DEPARTMENT OF APPLIED ECONOMICS

UNIVERSITY OF MINNESOTA

The mission of the Department of Applied Economics is to serve Minnesota through the achievement of academic excellence in education and research that is relevant to the needs of modern society. The thrust of the Department's efforts encompasses economic problems and policy alternatives in areas such as:

Agricultural and Food Marketing	Foreign Trade
Agricultural Finance	Human Resources
Agricultural Prices	Land Use Planning
Community Development	Production Economics
Consumption Economics	Public Policy
Economic Development	Regional Economics
Economics of Public Service	Resource and Environmental Economics
Farm and Agribusiness Management	State and Local Organization and Finance

The programs of the Department of Applied Economics include:

- Undergraduate and Graduate Teaching
- Extension and Continuing Education
- Fundamental and Applied Research
- International Programs

Each faculty member engages in one or more of these complementary activities of the Department.

As a part of the education program of the Department, the staff periodically publishes research results, papers, and speeches. This portion of their work is indexed annually and catalogued so that it may be used as a reference for their projects and activities, and to make it more readily available to others. Also included are publications of former Department members where the publications are based on work conducted while at the University of Minnesota. This listing does not reflect all the educational research, teaching, or extension endeavors of the staff. It includes only that portion that is in print. Publications are indexed by author and subject matter.
