INTRODUCTORY NOTE

The following list of publications represents the research activities of the Agricultural economics group in the California Agricultural Experiment Station and the California Cooperative Extension Service. The California Agricultural Experiment Station includes the members of the Giannini Foundation of Agricultural Economics in the Department of Agricultural and Resource Economics and Policy, University of California, Berkeley, the Department of Agricultural and Resource Economics, University of California, Davis; and the Department of Environmental Sciences, University of California, Riverside. The California Cooperative Extension Service includes the Extension Specialists who are members of the Giannini Foundation and who are located on the campuses of Berkeley, Davis, and Riverside. Although not every publication has been included, it is sufficiently comprehensive to present the research work accomplished during the period covered. All titles included in this issue have been received by the Giannini Foundation Library and housed here, except where indicated as "Davis AREL" (Davis Agricultural and Resource Economics Library). A few titles received after the publication of the 1994-96 list have been included here. The list serves not only as a record of published and unpublished materials but also as a reference guide to source materials in the area of agricultural and resource economics research and related areas.

This list is in two parts. Part I, *Economic Classification*, includes all of the publications classified into various economic categories. Two new categories, "Biotechnology" and "Environmental Economics" have been added to reflect changes in the research done by the members. The category, "Rural Development: Developing Countries" has been further subdivided to reflect research in Asia, Latin America, and Transition Economies. Part II, *Commodity Classification*, includes only those items which pertain explicitly to particular farm products, with the titles on a single group of products brought together under each subheading. These titles are also included in Part I. The arrangement in each section is alphabetical by title.

Part III has been added to list the publications by author. This section includes only the Giannini Foundation members for the period covered by this list. The titles are all works which appear in Part I.

Economic Research of Interest to Agriculture was first issued on May 6, 1951, the eighty-first birthday of A.P. Giannini, and included the Foundation members' works from 1929 (the beginning of the Giannini Foundation of Agricultural Economics at the University of California, Berkeley) through 1950. Thereafter, it has been issued triennially. The categories in Part I, *Economic Classification*, have grown from fourteen to thirty, reflecting the changes in the research done in the succeeding years. The subject areas of research have extended beyond traditional agriculture. Due to these changes, this publication will be the last to be issued under its current title.

Supplementing this title between publications are *Giannini Reporter*, issued biennially; *Recent Faculty Publication in Agricultural and Resource Economics* (UC Davis) issued annually and available online at

<http://www.agecon.ucdavis.edu/library/Facultylist.htm>

and, starting in 2001, *Faculty Publications of the Department of Agricultural and Resource Economics and Policy Received in the Giannini Foundation Library* (UC Berkeley) will be online annually. It will be listed on the home page of the Giannini Foundation of Agricultural Economics Library

Grateful acknowledgment is made to Susan Casement, Librarian, and her assistants for sending us the Davis Giannini Foundation members' publications; to the Giannini Foundation Library staff--especially to Eileen Smith, Library Assistant, for invaluable suggestions and assistance in correcting the inconsistencies of the citations, conversion of this publication to pdf format for mounting on the Library web site, and for overseeing the distribution of the publication; and to Student Assistant Hector Lopez for distribution assistance. Any omissions or errors in this list are the responsibility of the compiler and editor.
