INTRODUCTORY NOTE

The following list of publications represents the research activities of the agricultural economics group in the California Agricultural Experiment Station, California Agricultural Extension Service, Giannini Foundation of Agricultural Economics and the Department of Agricultural Economics, University of California. Although not every publication has been included, it is sufficiently comprehensive to be representative of the research work accomplished during the period covered. The list serves not only as a record of published materials but also as a reference guide to source material in the area of agricultural and resource economics research.

The list is in two parts. Part I, Economic Classification, includes all of the publications classified into various economic categories. Part II, Commodity Classification, includes only those items which pertain explicitly to particular farm products, with the titles on a single group of products brought together under each subheading. The arrangement in each section is alphabetical by title.

Citations beginning with an asterisk (*) are available for distribution from the Giannini Foundation of Agricultural Economics, Room 207, Giannini Hall, University of California, Berkeley, California, 94720. Information concerning the availability of the titles without an asterisk may be obtained from the Giannini Foundation Library, 248 Giannini Hall, University of California, Berkeley, California, 94720.
