### DEPARTMENT OF AGRICULTURE

AGRICULTURAL COMMISSIONER . WEIGHTS AND MEASURES . ANIMAL CONTROL

MICHAEL J. TANNER Agricultural Commissioner Director of Weights and Measures Director of Animal Control

2139 Wardrobe Avenue Merced, California 95340-6495 Telephone (209) 385-7431 GARY CASERI
Assistant Agricultural Commissioner

TO: Ms. Ann M. Veneman, Secretary-California Department of Food and Agriculture

The Honorable Board of Supervisors

Ms. Gloria Cortez-Keene, Chairperson, District 1

Mr. Bruce Gabriault, District 2

Mr. Joe Rivero, District 3

Ms. Deidre Kelsey, District 4

Mr. Jerry O'Banion, District 5

It is my pleasure to submit the 1995 Agricultural Crop Report, in accordance with provisions of Section 2279 of the California Food and Agriculture Code.

I am pleased to report the gross agriculture production value is \$1,222,415,000, down \$29,308,000 from 1994. This continues the string of over one billion dollars in value. Even though most crops in 1995 were adversely impacted by early season weather patterns, some severely by the horrific winds and rains in March, overall gross value only declined by 2.34%. With the lower production came higher prices for most of these crops, but it still did not make up for the loss in total gross value.

Milk again dominated all commodities, increasing \$23,329,000 for a total of \$359,170,000 in total value, remaining number one. Total production was up 5% with price slightly higher.

Chicken eggs were the second largest gainer, up \$8,383,000 in value to \$25,856,000. This was due to higher production, the addition of a large production facility, and price up five cents per dozen. Turkeys increased in value by \$6,854,000 to \$30,321,000, despite a 2.7% drop in number of birds. Price was up 4.1 cents per pound. Walnuts were up in value by \$4,673,000 to \$12,401,000 as yield increased 32.8% and price by \$387 per ton. The only other significant increases in crop values realized were in processing tomatoes, watermelons, and prunes.

Market tomatoes sustained the biggest loss in value of all commodities, plunging in value \$16,395,000 to \$34,848,000, the reverse of 1994. Yield was down 13.4%, price by \$1.47 per carton, and acreage 5.8%. Almonds dropped in total value for the second year in a row to \$141,043,000 down \$11,057,000. Yield was only 780 pounds per acre, down 54% from last year's all time high. Price jumped to \$2.48 per pound with acreage up 4.6%. Almonds remain the number two valued commodity in the County.

Cotton, after record breaking yields in 1994, fell in value by \$9,690,000 to \$77,385,000. Yield declined 293 pounds per acre, however, price was up 2.2 cents per pound and acreage up by 7,105 acres. Alfalfa lost \$6,867,000; down were yield 6.2%, acreage 3.3%, and price slightly.

Sweet potatoes reversed in value from 1994, decreasing by \$5,781,000 to \$37,843,000. Even though acreage was up by 729 acres, yield was down 7.2% and price 17.5%. Cattle and calves again fell in total value to \$40,092,000, down \$5,134,000 as prices fell by \$5.56 per hundred weight. Many commodities were down in total value. Other commodities with significant declines in value were wine grapes, almond hulls, dry figs, hogs and pigs, sugarbeets, apricots, and ostriches.

This report addresses the acreage, production and gross value of agricultural production in Merced County. It does not attempt to reflect net farm income or costs of production and marketing. This report also emphasizes an average production and average value of gross receipts. Value is based on farmgate prices except for fresh packed commodities which reflect an FOB, freight on board, price.

I want to express my sincere appreciation to those persons who have provided the information and assistance necessary for my staff to compile this report under the direction of Mark Smith, Agricultural Biologist III. My thanks to the growers and industry members of Merced County who truly make AGRICULTURE our number one and most valued industry.

Respectfully submitted,

Michael J. Tanner

Agricultural Commissioner

Ms. Ann M. Veneman, Secretary-California Department of Food and Agriculture and The Honorable Board of Supervisors

Mr. Joe Rivero, Chairman, District 3

Ms. Gloria Cortez Keene, District 1

Ms. Kathleen Crookham, District 2

Ms. Deidre Kelsey, District 4

Mr. Jerry O'Banion, District 5

I am very pleased to submit the 1996 Agricultural Crop Report, in accordance with provisions of Section 2279 of the California Food and Agricultural Code. This annual report presents statistical information on Merced County Agriculture.

Agriculture continues its dominance as the County's major producing industry. The 1996 gross production value is \$1,429,522,000 which surpasses all previous years. This is \$207,107,000, or a 16.94% increase over 1995. A stronger economy and growing demand for food and fiber worldwide helped keep prices up for most commodities. Along with adequate ingredients for farming (water, weather, land, labor, other variables), production increases were noted in most crops.

With only three years in excess of \$300 million in value, milk has leaped to \$441,101,000, continuing to stretch its lead as the top commodity in the County. Total production was up 4.7%, while market milk showed a 17.5% value increase per hundred weight.

After two years of decreasing value, almonds have rebounded to \$177,761,000, up \$36,718,000. Yield increased to 1,180 pounds per acre after rain reduced yields in 1995. Price fell by \$0.38 per pound to \$2.10.

Cotton more than regained its prior year's loss with increased yield, up 235 pounds per acre and 1,430 more acres. Value was up \$17,941,000 to \$95,326,000. Chicken eggs were the fourth largest gainer, up \$14,767,000 in value to \$40,859,000. This was due to 19.4% higher production and price up \$0.15 per dozen. Wine grapes were valued at \$36,087,000, up \$11,256,000 due to increased acreage and value up 74%. However, production fell 20.4%. Sweet potatoes reached an all time high in value at \$48,899,000, an increase of \$11,056,000 despite a lower price per ton. Yield was 14.7% higher and acreage up 13.6%. Turkeys jumped in value by \$10,538,000 to \$40,859,000 as number of birds increased 31.5%. Price did not change. Other commodities showing significant gains in total value were alfalfa hay, peaches, almond hulls, chickens, silage corn, cotton seed, and wheat.

Market tomatoes for the second year in a row sustained the biggest loss in value of all commodities, dropping in value \$3,705,000 to \$31,143,000. Yield was down 7.6%, acreage by 3.8%, but price slightly up. Prunes dropped in total value to \$5,042,000, down \$2,027,000. Yield was down 24.1% and price by 6.7%.

Cattle and calves continued in a downward spiral falling to \$38,229,000 in total value, down \$1,863,000. Even though the number of head was up 5.9%, price fell by \$4.44 per hundred weight. Walnuts slipped in value to \$10,678,000, down \$1,723,000. Even though price was up 15.5%, yield dropped by 26.4%. Other commodities with significant declines in total value were figs, pistachios, and irrigated pasture.

This report addresses the acreage, production and gross value of agricultural production in Merced County. It does not attempt to reflect net farm income or costs of production and marketing. This report also emphasizes an average production and average value of gross receipts. Value is based on farmgate prices except for fresh packed commodities which reflect an FOB, freight on board, price.

I wish to express my sincere appreciation for the cooperation of those persons who have provided the information and assistance necessary for my staff to compile this report under the direction of Mark Smith, Agricultural Biologist III. My thanks to my staff and the growers and industry members of Merced County who truly make AGRICULTURE our number one and most valued industry.

Respectfully submitted,

Michael J. Tanne

Agricultural Commissioner

half Janner

## WHAT DOES THE DEPARTMENT DO?

The County Department of Agriculture is a regulatory agency performing under the auspices of the State Department of Food and Agriculture and Pesticide Regulation. The laws and programs under our jurisdiction are basically for the promotion and protection of the Agricultural Industry, the Consumer, and Public Health.

Under the County Department of Agriculture, there are three Divisions: Agricultural Commissioner, Sealer of Weights and Measures, and Animal Control. The Agricultural Commissioner Division is staffed with 25 permanent and 3 part-time employees; Sealer of Weights and Measures has 6 permanent employees; and Animal Control 12 permanent and 1 part-time employee.

## **Agricultural Commissioner**

The Division is devoted to the enhancement and conservation of the environment, protection of public health, safety and welfare, as well as the promotion and protection of the number one industry in the County - Agriculture. This is achieved through the enforcement of State and Federal laws, County Ordinances and Policies of the Board of Supervisors.

Merced County's basic economy is from agriculture and it is one of the leading counties in the State of California. Merced County leads the State in the production of sweet potatoes and chickens. It is in the top five producing counties of the following commodities: alfalfa, almonds, cantaloupes, corn silage, cotton lint, cotton seed, chicken eggs, figs, hogs and pigs, milk and cream, oats, peaches, sheep and lambs, silage, sugar beets, fresh market tomatoes, turkeys, wool, irrigated pasture and rangeland.

## Sealer of Weights and Measures

This Division is mandated to enforce the laws and regulations of the California Business and Professions Code and the California Code of Regulations pertaining to the office of County Director of Weights and Measures. This is accomplished by the testing and inspecting of weighing and measuring devices and packaged commodities. It also includes regulating persons that use measurement devices, or are making transactions in commerce based on weight or measurement. This function maintains and ensures equity in the market place between the buyer and seller. It also maintains and ensures that business can be conducted in a fair environment without unlawful or unfair business practices by competitors.

GARY CASERI
Assistant Agricultural Commission

TO: Ms. Ann M. Veneman, Secretary-California Department of Food and Agriculture and The Honorable Board of Supervisors

Ms. Kathleen Crookham, Chairperson, District 2

Ms. Gloria Cortez Keene, District 1

Mr. Joe Rivero, District 3

Ms. Deidre Kelsey, District 4

Mr. Jerry O'Banion, District 5

It is my pleasure to submit the 1997 Merced County Report of Agriculture, in accordance with Section 2279 of the California Food and Agriculture Code. This annual publication presents statistical information on the agricultural products produced in the County.

The 1997 total gross value of Merced County's leading industry is \$1,526,824,000, an all-time County high. This is \$97,392,000, or a 6.8% increase over 1996. A strong economy and demand for food and fiber worldwide created favorable markets for most commodities. Weather conditions throughout the year were near perfect for maximum production of most crops and products.

The year started out with heavy rains and flooding statewide caused by weather conditions referred to as the "pineapple express". The County escaped major devastation except along the Merced and San Joaquin Rivers. Losses and damage to agricultural production were estimated to be \$4,315,700.

After a string of steady increases, milk fell slightly to \$440,882,000, but is still the leading commodity in the County. Total production was up 7.25%, while value decreased 7.8% per hundred weight for market milk. Almonds remain as the number two crop at \$187,640,000, showing a 5.6% increase in value. Yield was up 41% to 1,660 pounds per acre. Price fell by \$0.54 per pound to \$1.56.

Fryer chickens, the third leading County commodity showed the highest gain in value of all commodities increasing to \$157,242,000, up \$30,364,000. This was due to a \$0.05 per pound price raise and production, up 6.1%. Wine grapes were valued at \$57,359,000, up

\$21,272,000 as a result of increased acreage and yield, higher by 3.15 tons per acre. However, price dropped by 8.2%. Alfalfa hay jumped in value to \$76,632,000. Acreage increased 4% and price by 11.3%. Sugarbeet acreage, after dropping almost one-half last year, was up 165%, resulting in an \$11,100,000 increase in value for a total of \$17,120,000. Other commodities showing significant gains in total value were silage corn, pistachios, cattle and calves, cantaloupe, hatching eggs, market tomatoes, and almond hulls.

Turkeys sustained the biggest loss in value of all commodities after posting a 35% gain in 1996. Value dropped to \$28,905,000 as the number of birds decreased 9.7% and price fell by \$0.03 per pound. Cotton, the fourth leading County commodity, decreased in value by \$8,406,000 to \$86,920,000, despite a County record yield of 1,440 pounds per acre. Acreage was down 4.8% and price 10.3% to 74.6 cents per pound. Sweet potatoes, after posting a record value last year, declined in value to \$40,841,000, down \$8,058,000. Price fell 16.2% with yield down slightly. Other commodities with significant declines in total value were processing tomatoes, bell peppers, other melons, and hogs and pigs.

This report addresses the acreage, production and gross value of agricultural production in Merced County. It does not attempt to reflect net farm income or costs of production and marketing. This report also emphasizes an average production and average value of gross receipts. Value is based on farmgate prices, except for fresh packed commodities which reflect an FOB (freight on board) price.

I wish to express my sincere appreciation for the cooperation of those persons who have provided the information and assistance necessary for my staff to compile this report under the direction of Mark Smith, Agricultural Biologist III. My thanks to my staff and the growers and industry members of Merced County who truly make AGRICULTURE our number one and most valued industry.

Respectfully submitted,

Michael J. Tanaer

Agricultural Commissioner

Ms. Kathleen Crookham, District 2

Mr. Joe Rivero, District 3

Mr. Jerry O'Banion, District 5

In accordance with the provisions of Section 2279 of the California Food and Agriculture Code, I am pleased to submit the 1998 Merced County Report of Agriculture. This annual publication presents statistical information on the agricultural products produced in the County.

The 1998 total gross value of Merced County's leading industry is \$1,449,754,000. This represents a 5% decrease, \$77,070,000, below the 1997 all-time County high gross value of production. This reduction was a direct result of the El Niño weather pattern during 1998.

Excessive, continuous rainfall and flooding the first half of the year delayed planting and caused a shorter than normal growing season, thus a decline in most crop categories. This was followed by below normal temperatures for the remainder of the growing season and year. Direct disaster losses and damage to County agricultural production were estimated to be in excess of \$14,010,000 from the El Niño phenomenon.

The dairy industry continues to lead Merced County's agriculture. Milk surged to \$526,161,000, an \$85,279,000 jump from 1997, far leading all County commodities. It represents 36.3% of the entire gross agricultural value in the Crop Report. Total production was down slightly, but value increased 19.3% per hundred weight of market milk.

Fryer chickens moved into second place valued at \$162,136,000, up \$4,894,000, due to a one-cent per pound price raise and production up 1%. Market tomatoes showed an impressive gain in value to \$49,204,000, up \$15,339,000. This was because of a 943 acre increase and price up \$1.98 per carton. However, yield was down 9%.

Sweet potatoes were valued at \$45,530,000, an increase of \$4,689,000 as a result of an 8.7% increase in acreage, with price up slightly. Other commodities showing a good gain in total value were nursery products, irrigated pasture, cattle and calves, and oat grain.

Almonds sustained the greatest loss in value of all commodities, falling from the number two position to third place. Value plummeted to \$108,302,000, a \$79,338,000 drop. Yield was down 38.6% to 1,020 pounds per acre due to poor pollination weather. Price fell 7.6% to \$1.44 per pound. Cotton suffered a huge loss, falling to \$50,898,000, down \$36,022,000. Production was only 995 pounds per acre, down 31%, because of weather related late planting and reduced growing season heat units. Price was slightly reduced and planted acreage fell by 12,000 acres. Alfalfa hay, after posting a record value last year, declined in value to \$65,380,000, down \$11,252,000. Price fell 10.8% with yield down slightly.

Wine grapes lost \$10,960,000 dropping to a value of \$46,399,000 as a result of production being down 37.6% per acre. However, price was up 23% and acreage 6%. Prunes fell \$5,188,000 in value to \$1,823,000. Price declined substantially, 40%, with yield down 51.6% and acreage 10.4%. Many other commodities showed significant declines in total value including almond hulls, hatching eggs, walnuts, cotton seed, market eggs, cantaloupes, other silage, cling peaches, pistachios, miscellaneous fruits and nuts, dried figs, sugar beets, sheep and lambs, lima beans, and wheat.

This report addresses the acreage, production, and gross value of agricultural production in Merced County. It does not attempt to reflect net farm income or costs of production and marketing. This report also emphasizes an average production and average value of gross receipts. Value is based on farmgate prices, except for fresh packed commodities which reflect an FOB (free on board) price.

I wish to express my sincere appreciation for the cooperation of those persons who have provided the information and assistance necessary for my staff to compile this report under the direction of Mark Smith, Agricultural Biologist III. My thanks to my staff and the growers and industry members of Merced County who truly make AGRICULTURE our number one and most valued industry.

Respectfully submitted,

Michael J. Tanner

Agricultural Commissioner

TO: Mr. William J. Lyons, Jr., Secretary-California Department of Food and Agriculture and The Honorable Board of Supervisors

Mr. Jerry O'Banion, District 5, Chairperson

Ms. Gloria Cortez Keene, District 1

Ms. Kathleen Crookham, District 2

Mr. Joe Rivero, District 3

Ms. Deidre Kelsey, District 4

It is my pleasure to submit the 1999 Merced County Report of Agriculture. This annual report is produced in accordance with the provisions of Section 2272 & 2279 of the California Food and Agriculture Code. The publication presents statistical information on the acreage, yield, and gross value of agricultural products produced in the County. It includes a brief **Sustainable Agriculture Report** which summarizes biological control, pest prevention, and pest detection activities in our county.

The 1999 total gross value of Merced County's leading industry is a new high of \$1,534,026,000. This represents a 5.81% increase, \$84,264,000, above last year's reduced gross value of production.

For 1999, La Niña weather with its mild winter, long spring, moderate summer, and warm, dry fall contributed to higher yields in many crops. However, some sectors of the agricultural economy continue to suffer a lack of profitability due mainly to low commodity prices.

Milk continues as Merced County's leading commodity, with a value of \$519,743,000. This represents a 1.2% or \$6,418,000 decline in value, reflecting a decrease of over \$1.50 per hundredweight paid to dairy farmers. Production was up 10.6%. Chickens remained in second place valued at \$165,507,000, up \$2,643,000. Production increased slightly with no change in price per pound.

After several depressing years, cattle and calves showed an impressive gain in value to \$70,579,000, up \$26,225,000. The number of head marketed was up 19.8% and price per hundredweight 24.1%. Cotton was another bright spot in 1999, posting a \$25,002,000 increase in value to \$75,900,000, moving it into fifth place. Production was an all-time high

of 1,470 pounds per acre (just under three bales) after a two-bale yield in 1998. Acreage was reduced 5.3%, but price was up 4.7 cents per pound. Processing tomatoes posted a \$15,342,000 jump to \$36,776,000. This was because of a 4,658 acre increase, yield up 11.7% per acre and price \$4.69 per ton higher. Almonds held on as the third leading crop with a value of \$120,033,000. Total value rose \$11,730,000 due to 4.4% more acres and production of 1,720 pounds per acre compared to 1,000 pounds in 1998. However, price to growers was down 37.5% to 90 cents per pound from \$1.44. Many other commodities displayed a significant gain in total value including sweet potatoes, silage (other), nursery products, miscellaneous fruit and nut crops, apricots, pistachios, prunes, miscellaneous vegetable crops, silage (corn), dry figs, and walnuts.

Fresh market chicken eggs sustained the greatest loss in value of all commodities, falling to \$28,778,000, a drop of \$8,580,000. This was partially due to a production reporting error in 1998 and contributed to the 6,347,777 fewer dozens of eggs. Also, price was down 15%. The overall lower production figure was in spite of a large egg production and packing operation moving into the County in 1998 which will have a large impact on next year's production and value. For the second year in a row, alfalfa hay plummeted in value to \$56,586,000, a loss of \$8,794,000. Acreage and yield were up slightly, but price fell by 16%.

Turkeys fell out of the top twelve commodities, declining in value to \$23,057,000, a \$6,448,000 drop. Price was up four cents per pound, but 1,048,981 fewer birds were produced. Market tomatoes suffered a loss of \$4,239,000, decreasing to \$44,965,000 in value. Acreage was up 23.5% and yield 19.4% per acre, but price dropped 38% per carton. Other commodities showing significant declines in total value included wine grapes, sugar beets, hatching eggs, cantaloupes, sudan hay, and strawberries.

This report addresses the acreage, production, and <u>gross value</u> of agricultural production in Merced County. It does not attempt to reflect net farm income or costs of production and marketing. This report also emphasizes an <u>average production and average value of gross receipts</u>. Value is based on farmgate prices, <u>except</u> for fresh packed commodities which reflect an FOB (free on board) price.

I wish to express my sincere appreciation for the cooperation and support of those persons who have provided the information and assistance necessary for my staff to compile this report under the direction of Mark Smith, Agricultural Biologist III. My thanks go to my staff and the growers and industry members of Merced County who truly make **AGRICULTURE** our number one and most valued industry.

Respectfully submitted,

Michael J. Tanner

Agricultural Commissioner

Beans, squash

PEST DETECTION/TRAPPING				
PEST (INSECT)	SOURCE	TRAPS IN SERVICE	NUMBER OF DISPECTIONS	
Apple Maggot	Apples	41	350	
Cherry Fruit Flies	Cherries	20	38	
European Corn Borer	Corn	5	45	
European Pine Shoot Moth	Pines	5	29	
Gypsy Moth	Trees	172	864	
Japanese Beetle	Turf, Roses	110	568	
Khapra Beetle	Grain	130	131	
Mediterranean Fruit Fly	Fruit	434	4,722	
Melon Fly	Melons	56	435	
Nantucket Pine Tip Moth	Pines	5	58	
Olive Fruit Fly	Olives	5	32	
Oriental Fruit Fly	Fruit	54	607	
Sweet Potato Weevil	Sweet Potatoes	75	1,383	

PEST ERADICATION				
PEST (INSECT)	SOURCE	SCOPE OF PROGRAM/TRAPS IN SERVICE		
Pink Bollworm	Cotton	State operated trapping program on 65,109 acres, combined with plowdown enforcement or host free period.		
Red Imported Fire Ant	Almonds, Beehives, Nursery Stock	6,092 acres were surveyed and trapped.		
Sweet Potato Weevil	Sweet Potatoes	Successful eradication program completed in 1994. Resumed detection trapping program in 1996.		
PEST (WEED)	SOURCE	SCOPE OF PROGRAM/TRAPS IN SERVICE		
Banana Waterlily	Waterways	None detected since eradication project in 1993.		
Camelthorn	Rangeland/Pasture	Ongoing detection/eradication efforts Countywide.		
Carolina Horse Nettle	Rangeland/Pasture	Ongoing detection/eradication efforts Countywide.		
Hydrilla	Waterways	Ongoing detection.		
Purple Mustard	Pasture/Roadways	Ongoing eradication efforts Countywide.		
Water Hyacinth	Waterways	Ongoing eradication efforts - Merced River, San Joaquin River, and tributaries.		

## SUSTAINABLE AGRICULTURE (cont.)

PEST EXCLUSION				
PEST (INTERCEPTED)	SOURCE	SCOPE OF PROGRAM*		
	Live Pests			
Aphid	Cut Flowers (Hawaii)	1 Rejected/Destroyed		
Chaff Scale	Citrus (Florida)	1 Rejected/Destroyed		
European Corn Borer	Peas (Maryland)	1 Rejected/Destroyed		
Leafhopper	Cut Flowers (Hawaii)	1 Rejected/Destroyed		
Moth	Beehive (Texas)	1 Rejected/Released		
Purple Scale	Citrus (Florida)	1 Rejected/Destroyed		
Quackgrass	Potted Plants (Oregon)	1 Rejected/Destroyed		
Red Imported Fire Ant	Sweet Potatoes (North Carolina)	1 Rejected/Treated/Released		
Red Imported Fire Ant	Beehives (Texas)	6 Rejected/Treated/Released		
Soft Brown Scale	Cut Flowers (Hawaii)	1 Rejected/Destroyed		
Not Properly Certified				
Apple Maggot	Apples (unknown)	1 Rejected/Destroyed		
Burrowing and Reniform Nematode	Purple Yams (Louisiana)	1 Rejected/Destroyed		
Burrowing and Reniform Nematode	Roses (Florida)	1 Rejected/Destroyed		
Cereal Leaf Beetle	Wheat (Ohio)	1 Rejected/Returned		
Insect/Diseases	Red Pepper Spice (China)	1 Rejected/Destroyed		
Insect/Diseases	Rice Straw (China)	38 Rejected/Destroyed		
Ozonium Root Rot	Grass Sod (Texas)	1 Rejected/Returned		
Pecan Case-bearers	In Shell Pecans (Virginia, New Mexico, Georgia, Oklahoma)	4 Rejected/Destroyed		
Pecan Case-bearers, Pine Shoot Beetle, Chestnut Bark Disease	Pine Cones, Chestnuts, and Pecans (Illinois)	1 Rejected/Returned		

Improper Markings *					
Asparagus (Oregon)	1 Rejected/Released	Pecans (Texas)	1 Rejected/Released		
Blueberry (Michigan)	1 Rejected/Released	Plant Material (Gilroy, CA)	1 Rejected/Released		
Citrus Fruit (Arizona)	2 Rejected/Released	Roses (Florida)	1 Rejected/Released		
Cut Roses (Unknown)	1 Rejected/Released	Seed Pods (El Monte, CA)	1 Rejected/Released		
Kiwi (Unknown)	1 Rejected/Released	Tulip bulbs (Washington)	1 Rejected/Released		
Lilac (Washington)	1 Rejected/Released	Pine Cones/ Cypress Cuttings (Oregon)	1 Rejected/Released
