APPENDIX TABLE

1	Operating Inputs: Estimated Prices, Louisiana, 1997.	B-33
2	Powered Equipment: Estimated Useful Life, Annual Use, Purchase Price, Repair Cost, Fuel Consumption Rate, and Direct and Fixed Cost per Hour, Louisiana, 1997.	B-33
3	Implements: Estimated Performance Rate, Useful Life, Annual Use, Purchase Price, Repair Cost, and Direct and Fixed Cost per Hour and per Acre, Louisiana, 1997.	B-34
4	Other Durable Inputs: Estimated Repair Cost, Fuel Consumption Rate, Direct Cost per Unit of Measure, and Fixed Cost per Unit of Measure or per Acre, Louisiana, 1997.	B-34
5	Estimated Costs per Acre Overhead Costs, Tenant-Operator, Louisiana, 1997.	B-35
6	Estimated Costs per Acre Overhead Costs, Owner-Operators, Louisiana, 1997.	B-36

ACKNOWLEDGEMENTS

The authors expresses appreciation to the many producers, LCES, and LAES personnel who cooperated in providing information and review of the production practice and performance data incorporated into budget estimates. Specific recognition is extended to Dwight Landreneau, Tom Hymel, Mark Shirley, Greg Lutz, Jimmy Avery, Kenneth Roberts, Wendell Lorio and Al Ortego of Louisiana Cooperative Extension Service. The authors are also indebted to Dr. Kenneth W. Paxton of the Department of Agricultural Economics and Agribusiness for review and support of this publication.

PROJECTED COSTS AND RETURNS FOR CRAWFISH AND CATFISH PRODUCTION IN LOUISIANA, 1997

by

Robert W. Boucher and Jeffery M. Gillespie¹

INTRODUCTION

Aquaculture production enterprises, like other farm enterprises, require advanced planning to make production and marketing management decisions that are likely to result in profits. The purpose of this report is to provide production cost estimates for selected aquaculture enterprises to assist aquaculture producers in making production decisions and obtain adequate financing. Aquaculture enterprises and their associated costs differ considerably among producers and resource situations. The projected costs presented here should not be interpreted as averages for producers in the industry. The purpose of the cost projections is to provide some guidelines whereby producers and others with an interest in aquaculture production costs can make cost estimates appropriate to their unique situation that will facilitate sound management decisions.

Data used in development of the budgets is a combination of information obtained directly from producers, Louisiana Cooperative Extension Specialists and Louisiana Agricultural Experiment Station Scientists. Current machinery and other input price data were combined with production practice data using the Microcomputer Enterprise Budget Generator developed at Mississippi State University. Fixed costs were estimated based on typical rates of use and sizes of operations. Production budget estimates are presented on a 'per acre' basis to facilitate using the estimates for different size operations. Overhead costs associated with operation of the farm business have been allocated as a residual claimant on a per acre basis in the enterprise budgets, but have not been included in the computation of breakeven selling prices.

CRAWFISH BUDGETS

Crawfish budgets are presented for five production-marketing situations. They are based primarily on a 1990 survey of 39 commercial crawfish producers with supplemental information provided by researchers and Cooperative Extension service personnel. The personal interview survey collected information on production, harvesting, and marketing practices.

Budgets are presented for three owner-operator situations without aeration that typify producers included in the survey: 1) Southwest Louisiana single crop ponds, 2) Southwest Louisiana rice-crawfish double crop, and 3) Northeast Louisiana single crop ponds. Budgets for two additional owner-operator situations using recirculating aerators are included to represent technology currently available: 1) Southwest Louisiana single crop ponds with gasoline recirculating aerators, and 2) Southwest Louisiana single crop ponds with electric recirculating aerators. Fixed costs for non-aerated systems were based on a 120 acre production unit consisting of six 20-acre ponds configured in two 60-acre units. Fixed costs for aerated systems were based on a 120 acre production unit consisting of six 20-acre ponds configured in three 40-acre units to facilitate servicing aerators and providing electrical service.

¹Research Associate and Assistant Professor, respectively, Department of Agricultural Economics and Agribusiness, Louisiana Agricultural Experiment Station, Louisiana State University Agricultural Center, Baton Rouge.

Harvesting was assumed performed by one person using a power boat with 20 traps per acre. In Southwest Louisiana, harvesting was assumed to occur every other day during December through February and daily throughout the remainder of the season. In Northeast Louisiana, harvesting was assumed to occur daily throughout the season to accommodate retail marketing.

Seasonal yield distributions reflect those reported by surveyed producers. Total season yields are not absolute sample averages, but reflect typical yields reported by respondents. No crawfish returns are included since there are no publicly published sources of crawfish prices. Marketing costs included in the budgets assume that the product is sold to processors and wholesalers in Southwest Louisiana and is sold retail in Northeast Louisiana.

CATFISH BUDGETS

Catfish production cost projections are presented for six situations to provide comparisons for tenure, fuel source and pond size. The six situations presented include: 1) owner-operator, electric power, 10-acre pond size, 2) owner-operator, diesel power, 10-acre pond size, 3) tenant-operator, electric power, 10-acre pond size, 4) tenant-operator, diesel power, 10-acre pond size, 5) owner-operator, electric power, 15-acre pond size, and 6) owner-operator, diesel power, 15-acre pond size. Fixed costs are based on a 60-acre production unit for all situations, i.e. four 15-acre or six 10-acre ponds. Budget information is presented on a per water-acre basis to facilitate comparisons among pond and production unit sizes. Overhead costs in the budgets are based on 1.2 acres of land associated with each water-acre of pond area.

Production practices are based on information obtained from discussions with producers, extension specialists and researchers. Custom harvesting and custom stocking are assumed in all situations. Monthly feed requirements were based on a series of simulations using the GROWCAT simulation model, accounting for temperature, mortality and fish growth rates. The four 15-acre pond and six 10-acre pond scenarios were each simulated for a seven-year period to obtain feed requirements, harvest dates and quantities. Budgets were then prepared to show the average annual costs and returns per water-acre.

SUMMARY

Table 1 presents a summary comparison of projected costs and yields per acre for the five crawfish production situations. Breakeven selling prices required to recover costs are presented in Table 2 for five alternative yield levels for each crawfish situation. Costs and returns for the six catfish production situations are summarized and compared in Table 3. Breakeven selling prices required to recover direct cash expenditures and total specified production costs are presented in Table 4 for each of the six production situations and five alternative yield levels.

Tables with an "A" designation provide estimated cost budgets, whereas tables with a "B" designation show costs for detailed operations.

Table 1. A Summary of Projected Costs and Returns per Acre for Crawfish and Crawfish-Rice Production in Louisiana, 1997.

Crop Description	Yield Per Acre Pounds	Direct Expenses	Fixed Expenses	Total Expenses
-----Dollars per Acre-----				
Crawfish Enterprises:				
Northeast Louisiana Non-aerated, Owner ^b	600.00	237.80	123.64	361.44
Southwest Louisiana Non-aerated, Owner ^b	1200.00	303.62	132.32	435.94
Gasoline recirculating, Owner ^b	1200.00	358.94	178.06	537.00
Electric recirculating, Owner ^b	1200.00	343.29	175.58	518.87
Crawfish-Rice, Owner ^{a,b,c}	900+4200	538.26	121.46	659.72

^a Income for rice was calculated by multiplying the market price of \$9.75 by actual yield.

^b Land costs are not included.

^c Yield includes 900 lbs of crawfish and 42 cwt of rice.

Table 2. Breakeven Selling Prices for Crawfish for Selected Yield Levels, Louisiana, 1997.

	Total Costs ^a	Total Variable Costs	Base Yield Level	Yield Level				
				-20	-10	Base	10	20
-----Dollar/Acre--- 1b. -----Price or Avg. Cost----- -----Dollars/Lb.-----								
PRICES REQUIRED TO RECOVER TOTAL SPECIFIED COSTS								
Crawfish Enterprises:								
Northeast Louisiana Non-aerated, Owner	361.44		600	.75	.67	.60	.55	.50
Southwest Louisiana Non-aerated, Owner	435.94		1200	.45	.40	.36	.33	.30
Gasoline recirculating, Owner	537.00		1200	.56	.50	.45	.41	.37
Electric recirculating, Owner	518.87		1200	.54	.48	.43	.39	.36
Crawfish-Rice, Owner ^b	254.05		900	.35	.31	.28	.26	.24
PRICES REQUIRED TO RECOVER VARIABLE COSTS								
Crawfish Enterprises:								
Northeast Louisiana Non-aerated, Owner		237.80	600	.49	.44	.40	.36	.33
Southwest Louisiana Non-aerated, Owner		303.62	1200	.32	.28	.25	.23	.21
Gasoline recirculating, Owner		358.94	1200	.37	.33	.30	.27	.25
Electric recirculating, Owner		343.29	1200	.36	.32	.29	.26	.24
Crawfish-Rice, Owner ^b		210.93	900	.29	.26	.23	.21	.20

^a Land costs are not included.

^b Breakeven Selling Prices for Crawfish double cropped with rice represents the net cost of producing crawfish in the double crop situation compared to producing rice alone.

Table 3. A Summary of projected Costs and Returns per Acre for Catfish Production in Louisiana, 1997.

Crop Description	Yield Per Acre	Total Income	Returns Over Direct Expenses			Total Expenses	Returns Over Total Expenses
			Cwt.	Dollars per Acre	Fixed Expenses		
Catfish Enterprises:							
Six 10 acre ponds, Elec Pwr, Owner ^a	52.80	4012.80	2841.65	1171.15	362.37	3204.02	808.78
Six 10 acre ponds, Diesel Pwr, Owner ^a	52.80	4012.80	2875.82	1136.98	382.64	3258.46	754.34
Six 10 acre ponds, Elec Pwr, Tenant ^b	52.80	4012.80	3110.35	902.45	122.60	3232.95	779.85
