California Department of Food and Agriculture

Agricultural Commissioners' Crop Reports

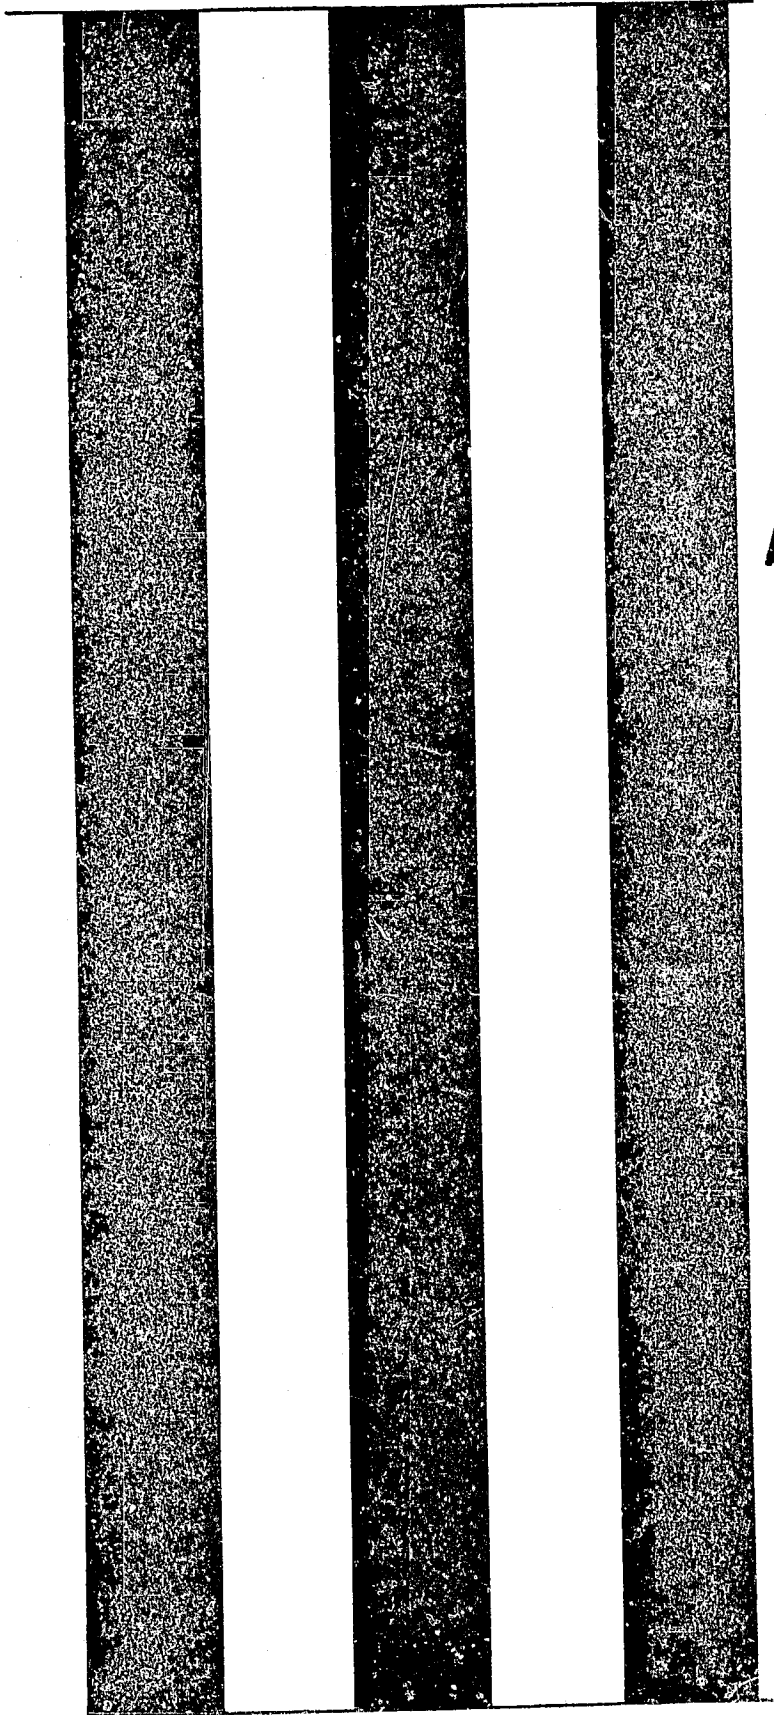

# Monterey County

1962-1969

California County Agricultural Commissioners' Reports from the California Department of Food and Agriculture. This collection consists of annual crop and livestock data from each of the 58 California Counties. The collection covers 1915-1981; digitization of the rest of the collection is forthcoming.

This digitization project was funded by the Giannini Foundation of Agricultural Economics,  
<http://giannini.ucop.edu/>.

The work was completed by the staff of the Giannini Foundation Library, University of California, Berkeley, <http://are.berkeley.edu/library/>. **Please contact the Library to consult the originals.**

To The State Director of Agriculture and  
The Honorable Board of Supervisors of Monterey County

This 1963 Agricultural Report is submitted in accordance  
with Section 65.5 of the California Agricultural Code.

The prices are reported on an F. O. B. basis. Cost of  
production, harvesting, packing and other handling costs  
should be deducted to arrive at a true farm value.

I wish to express my sincere appreciation to all who have  
furnished necessary information which has made this report  
possible.

Respectfully submitted,

Albert W. Culver  
Agricultural Commissioner

# Monterey County Annual Crop Report

1965

120 WILGART WAY  
SALINAS, CALIFORNIA

MONTEREY COUNTY  
DEPARTMENT OF AGRICULTURE  
SALINAS, CALIFORNIA

1 9 6 5

To the State Director of Agriculture and  
The Honorable Board of Supervisors of Monterey County

Section 65.5 of the California Agricultural Code requires that the Agricultural Commissioner compile a report covering conditions, acreage, production and value of the agricultural products of his county.

The prices are reported on an F.O.B. basis. Cost of production, harvesting, packing and other handling costs should be deducted to arrive at a true farm value. Where accurate figures are not obtainable, estimates based on information from the best available sources are used to compile this report.

In arriving at these costs consideration should be given to the increased labor costs resulting in a lesser net return to the grower.

I wish to express my appreciation to all who have furnished the information necessary to make this report possible.

Respectfully submitted,

Albert W. Culver  
Agricultural Commissioner

Three vertical black bars of varying widths are positioned on the left side of the page. The bars are solid black and extend from near the top to near the bottom of the page. The middle bar is the narrowest, while the two outer bars are wider and appear to be made of a textured or grainy material.

MONTEREY COUNTY  
DEPARTMENT OF AGRICULTURE  
SALINAS, CALIFORNIA

To the State Director of Agriculture and  
The Honorable Board of Supervisors of Monterey County

Section 65.5 of the California Agricultural Code requires that the Agricultural Commissioner compile a report covering conditions, acreage, production and value of the agricultural products of his county.

The prices are reported on an F.O.B. basis. Cost of production, harvesting, packing and other handling costs should be deducted to arrive at a true farm value. Where accurate figures are not obtainable, estimates based on information from the best available sources are used to compile this report.

In arriving at these costs consideration should be given to the increased costs resulting in a lesser net return to the grower.

I wish to express my appreciation to all who have furnished the information necessary to make this report possible.

Respectfully submitted,

Albert W. Culver  
Agricultural Commissioner

## Annual Crop Report

To the State Director of Agriculture and  
The Honorable Board of Supervisors of Monterey County

Section 2279 of the California Agricultural Code requires that the Agricultural Commissioner compile a report covering conditions, acreage, production and value of the agricultural products of his county.

The considerable overall increase in gross returns shown in this crop report is, to some degree, attributable to increased acreage and extremely fortunate markets. These increases were substantially offset by increased costs.

The prices are reported on an F.O.B. basis. Cost of production, harvesting, packing and other handling costs should be deducted to arrive at a true farm value. Where accurate figures are not obtainable, estimates based on information from the best available sources are used to compile this report.

I wish to express my appreciation to all who have furnished the information necessary to make this report possible.

Respectfully submitted,

  
Albert W. Culver  
Agricultural Commissioner

# Monterey County Annual Crop Report

1968

120 WILGART WAY  
SALINAS, CALIFORNIA

MONTEREY COUNTY  
DEPARTMENT OF AGRICULTURE  
SALINAS, CALIFORNIA

1 9 6 8

To the State Director of Agriculture and  
The Honorable Board of Supervisors of Monterey County

Section 2279 of the California Agricultural Code requires that the Agricultural Commissioner compile a report covering conditions, acreage, production and value of the agricultural products of his county.

The considerable overall increase in gross returns shown in this crop report is, to some degree, attributable to increased acreage and extremely high yields. These increases were substantially offset by increased costs.

The prices are reported on an F.O.B. basis. Cost of production, harvesting, packing and other handling costs should be deducted to arrive at a true farm value. Where accurate figures are not obtainable, estimates based on information from the best available sources are used to compile this report.

I wish to express my appreciation to all who have furnished the information necessary to make this report possible.

Respectfully submitted,

  
Albert W. Culver  
Agricultural Commissioner

Section 2279 of the California Agricultural Code requires that the Agricultural Commissioner compile a report covering conditions, acreage, production and value of the Agricultural products of his county.

Heavy rains delayed some crops but resulted in an outstanding growing season. The results were somewhat erratic with some crops increasing in value and many decreasing.

The prices reported are on an F.O.B. basis and the figures shown indicate the gross farm value and should not be used to estimate net farm income. Cost of production, harvesting, packing and other handling costs should be deducted to arrive at a true farm value. These costs may in some crops be greater than the gross value and result in a net loss to the farmer.

I wish to express my appreciation to all who have furnished the information necessary to make this report possible.

Respectfully submitted,

  
Albert W. Culver  
Agricultural Commissioner
