Dietary Guidelines for Americans, 2020-2025

What It Is, What It Is Not

- Intended to promote health and help prevent chronic diseases; not intended as clinical guidance for treatment of disease.
- Foundation of Federal food, nutrition, and health policies and programs.
- Translates the current science on diet and health into guidance to help people choose a healthy dietary pattern.
- Targeted to professionals who work with the general public to help them consume a healthy and nutritionally adequate diet and establish policies and services to support these efforts.

Most Americans Do Not Follow the *Dietary Guidelines*

NOTE: HEI-2015 total scores are out of 100 possible points. A score of 100 indicates that recommendations on average were met or exceeded. A higher total score indicates a higher quality diet.

Data Source: Analysis of What We Eat in America, NHANES 2015-2016, ages 2 and older, day 1 dietary intake data, weighted.

The *Dietary Guidelines* Can Help All Americans to Eat Healthy To Be Healthy

Following the *Dietary Guidelines* Can Help Improve Americans' Health

Each step closer to eating a diet that aligns with the *Dietary Guidelines* is associated with:

Lower Risk of
Heart Disease

Lower Risk of
Type 2 Diabetes

Lower Risk of

Making Nutrient-Dense Choices: One Food or Beverage At a Time

Every food and beverage choice is an opportunity to move toward a healthy dietary pattern. Small changes in single choices add up and can make a big difference. These are a few examples of realistic, small changes to nutrient-dense choices that can help people adopt healthy dietary patterns.

Making Nutrient-Dense Choices: One Meal At a Time

Slight changes to individual parts of a meal can make a big difference. This meal shows examples of small shifts to more nutrient-dense choices that significantly improve the nutritional profile of the meal overall while delivering on taste and satisfaction.

Typical Burrito Bowl Total Calories = 1,120	Nutrient-Dense Burrito Bowl Total Calories = 715
White rice (1½ cups)	Brown rice (1 cup) + Romaine lettuce (½ cup)
Black beans (⅓ cup)	Black beans, reduced sodium (⅓ cup)
Chicken cooked with sauce (2 ounces)	Grilled chicken with spice rub (2 ounces)
No grilled vegetables	Added grilled vegetables (⅓ cup)
Guacamole (½ cup)	Sliced avocado (5 slices)
Jarred salsa (¼ cup)	Fresh salsa/pico de gallo (¼ cup)
Sour cream (¼ cup)	No sour cream
Cheese (⅓ cup)	Reduced-fat cheese (⅓ cup)
Jalapeño (5 slices)	Jalapeño (5 slices)
Iced tea with sugar (16 ounces)	Iced tea, no sugar (16 ounces)

THE DIETARY GUIDELINES FOR AMERICANS CAN HELP YOU EAT HEALTHY TO BE HEALTHY

The Dietary Guidelines for Americans provide science-based advice to help everyone—no matter their age, race, socioeconomic, or health status—achieve better health by making every bite count.

Americans Do Not Follow the Dietary Guidelines and Our Health is Suffering

- Healthy Eating Index 2015 Scores (0-100) Over Time: 54, 57, 59, 61, 63, 65, 67, 69, 71, 73, 75, 77, 79, 81, 83, 85, 87, 89, 91, 93, 95, 97, 99, 100
- 74% of American adults are overweight or obese
- 6 in 10 adults are living with one or more diet-related chronic diseases

The Science Behind the Dietary Guidelines Represents Americans

- The Dietary Guidelines is based on science that examines how diet promotes health and prevents disease in:
 - People who are healthy
 - People at risk for diet-related chronic diseases
 - Some people who live with diet-related chronic diseases
- And the evidence base reflects the diversity of Americans, including:
 - All ages and life stages
 - Different racial and ethnic backgrounds
 - A range of socioeconomic statuses

Following the Dietary Guidelines Can Help Improve Americans' Health

Each step closer to eating a diet that aligns with the Dietary Guidelines is associated with:

- Lower Risk of Heart Disease
- Lower Risk of Type 2 Diabetes
- Lower Risk of Cancer
- Lower Risk of Obesity
- Lower Risk of Hip Fracture

Make every bite count with the Dietary Guidelines for Americans

- Start with the 4 Guidelines:**
 - Follow a healthy dietary pattern at every life stage
 - Limit foods and beverages higher in added sugars, saturated fat, and sodium, and limit alcoholic beverages
 - Customize and enjoy nutrient-dense food and beverage choices to reflect personal preferences, cultural traditions, and budgetary considerations
 - Focus on meeting food group needs with nutrient-dense foods and beverages, and stay within calorie limits
- The foods and beverages we consume have a profound impact on our health. Yet we're still not following a healthy dietary pattern.**
 - While the science linking food and health has only become stronger, our Healthy Eating Index (HEI) score has remained low. The HEI measures how closely food and beverage choices align with the Dietary Guidelines. Our HEI score is higher early in life and in older adulthood, but we all fall far short of following the Dietary Guidelines.
 - Healthy eating is important at every life stage. For the first time, the Dietary Guidelines for Americans, 2020-2025 provides recommendations for each life stage, from birth through older adulthood.
 - Nutrient needs vary over the lifespan and each life stage has unique implications for food and beverage choices and disease risk.
- How do we "make every bite count"?**
 - Focus on nutrient-dense foods and beverages, limit those higher in added sugars, saturated fat, and sodium, and stay within calorie limits.
 - Daily Goals: Most of a person's daily calories are needed to meet food group recommendations with nutrient-dense foods and beverages.
 - And follow these three key dietary principles:
 - Meet nutritional needs primarily from nutrient-dense foods and beverages.
 - Choose a variety of options from each food group.
 - Pay attention to portion size.

Currently: 75% of people have dietary patterns low in vegetables, fruits, and dairy; 63% exceed the limit for added sugars; 77% exceed the limit for saturated fat; 90% exceed the Chronic Disease Risk Reduction limits for sodium.

Total Calories Per Day: 85% of calories are needed per day to meet food group recommendations healthfully, in nutrient-dense forms; 15% of remaining calories are available for other uses (including added sugars and saturated fat).

More than half of the U.S. population meets or exceeds total grain and protein foods recommendations, but are not meeting the subgroup recommendations for each food group.

USDA-HHS PROCESS TO DEVELOP THE DIETARY GUIDELINES FOR AMERICANS, 2020-2025

Once the Dietary Guidelines Advisory Committee submits its scientific report to USDA and HHS, the departments use the findings to develop the Dietary Guidelines for Americans. After approval by the Secretaries of both departments, the guidelines are released to the public.

- Access & Consider Key Resources**
 - 2015-2020 Dietary Guidelines for Americans
 - Scientific Report of Advisory Committee
 - Agency and public comments
- USDA & HHS Write the Dietary Guidelines**
 - Make updates that represent totality of scientific evidence
 - Consider Federal programs and best practices for developing guidelines
- Review by Scientific Experts**
 - Federal expert technical review
 - External peer review
- Clearance by USDA & HHS**
 - Agency clearance (e.g., FNS, CDC, NIH, FDA)
 - Administration clearance
- Dietary Guidelines released by USDA & HHS**
 - Communicate the new edition
 - Begin implementing across agencies and programs

Dietary Guidelines Implementation

- Once the *Dietary Guidelines* is released, the Federal government begins implementing its recommendations and uses the *Dietary Guidelines* to support “speaking with one voice” on nutrition topics.
- The *Dietary Guidelines* provides the foundation for Federal nutrition and health initiatives. It is within each Federal agency’s purview to determine *how* best to implement the *Dietary Guidelines* within its programs to serve its specific audiences.
- Many opportunities exist for other sectors of society to implement the *Dietary Guidelines* in the multiple settings they influence, from home to school to work to community.

Implementing the *Dietary Guidelines* Through MyPlate

- MyPlate is used by professionals to help people become more aware of and informed about making healthy food and beverage choices over time.
- USDA's *Start Simple with MyPlate* campaign offers resources to help Americans put the Guidelines into practice starting today.
- The benefits of healthy eating add up over time, bite by bite. Small changes matter. Start Simple with MyPlate.

Questions

Start Simple with MyPlate

Start simple and take healthy eating one step at a time.

- Focus on whole fruits**
Include fruit at breakfast. Top whole-grain cereal with your favorite fruit, add berries to pancakes, or mix dried fruit into hot oatmeal.
- Vary your veggies**
Cook a variety of colorful vegetables. Make extra vegetables and save some for later. Use them for a stew, soup, or a pasta dish.
- Vary your protein routine**
Next time you cook, try adding a new protein, like shrimp, beans, chicken, or beef.
- Make half your grains whole grains**
Add brown rice to your stir-fry dishes. Combine your favorite veggies and protein foods for a nutritious meal.
- Move to low-fat or fat-free milk or yogurt**
Swap a low-fat yogurt partner for breakfast. Top with fruit and nuts to get in two more food groups.
- Drink and eat less sodium, saturated fat, and added sugars**
Cook at home and read the ingredients to compare foods.
