markets of California. Anyone can participate in the program, provided they are certified by the Agricultural Commissioner/Weights and Measures Department and offer for sale only those agricultural products they grow themselves. Los Angeles County has more than 130 certified producers; 10 percent are from the Antelope Valley and the remainder are located throughout Los Angeles County.

The Antelope Valley growers sell a variety of stone fruits, apples, pears and even hot peppers. Large growers, like

Scattaglia Family Farms or Tenerelli Orchards, sell most of their produce commercially and a portion of the produce is sold at the local Certified Farmers' Markets, usually at a higher market value price. The top right photograph shows John Tenerelli selling peaches during the Farmers' Market Week Event held at the Hall of Administration. The left photograph shows Scattaglia Family Farms at the small

Certified Farmers' Market located in Hollywood. Other smaller producers like Circle C Ranch, choose to only sell their produce locally.

The Blains own Circle C Ranch, a certified farm in a beautiful canyon in Pine Valley, located at the west end of the Antelope Valley. The photograph on the right shows Chang Ja Blain selling cherry branches at the Santa Monica Certified Farmers' Market. Chang Ja immigrated from Korea in 1959. She and her husband bought 40 acres in 1972.

She started as a hobbyist with just five fruit trees. As her interest grew, so did the number of trees that were planted and the time spent to maintain the property. After 30 years, the Blains have amassed a virtual edible botanical garden overflowing with fruits and flowers. They provide the majority of the care and harvesting of the fruit themselves.

Chang Ja says she has more energy at 73 than most 30 year old adults. She and her husband offer for sale more than 200 different commodities including 18 varieties of grapes, 30 varieties of cherries, 20 varieties of peaches and 14 varieties of plums as well as quince, figs, persimmons, apricots and mulberries. They normally sell at the Santa Monica

and Hollywood Certified Farmers' Market, providing lilacs and peonies in the spring, stone fruit in the summer, persimmons and figs in the fall, and pine boughs, cones and other festive greens to use during the Holiday Season.

Chang Ja proudly showed off her efforts by escorting Inspectors Cindy Werner, Gary Mork and Staff Assistant Julia Chen through the orchard. The photo on the left shows Chang Ja and Julia picking apples. The photo on the right shows a large mulberry tree, wrapped in netting to prevent bird damage to the crop.

For a list of Certified Farmers' Markets, visit our web site at:
<http://acwm.co.la.ca.us>

Cover photo: The plums on the cover are French plums, one of the many unique varieties grown at the Circle C Ranch.

Pest Eradication Activities

<u>Pest</u>	<u>Method</u>	<u>Scope of Program</u>
Oriental Fruit Fly	Male annihilation treatments	3 treatment areas
Mediterranean Fruit Fly	Continued preventative program: sterile Medfly release countywide	Approximately 13.4 billion steriles released
Mexican Fruit Fly	Ground based bait treatment to foliage, release of sterile Mexican Fruit Flies	444 properties treated Flies released in 28 sq. miles
Guava Fruit Fly <i>Bactrocera correcta</i>	Male annihilation treatments	2 treatment areas
Red Imported Fire Ant	Bait treatments Under post treatment monitoring RIFA eradications	289 properties 286 properties 2 properties

This produce is covered with netting because the South Pasadena Certified Farmers' Market was located within the Mexican Fruit Fly Quarantine Area. The citrus and apples are host fruits for the Mexican Fruit Fly. The nets are placed over the produce to prevent possible exposure to wild flies that could lay their eggs in the fruit, thus spreading the insect outside of the quarantine area.

Acknowledgments

A special word of thanks to our photographers, Inspector Cynthia Werner and Erika Fiksdal, Commissioner Fiksdal's daughter, who contributed the photos for this report. More than twenty Certified Farmers' Markets were visited in order to capture the bounty of California's produce and the hustle and bustle of the direct marketing program. Thanks to all of the market managers, growers, vendors and customers who provided a multitude of smiles for this year's report. Thanks to Inspectors Christine Belden, Gashaw Deres, Miguel Gonzalez, Adán Herrera, Miguel Luna, Gary Mork, Mike Sium and clerical staff who assisted in gathering and compiling the statistics. Thanks to Richard G. Sokulsky, Deputy Agricultural Commissioner/Sealer for supervising this year's edition.

We want to especially thank Julia Chen, Staff Assistant for the Environmental Protection Bureau. She has compiled the Crop Report for the last fourteen years; providing accurate statistics, an attractive layout and an eye-catching cover. She will now be working with the Management and Technical Services Division which provides computer support for the entire Department.

"Be Californian. Buy California Grown"

Be Californian Buy California Grown™

The Certified Farmers' Markets epitomize the California Department of Food and Agriculture's Buy California Initiative. The campaign was created by the California legislature to "to emphasize California's strong ties to the land and to our neighbors; to restore pride in our homegrown products and our work; and to help our economy and our Californian way of life." The "Buy California Grown" logo can be seen at grocery stores that sell California grown produce. The Certified Farmers' Markets play an important part in this campaign since they only sell products grown in California by certified producers. For more information, see www.californiagrown.org.

The Southland Farmers' Market Association, established in 1983, helps to promote and support existing Certified Farmers' Markets. The association has grown to represent 22 markets and more than 400 certified producers in Southern California. The California Department of Food and Agriculture awarded the Association a grant of \$100,000 to assist Los Angeles County Certified Farmers' Markets

with innovative promotional and marketing campaigns. The grant was awarded through the Buy California Initiative, which includes a \$7 million dollar competitive grants program to aid specialty crop growers. For more information, see www.sfma.net.

Each year the Agricultural Commissioner/Weights and Measures Department organizes a market at the County Hall of Administration to coincide with the National Certified Farmers' Market Week celebrated during the first week of August. Several local certified producers are invited to come and sell their products to the County employees. The Department also sets up a display and Inspectors are on hand to answer questions about the direct marketing program. The 3rd annual event is scheduled for August 5, 2003.

In 2002, Laura Avery, Santa Monica Market Supervisor, received a certificate of recognition from the Board of Supervisors for her involvement and support of the Direct Marketing Program in Los Angeles County. She was recently appointed as the President of the Southland Farmers' Market Association.

Paul Dufourd, *Deputy Director, Pest Exclusion/Plant Quarantine*

Cynthia Ojeda, *La Cienega CFM Manager*

Acknowledgements

A special word of thanks to all that assisted in creating this edition of the crop report. Inspector Cynthia Werner for her photographs and cover design. Inspectors Adan Herrera, Adrian Zavala, Michael Sium, Miguel Gonzalez, Miguel Luna, and Gary Mork who assisted in gathering and compiling the statistics. Administrative Assistant Mimi Chan who generated the completed statistical reports and layout. Mauricio Lucero and Elizabeth Lopez for their technical support. Thanks to Richard G. Sokulsky, Deputy Agricultural Commissioner/Sealer for supervising this year's report.

2004 CROP AND LIVESTOCK REPORT

In 2004, a total gross value of **\$300,087,000** in agricultural crops and commodities were produced in Los Angeles County. This is a 5.5% decrease from last year's \$317,590,000 total. Production values of dry onions and alfalfa hay increased by 25% and 20%, respectively, driven by stronger market values and slight increases in acreage. Counteracting these gains were large decreases in strawberry and herb production resulting from losses of growing grounds diverted to development. Similarly, root vegetable production values decreased 42% and vine crops by 28%.

Los Angeles County's leading crop continues to be nursery products. Overall, nursery stock production values rose by more than 6 %, attributable, in part, to increases in greenhouse space and acreage for indoor flowering and foliage plants, ground covers, bedding plants, and other miscellaneous products. Producers of ornamental trees and shrubs, however, were affected by product distribution restrictions to alleviate risks of spreading Sudden Oak Death, providing protection to the environment and California's agricultural industry from this serious pathogen.

I wish to express my sincere appreciation to each of the producers and individuals who provided information for this report. My thanks are extended to the skilled and dedicated staff of this department who continue to do an excellent job in compiling these important statistics.

Respectfully submitted,

Kurt E. Floren
Agricultural Commissioner/
Director of Weights and Measures

This annual publication presents statistical information on acreage, yield, and gross value of agricultural products produced in Los Angeles County. This is published in accordance with Sections 2272 and 2279 of the California Food and Agricultural Code. The production values in this report represent gross values and do not reflect the cost of production, net income, or loss to producers.

PEST EXCLUSION ACTIVITIES

<u>Pest Intercepted</u> Common Name/ <i>Genus Species</i>	<u>Material</u>	<u>Source *</u>	<u>Scope of Program</u> Pest Interceptions
Ambrosia beetle <i>Xylosandrus crassiusculus</i>	Cut foliage	Quar	2
Ant <i>Ochetellus glaber</i>	Cut foliage	Quar	7
Ant <i>Monomorium floricola</i>	Cut foliage	Quar	1
Armored scale <i>Acutaspis sp.</i>	Bay leaves	Quar	1
Bamboo armored scale <i>Poliaspoides formosanus</i>	Bamboo	Nurs	1
Big headed ant <i>Pheidole megacephala</i>	Cut foliage	Quar	54
Black stink bug <i>Coptosoma xanthogramma</i>	Basil	Quar	1
Boxwood scale <i>Pinnaspis buxi</i>	Cut foliage	Quar	10
Chinese rose beetle <i>Adoretus sinicus</i>	Cut foliage	Quar	4
Coconut mealybug <i>Nipaecoccus sp.</i>	Palms	Nurs	2
Coconut scale <i>Aspidiotus destructor</i>	Cut foliage	Quar	4
Coffee bean weevil <i>Araecerus coffeae</i>	Basil	Quar	1
Dunnage beetle <i>Sinoxylon anale</i>	Wooden pallets	Quar	1
Glassy-winged leafhopper <i>Homalodisca coagulata</i> (adults)	Nursery plants	Nurs	84
Glassy-winged leafhopper <i>Homalodisca coagulata</i> (eggs)	Nursery plants	Nurs	434
Green garden looper <i>Chrysodeixis eriosoma</i>	Cut foliage	Quar	30

PEST EXCLUSION ACTIVITIES

<u>Pest Intercepted</u> Common Name/Genus Species	<u>Material</u>	<u>Source *</u>	<u>Scope of Program</u> Pest Interceptions
Green shield scale <i>Pulvinaria psidii</i>	Ficus	Nurs/Quar	3
Hopper <i>Protalembrella brasiliensis</i>	Cut foliage	Quar	3
Leafhopper <i>Agallia sp.</i>	Cut foliage	Quar	103
Leafhopper <i>Gyponana germari</i>	Cut foliage	Quar	8
Leafhopper <i>Empoasca sp.</i>	Cut foliage	Quar	6
Lesser snow scale <i>Pinnaspis strachani</i>	Cut foliage	Quar	11
Limacodid moth <i>Darna pallivitta</i>	Palm	Quar	1
Long horned beetle <i>Sybra alternans</i>	Cut foliage	Quar	5
Long-legged ant <i>Anoplolepis gracilipes</i>	Cut foliage	Quar	1
Lygaeid bug <i>Nysius sp.</i>	Cut leaves	Quar	53
Magnolia white scale <i>Pseudaulacaspis cockerelli</i>	Cut foliage/palms	Quar	61
Mango shield scale <i>Milviscutulus magniferae</i>	Cut flowers	Quar	13
Mint aphid <i>Ovatus mentharius</i>	Mint	Quar	1
Orchid weevil <i>Orchidophilus alterrimus</i>	Cut foliage	Quar	3
Pacific beetle cockroach <i>Diploptera punctata</i>	Cut foliage	Quar	2
Pandanas scale <i>Thysanococcus pandani</i>	Pandanus	Quar	1

PEST EXCLUSION ACTIVITIES

<u>Pest Intercepted</u> Common Name/ <i>Genus Species</i>	<u>Material</u>	<u>Source *</u>	<u>Scope of Program</u> Pest Interceptions
Pickle worm <i>Diaphania nitidalis</i>	Cucumbers	Quar	4
Planthopper <i>Kallitaxila granulata</i>	Cut foliage	Quar	23
Planthopper <i>Melormenis antillarum</i>	Basil	Quar	1
Psyllid <i>Heteropsylla huasachae</i>	Cut foliage	Quar	2
Purple scale <i>Lepidosaphes beckii</i>	Grapefruit/Tangerine	Quar	4
Pyriform scale <i>Protospulvinaria pyriformis</i>	Nursery plants	Nurs	4
Red Imported Fire Ant <i>Solenopsis invicta</i>	Cut flowers	Quar	1
Red wax scale <i>Ceroplastes rubens</i>	Cut foliage	Quar	4
Redbanded thrips <i>Selenothrips rubrocinctus</i>	Cut foliage	Quar	1
Scolytid beetle <i>Xyleborus affinis</i>	Cut leaves	Quar	1
Scolytid beetle <i>Euwallacea fornicatus</i>	Box elder	Nurs	1
Slant-faced grasshopper <i>Atractomorpha sinensis</i>	Basil	Quar	2
Slug <i>Veronicella sp.</i>	Cut foliage	Quar	17
Slug <i>Meghimatium striatum</i>	Dracaena	Quar	1
Snail <i>Opeas sp. or near</i>	Coriander	Quar	1
Snail <i>Zachrysis provisoria</i>	Palm	Quar	1

PEST EXCLUSION ACTIVITIES

<u>Pest Intercepted</u> Common Name/ <i>Genus Species</i>	<u>Material</u>	<u>Source *</u>	<u>Scope of Program</u> Pest Interceptions
Snail <i>Bradybaena similaris</i>	Cut foliage	Quar	13
Soil mealybug <i>Rhizoecus hibisci</i>	Palms	Quar	11
Soil mealybug <i>Geococcus coffeae</i>	Palm	Quar	1
Spiraling whitefly <i>Aleurodicus dispersus</i>	Cut foliage	Quar	47
Stellate scale <i>Vinsonia stellifera</i>	Cut flowers	Quar	14
Taro leafhopper <i>Tarophagus colocasiae</i>	Taro	Quar	7
Tropical fire ant <i>Solenopsis geminata</i>	Cut foliage	Quar	4
White footed ant <i>Technomyrmex albipes</i>	Cut foliage	Quar	48
Whitefly <i>Aleurotrachelus sp.</i>	Cut foliage	Quar	36
