Agricultural Crop and Livestock Report

Mariposa County
Department of Agriculture

Karen Ross, Secretary . California Department of Food and Agriculture
and
The Honorable Board of Supervisors of Mariposa County

Lee Stetson, Chair	District I
Merlin Jones	District II
Janet Bibby	District III
Kevin Cann	District IV
John Carrier	District V

Richard J. Benson, Chief Administrative Officer

It is my pleasure to submit the 2012 Agricultural Crop and Livestock Report for Mariposa County.

This annual publication contains statistical information pertaining to acreage, yield, and gross value of Mariposa County agricultural production in accordance with Sections 2272 and 2279 of the California Food and Agricultural Code.

2012 was again a year of positive change for Mariposa County agriculture and set an all-time high for the value of agricultural production. Mariposa County's total estimated value of \$35,422,000, an overall increase of \$ 3.8 million or approximately 12.1% from last year, continues to show the economic importance and the **real** impact that agricultural production has on the local and regional economy. The contribution of agriculture to the economy of Mariposa County is not totally reflected in the values contained in this report. Goods, services, transportation, processing, marketing, employment and other farm-related services significantly multiply these values to benefit the local economy and the surrounding areas.

Cattle and calves continue to be the county's leading farm commodity with a value of \$22,047,000. Rangeland was again second with a value of \$5,754,000. Miscellaneous livestock and poultry products followed with a value of \$3,299,000.

I must stress that these are gross values only, whether marketed or not, and **do not** in any manner reflect net income or loss to the producers. Costs of production and marketing continue to influence net returns. This report does not reflect upon individual operations since **the county** is the smallest unit measured for any particular commodity.

I sincerely appreciate the cooperation and assistance of the many agricultural producers, stakeholders, and public agencies that made this report possible, especially those responding to our questionnaires.

Respectfully Submitted,

Cathi Boze

Cathi Boze
Agricultural Commissioner/Sealer

CALIFORNIA

CIRCA 1850

MARIPOSA was one of the original 27 counties in the State of California on February 18, 1850. It was the greatest in size, occupying more than a fifth of the entire state - its boundaries Los Angeles and San Diego to the south, Tuolumne to the north, Monterey and San Luis Obispo to the west, and the State of Nevada to the east. Since then, the whole or parts of Fresno, Inyo, Kern, Kings, Los Angeles, Madera, Merced, Mono, San Benito, San Bernardino and Tulare Counties have been carved off until only 1,455 square miles remain of the original 30,000 square miles - hence the name "Mother of Counties."

Richard J. Benson, County Administrative Officer

It is my pleasure to submit the 2013 Agricultural Crop and Livestock Report for Mariposa County.

This annual publication contains statistical information pertaining to acreage, yield, and gross value of Mariposa County agricultural production in accordance with Sections 2272 and 2279 of the California Food and Agricultural Code.

Mariposa County agriculture began to show the effects of the state-wide drought in 2013, particularly on the livestock industry. While Mariposa County's total estimated agricultural production was valued at \$33,305,000, there was an overall decrease of over \$1 million or approximately 2.9% from last year. However, the agricultural production value does continue to show the economic importance and the **real** impact that agricultural production has on the local and regional economy. The contribution of agriculture to the economy of Mariposa County is not totally reflected in the values contained in this report. Goods, services, transportation, processing, marketing, employment and other farm-related services significantly multiply these values to benefit the local economy and the surrounding areas.

Cattle and calves continue to be the county's leading agricultural commodity with a value of \$20,489,000, despite a 7.8% decrease in value from 2012 due to the impacts of the drought which resulted in fewer head sold and lighter weights of gain for both the cow-calf and stocker operations. Rangeland was again second with a value of \$5,826,000, despite the loss of rangeland forage production due to drought conditions. Miscellaneous livestock and poultry products followed with a value of \$2,272,000.

I must stress that these are gross values only, whether marketed or not, and **do not** in any manner represent or reflect net income or loss to the producers. Costs of production and marketing continue to influence net returns and profit. This report does not reflect upon individual operations since **the county** is the smallest unit measured for any particular commodity.

I sincerely appreciate the cooperation and assistance of the many agricultural producers, stakeholders, and public agencies that made this report possible, especially those providing data used in the compilation of this report.

Respectfully Submitted,

Cathi Boze
Agricultural Commissioner/Sealer

ORGANIC FARMING STATISTICS:

One organic grower was registered in 2013. Many local certified producers grow fruit and vegetables without the use of chemical pesticides for the Mariposa Certified Farmers Market which operates May through mid-October at the 6th Street parking lot on Stroming Road.

CALIFORNIA

CIRCA 1850

MARIPOSA was one of the original 27 counties in the State of California on February 18, 1850. It was the greatest in size, occupying more than a fifth of the entire state - its boundaries Los Angeles and San Diego to the south, Tuolumne to the north, Monterey and San Luis Obispo to the west, and the State of Nevada to the east. Since then, the whole or parts of Fresno, Inyo, Kern, Kings, Los Angeles, Madera, Merced, Mono, San Benito, San Bernardino and Tulare Counties have been carved off until only 1,455 square miles remain of the original 30,000 square miles - hence the name "Mother of Counties."

Kevin Cann	District IV
John Carrier, Vice-Chair	District V

Mary Hodson, County Administrative Officer

It is my pleasure to submit the 2014 Agricultural Crop and Livestock Report for Mariposa County.

This annual publication contains statistical information pertaining to the acreage, yield, and gross value of Mariposa County agricultural production in accordance with Sections 2272 and 2279 of the California Food and Agricultural Code.

Mariposa County agriculture continued to show the effects of the state-wide drought in 2014, particularly on the livestock industry. Mariposa County's total estimated agricultural production was valued at \$43,247,000, an overall increase of \$10 million or approximately 29.85% from last year. The agricultural production value continues to show the economic importance and the **real** impact that agricultural production has on the local and regional economy. The contribution of agriculture to the economy of Mariposa County is not totally reflected in the values contained in this report. Goods, services, transportation, processing, marketing, employment, and other farm-related services significantly multiply these values to benefit the local economy and the surrounding areas. The fact that the gross value of agriculture continues to increase reflects positively on the importance of our agricultural industry to Mariposa County.

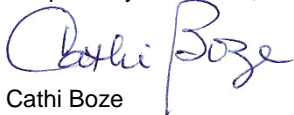

Cattle and calves continue to be the county's leading agricultural commodity with a production value of \$29,430,000, a 43.6% increase in value from 2013 due to the impacts of the drought which resulted in an increase in the number of head sold for both the cow-calf and stocker operations. Rangeland was again second with a production value of \$5,792,000, despite the fallowing of rangeland due to drought conditions. Miscellaneous livestock and poultry products followed with a production value of \$3,258,000.

I must stress that these are gross values only, whether marketed or not, and **do not** in any manner represent or reflect net income or loss experienced by individual producers. Producers do not have control over most input costs nor can they significantly affect market prices. Costs of production and marketing continue to influence net returns and profit. This report does not reflect upon individual operations since **the county** is the smallest unit measured for any particular commodity.

Mariposa County's agricultural strength is based on its agricultural heritage and values. The County's true wealth is found in its farmers and ranchers and in our FFA and 4-H youth.

I sincerely appreciate the cooperation and assistance of the many agricultural producers and ranchers, stakeholders, and public agencies that made this report possible, especially those providing data used in the compilation of this report.

Respectfully Submitted,

Cathi Boze
Agricultural Commissioner/Sealer

“MOTHER OF COUNTIES”

MARIPOSA COUNTY was one of the original 27 counties formed in the state of California on February 18, 1850. It was the greatest in size occupying more than a fifth of the entire state — its boundaries Los Angeles and San Diego to the south, Tuolumne to the north, Monterey and San Luis Obispo to the west, and the State of Nevada to the east. Since then, the whole or parts of Fresno, Inyo, Kern, Kings, Los Angeles, Madera, Merced, Mono, San Benito, San Bernardino, and Tulare Counties have been carved off until only 1,455 square miles remain of the original 30,000 square miles — hence the name “Mother of Counties.”

Mary Hodson, County Administrative Officer

It is my pleasure to submit the 2015 Agricultural Crop and Livestock Report for Mariposa County.

This annual publication contains statistical information pertaining to the acreage, yield, and gross value of Mariposa County agricultural production in accordance with Sections 2272 and 2279 of the California Food and Agricultural Code.

Mariposa County agriculture continued to show the effects of the state-wide drought in 2015, particularly on the livestock industry. Mariposa County's total estimated agricultural production was valued at \$42,419,400, an overall decrease of \$827,600 or approximately 1.9% from last year. The agricultural production value continues to show the economic importance and the **real** impact that agricultural production has on the local and regional economy. The contribution of agriculture to the economy of Mariposa County is not totally reflected in the values contained in this report. Goods, services, transportation, processing, marketing, employment, and other farm-related services significantly multiply these values to benefit the local economy and the surrounding areas. The fact that the gross value of agriculture continues to hold relatively steady, even in drought years, reflects positively on the importance of our agricultural industry to Mariposa County.

Cattle and calves continue to be the county's leading agricultural commodity with a production value of \$28,557,000, a 3% decrease in value from 2014 due to the impacts of the drought which resulted in a decrease in the number of head sold, primarily in the stocker/feeder operations. Rangeland was again second with a production value of \$6,072,000, despite the fallowing of rangeland due to drought conditions. Miscellaneous livestock and poultry products followed with a production value of \$3,285,000.

I must stress that these are gross values only, whether marketed or not, and **do not** in any manner represent or reflect *net income or loss* experienced by individual producers. Producers do not have control over most input costs nor can they significantly affect market prices. Costs of production, inputs, and marketing continue to influence net returns and profit. This report does not reflect upon individual operations since **the county** is the smallest unit measured for any particular commodity.

Mariposa County's agricultural strength is based on its agricultural heritage and values. The County's true wealth is found in its farmers and ranchers and in our FFA and 4-H youth.

I sincerely appreciate the cooperation and assistance of the many agricultural producers and ranchers, stakeholders, and public agencies that made this report possible, especially those providing data used in the compilation of this report.

Respectfully Submitted,

Cathi Boze
Agricultural Commissioner/Sealer

Annual Sustainable Agriculture Report

PEST DETECTION:

The following insect detection traps are placed throughout Mariposa County during the trapping season:

200 Gypsy moth traps	26 Khapra Beetle traps	80 Glassy-winged Sharpshooter (GWSS) traps
35 MedFly traps	6 European Pineshoot Moth traps	6 Light Brown Apple Moth (LBAM) Traps
16 Japanese beetle traps	1 Asian Citrus Psyllid trap	

PEST EXCLUSION:

Exotic pests, target pests, GWSS	Incoming plant material via truck, UPS, mail	52 shipments inspected
----------------------------------	--	------------------------

PEST ABATEMENT:

YELLOW STARHISTLE – Hand-pulled, biocontrol, mechanically removed & chemically sprayed
 TOCALOTE – Hand-pulled, biocontrol, mechanically removed & chemically sprayed
 HYDRILLA- Eradicated
 SPOTTED & DIFFUSE KNAPWEED – Hand-pulled & chemically sprayed
 ARUNDO DONAX – Chemically sprayed & mechanically removed
 OBLONG SPURGE – Chemically sprayed & mechanically removed

BIOCONTROL:

<u>PEST</u>	<u>AGENT/MECHANISM</u>	<u>SCOPE OF PROGRAM</u>
ASH WHITEFLY <i>Siphonius phyllireae</i>	Parasitic wasp <i>Encarsia</i> spp.	County wide
RED GUM LERP PSYLLID <i>Glycaspis brimblecombei</i>	Parasitic Wasp <i>Psyllaephagus bliteus</i>	County wide
YELLOW STARHISTLE <i>Centaurea solstitialis</i>	Seed Head Weevil <i>Bangasternus orientalis</i>	2 sites
	Hairy Weevil <i>Eustenopus villosus</i>	Various sites
	Peacock fly <i>Chaetorellia australis</i>	4 sites
KLAMATH WEED <i>Hypericum perforatum</i>	Klamath Weed Beetle <i>Chrysolina</i> spp.	County wide
PUNCTUREVINE <i>Tribulus terrestris</i>	Seed & Stem Weevils <i>Microlarinus</i> spp.	County wide

ORGANIC FARMING STATISTICS:

One organic grower was registered in 2015. Many local certified producers grow fruit and vegetables without the use of chemical pesticides for the Mariposa Certified Farmers Market which operates May through mid-October at the 6th Street parking lot on Stroming Road, the Lions Woodland Farmers Market which operates year round from Thursday thru Saturday, and the El Portal Farmers Market which operates from May to September at Yosemite View Lodge in El Portal.

AGRICULTURAL FACTS FOR MARIPOSA COUNTY

Mean Minimum – Maximum Temperatures		28° F. - 96° F.
