California Department of Food and Agriculture

Agricultural Commissioners' Crop Reports

Riverside County

1964-1976

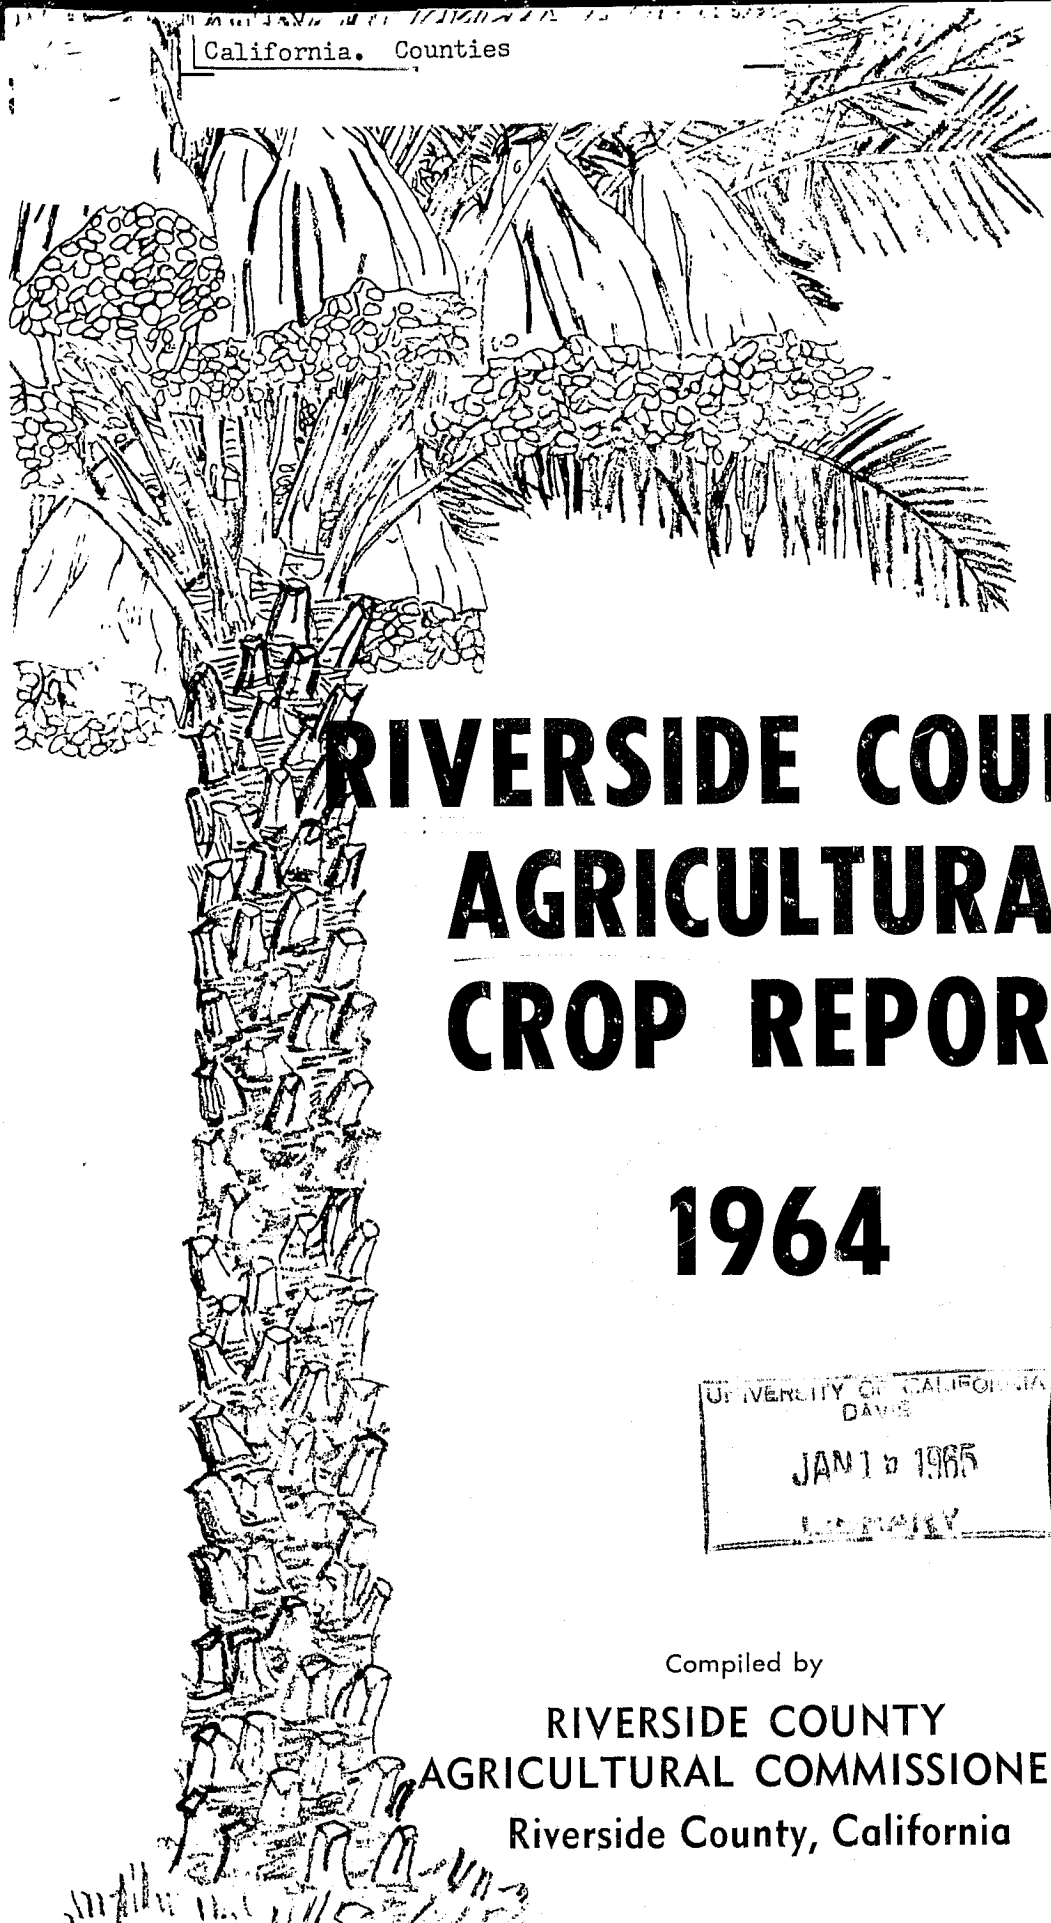

California County Agricultural Commissioners' Reports from the California Department of Food and Agriculture. This collection consists of annual crop and livestock data from each of the 58 California Counties. The collection covers 1915-1981; digitization of the rest of the collection is forthcoming.

This digitization project was funded by the Giannini Foundation of Agricultural Economics,
<http://giannini.ucop.edu/> .

The work was completed by the staff of the Giannini Foundation Library, University of California, Berkeley, <http://are.berkeley.edu/library/> . **Please contact the Library to consult the originals.**

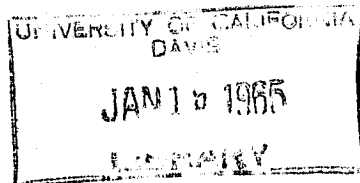

Three vertical black bars of varying widths are positioned on the left side of the page. The bars are solid black and extend from near the top to near the bottom of the page. The middle bar is the narrowest, while the two outer bars are wider and appear to be made of a textured or grainy material.

1964

RIVERSIDE COUNTY AGRICULTURAL CROP REPORT

1964

Compiled by
**RIVERSIDE COUNTY
AGRICULTURAL COMMISSIONER**
Riverside County, California

Mr. Charles Paul, Director
 California Department of Agriculture
 Riverside County Board of Supervisors
 Gentlemen:

In compliance with the requirements of Section 65.5 of the California Agricultural Code, I submit the annual report of the acreage, production, and valuation of the agricultural products of Riverside County for the year 1964.

The gross value of agricultural crops was \$110,598,305.00 a decrease of \$9,370,065.00 under the record set in 1963. The value of livestock production was \$96,668,890.00 an increase of \$11,786,456.00 over 1963. The total value of farm products grown in Riverside County in 1964 amounted to \$207,267,195.00, the greatest total value ever recorded in one year. The list of crops exceeding one million dollars in value increased from 20 in 1963 to 21 in 1964. Ensilage corn was replaced on the list by green onions and asparagus.

It must be emphasized that this report does not reflect profit to producers. It does, however, measure the amount of new wealth contributed to the economy of Riverside County by the agricultural industry.

The valuable assistance of all those persons who have provided the information and records necessary for the compilation of this report is acknowledged and appreciated.

Respectfully submitted,

ROBERT M. HOWIE
 Agricultural Commissioner

**RIVERSIDE COUNTY
AGRICULTURAL
CROP REPORT
1965**

Compiled by

**RIVERSIDE COUNTY
AGRICULTURAL COMMISSIONER**
Riverside County, California

Mr. Charles Paul, Director
 California Department of Agriculture
 Riverside County Board of Supervisors
 Gentlemen:

In compliance with the requirements of Section 65.5 of the California Agricultural Code, I submit the annual report of the acreage, production, and valuation of the agricultural products of Riverside County for the year 1965.

The gross value of agricultural crops was \$120,381,990.00, an increase of \$9,783,685.00 over the year 1964. This is \$413,620.00 more than the record high set in 1963 of \$119,968,370.00. The value of livestock production was \$96,264,047.00, a decrease of \$404,843.00 under 1964. The total value of farm products grown in Riverside County in 1965 amounted to \$216,646,037.00, the greatest total value ever recorded in one year. The list of crops exceeding one million dollars in value totaled 21, the same as for 1964. The only change in crops was that of apricots which was replaced by dry onions.

The report for dates represents the 1964 production which was marketed in 1965.

It must be emphasized that this report reflects a gross return and in no way represents a measure of profit to the producer.

The valuable assistance of all those persons who have provided the information and records necessary for the compilation of this report is acknowledged and appreciated.

Respectfully submitted,

ROBERT M. HOWIE
 Agricultural Commissioner

RIVERSIDE COUNTY

AGRICULTURAL COMMISSIONER'S OFFICE
County of Riverside

Supplement 1965 Crop Report

The increasing gross values of crops and livestock indicated each year by the release of the Annual Agricultural Crop Report for Riverside County has led to many false impressions regarding the prosperity of this basic industry.

By the utilization of a study entitled "1965 Farm Production Costs" compiled by Mr. N. L. McFarlane, Director Agricultural Extension Service and his capable staff and the Riverside County Crop Report the net profit or loss produced by twenty-five key crops is shown on the following pages.

Although it is not possible with the data available to calculate the profit or loss of all of the crops grown in the County, it's hoped the data presented will indicate the precarious economic condition of agriculture in Riverside County in 1965.

It should not be forgotten that profitable to the farmer or not the agricultural industry produced \$216,646,037.00 of new wealth to Riverside County in 1965 and remained a most important segment of the County's economy.

1966

California. Riverside County. Agricultural
Commissioner.
Report (annual). 1966.

RIVERSIDE COUNTY AGRICULTURAL CROP REPORT 1966

Compiled by
RIVERSIDE COUNTY
AGRICULTURAL COMMISSIONER
Riverside County, California

Mr. Charles Paul, Director
 California Department of Agriculture
 Riverside County Board of Supervisors
 Gentlemen:

In compliance with the requirements of Section 65.5 of the California Agricultural Code, I hereby submit the annual report of the acreage, production, and valuation of the agricultural products of Riverside County for the year 1966.

The gross value of agricultural crops was \$111,270,936.00, a decrease of \$9,111,054.00 from the year 1965. The value of livestock production was \$117,520,773.00, an increase of \$21,256,726.00 over 1965. The total value of farm products grown in Riverside County in 1966 amounted to \$228,791,709.00. This is \$12,145,672.00 more than the previous recorded high of \$216,646,037.00 in 1965. The list of crops exceeding one million dollars in value totaled 21, the same as for 1965. The only change in crops was that of table tomatoes which was replaced by cereal grain — hay.

The report for dates represents the 1965 production which was marketed in 1966.

It must be emphasized that this report reflects a gross return and in no way represents a measure of profit to the producer.

The valuable assistance of all those persons who have provided the information and records necessary for the compilation of this report is acknowledged and appreciated.

Respectfully submitted,

ROBERT M. HOWIE
 Agricultural Commissioner

RIVERSIDE COUNTY

Calif. Riverside County. Agricultural
Commissioner.
Report (annual). 1967.

RIVERSIDE COUNTY AGRICULTURAL CROP REPORT 1967

UNIVERSITY OF CALIFORNIA
DAVIS

JAN 20 1968

GOVT. DOCS. - LIBRARY

Compiled by

**RIVERSIDE COUNTY
AGRICULTURAL COMMISSIONER
Riverside County, California**

Mr. Earl Coke, Director
 California Department of Agriculture
 Riverside County Board of Supervisors
 Gentlemen:

In compliance with the requirements of Section 2279 of the California Agricultural Code, I hereby submit the annual report of the acreage, production, and valuation of the agricultural products of Riverside County for the year 1967.

The gross value of agricultural crops was \$121,767,026.00, an increase of \$10,496,090.00 over the year 1966. The value of livestock production was \$103,054,616.00, a decrease of \$14,466,157.00 over 1966. The total value of farm products, grown in Riverside County in 1967, amounted to \$224,821,742.00. This is \$3,969,967.00 less than the previous recorded high of \$228,791,709.00 in 1966. The list of crops exceeding one million dollars in value totaled 20, one less than was recorded in 1966. Three changes occurred in the list of crops, sweet corn and dry onions failed to make the list and watermelons were added to the list.

The report for dates represents the 1966 production which was marketed in 1967.

It must be emphasized that this report reflects a gross return and in no way represents a measure of profit to the producer.

The valuable assistance of all those persons who have provided the information and records necessary for the compilation of this report is acknowledged and appreciated.

Respectfully submitted,

ROBERT M. HOWIE
 Agricultural Commissioner

Report (annual). 1968.

RIVERSIDE COUNTY AGRICULTURAL CROP REPORT

1968

125 15 1968

Compiled by
**RIVERSIDE COUNTY
AGRICULTURAL COMMISSIONER**
Riverside County, California

Mr. Richard Lyng, Director
 California Department of Agriculture
 Riverside County Board of Supervisors
 Gentlemen:

In compliance with the requirements of Section 2279 of the California Agricultural Code, I hereby submit the annual report of the acreage, production, and valuation of the agricultural products of Riverside County for the year 1968.

The gross value of agricultural crops was \$122,326,146, an increase of \$559,120 over the year 1967. The value of livestock production was \$109,792,295, an increase of \$6,737,679 over 1967. The total value of farm products grown in Riverside County in 1968 amounted to \$232,118,441. This is \$3,326,732 more than the previous recorded high of \$228,791,709 in 1966. The list of crops exceeding one million dollars in value totaled 24, four more than were recorded in 1967. All crops found on the list for 1967 remained, and sweet corn, radishes, bell peppers, and sugar beets were added to the list.

The report for dates represents the 1967 production which was marketed in 1968.

It must be emphasized that this report reflects a gross return and in no way represents a measure of profit to the producer.

The valuable assistance of all those persons who have provided the information and records necessary for the compilation of this report is acknowledged and appreciated.

Respectfully submitted,

ROBERT M. HOWIE
 Agricultural Commissioner

RIVERSIDE COUNTY

California. Riverside Co. Agricultural
Commissioner.
Report. (Annual). 1970.

RIVERSIDE COUNTY AGRICULTURAL CROP REPORT 1970

Compiled by
**RIVERSIDE COUNTY
AGRICULTURAL COMMISSIONER**
Riverside County, California

Mr. Jerry W. Fielder, Director
California Department of Agriculture

Riverside County Board of Supervisors

Gentlemen:

In compliance with the requirements of Section 2279 of the California Agricultural Code, I hereby submit the annual report of the acreage, production, and valuation of the agricultural products of Riverside County for the year 1970.

The gross value of agricultural crops was \$129,330,052, an increase of \$10,462,494 over the year 1969. The value of livestock production was \$131,411,873, a decrease of \$1,999,854 from 1969. The total value of farm products grown in Riverside County in 1970 amounted to \$260,741,925. This is \$8,462,640 more than the previous recorded high of \$252,279,285 in 1969. The list of crops exceeding one million dollars in value totaled 22, the same number that was recorded in 1969. Apricots were dropped from the list and grain hay was added for 1970.

The report for dates represents the 1969 production which was marketed in 1970.

It must be emphasized that this report reflects a gross return and in no way represents a measure of profit to the producer. Values on all crops are F. O. B. - Point of Shipment.

The valuable assistance of all those persons who have provided the information and records necessary for the compilation of this report is acknowledged and appreciated.

Respectfully submitted,

ROBERT M. HOWIE
Agricultural Commissioner

RIVERSIDE COUNTY

TOTAL APIARY PRODUCTION VALUATIO

NOTE: VALUES ON ALL CROPS ARE F. O. B.

In compliance with the requirements of Section 2279 of the California Agricultural Code, I hereby submit the annual report of the acreage, production, and valuation of the agricultural products of Riverside County for the year 1971.

The gross value of agricultural crops was \$143,052,215, an increase of \$13,722,163 over the year 1970. The value of livestock production was \$124,157,534, a decrease of \$7,254,339 from 1970. The total value of farm products grown in Riverside County in 1971 amounted to \$267,209,749. This is \$6,467,824 more than the previous recorded high of \$260,741,925 in 1970. The list of crops exceeding one million dollars in value totaled 24, two more than was recorded in 1970. Bell peppers and watermelons were added to the list for 1971.

The report for dates represents the 1970 production which was marketed in 1971.

It must be emphasized that this report reflects a gross return and in no way represents a measure of profit to the producer. Values on all crops are F.O.B. - Point of Shipment.

The valuable assistance of all those persons who have provided the information and records necessary for the compilation of this report is acknowledged and appreciated.

Respectfully submitted,

ROBERT M. HOWIE
 Agricultural Commissioner

RIVERSIDE COUNTY

RIVERSIDE COUNTY AGRICULTURAL CROP REPORT 1972

Compiled by

RIVERSIDE COUNTY
AGRICULTURAL COMMISSIONER
Riverside County, California

Mr. C. B. Christensen, Director
 California Department of Agriculture
 Riverside County Board of Supervisors
 Gentlemen:

In compliance with the requirements of Section 2279 of the California Agricultural Code, I hereby submit the annual report of the acreage, production, and valuation of the agricultural products of Riverside County for the year 1972.

The gross value of agricultural crops was \$152,395,000, an increase of \$9,343,000 over the year 1971. The value of livestock production was \$140,085,000, an increase of \$15,927,000 over 1971. The total value of farm products grown in Riverside County in 1972 amounted to \$292,480,000. This is \$25,270,000 more than the previous recorded high of \$267,210,000 in 1971. The list of crops exceeding one million dollars in value totaled 22, two less than were recorded in 1971. Cereal grain hay, bell peppers, and watermelons were dropped from the list and dry onions were added to the list for 1972.

The report for dates represents the 1971 production which was marketed in 1972.

It must be emphasized that this report reflects a gross return and in no way represents a measure of profit to the producer. Values on all crops are F. O. B. - Point of Shipment.

The valuable assistance of all those persons who have provided the information and records necessary for the compilation of this report is acknowledged and appreciated.

Respectfully submitted,

ROBERT M. HOWIE
 Agricultural Commissioner

RIVERSIDE COUNTY

RIVERSIDE COUNTY AGRICULTURAL CROP REPORT 1973

UNIVERSITY OF CALIFORNIA
DAVIS

JAN - 4 1974

GOV'T. DOCS. - LIBRARY

Compiled by
**RIVERSIDE COUNTY
AGRICULTURAL COMMISSIONER**
Riverside County, California

Mr. C. B. Christensen, Director
 California Department of Agriculture
 Riverside County Board of Supervisors
 Gentlemen:

In compliance with the requirements of Section 2279 of the California Agricultural Code, I hereby submit the annual report of the acreage, production, and valuation of the agricultural products of Riverside County for the year 1973.

The gross value of agricultural crops was \$201,984,000, an increase of \$49,589,000 over the year 1972. The value of livestock production was \$194,745,000, an increase of \$54,660,000 over 1972. The total value of farm products grown in Riverside County in 1973 amounted to \$396,729,480,000. This is \$104,249,000, more than the previous recorded high of \$292,480,000 in 1972. The list of crops exceeding one million dollars in value totaled 29, seven more than were recorded in 1972. Watermelons, grapes (wine), milo maize, hay (oats), apiculture, temples, and tomatoes (cannery) were added to the list for 1973.

The report for dates represents the 1972 production which was marketed in 1973.

It must be emphasized that this report reflects a gross return and in no way represents a measure of profit to the producer. Values on all crops are F. O. B. — Point of Shipment.

The valuable assistance of all those persons who have provided the information and records necessary for the compilation of this report is acknowledged and appreciated.

Respectfully submitted,

ROBERT M. HOWIE
 Agricultural Commissioner

RIVERSIDE COUNTY AGRICULTURAL CROP REPORT 1974

Compiled by
RIVERSIDE COUNTY
AGRICULTURAL COMMISSIONER
Riverside County, California

Mr. C. B. Christensen, Director
 California Department of Agriculture
 Riverside County Board of Supervisors
 Gentlemen:

In compliance with the requirements of Section 2279 of the California Agricultural Code, I hereby submit the annual report of the acreage, production, and valuation of the agricultural products of Riverside County for the year 1974.

The gross value of agricultural crops was \$198,938,000, a decrease of \$3,046,000 from the previous year 1973. The value of livestock production was \$192,862,000, a decrease of \$1,883,000 from 1973. The total value of farm products grown in Riverside County in 1974 amounted to \$391,800,000. This is \$4,929,000 less than the previous recorded high of \$396,729,000 in 1973. The list of crops exceeding one million dollars in value totaled 30, one more than was recorded in 1973. Okra, summer squash, and tangelos were added while grapes (wine) and milo maize were dropped in 1974.

The report for dates represents the 1973 production which was marketed in 1974.

It must be emphasized that this report reflects a gross return and in no way represents a measure of profit to the producer. Values on all crops are F. O. B. — Point of Shipment.

The valuable assistance of all those who have provided the information and records necessary for the compilation of this report is acknowledged and appreciated.

Respectfully submitted,

ROBERT M. HOWIE
 Agricultural Commissioner

RIVERSIDE COUNTY

AGRICULTURAL

CROP REPORT

JAN 13 1977

1975

Compiled by
RIVERSIDE COUNTY
AGRICULTURAL COMMISSIONER
Riverside County, California

Mr. L. T. Wallace, Director
California Department of Agriculture
Riverside County Board of Supervisors
Gentlemen:

75-1

In compliance with the requirements of Section 2279 of the California Agricultural Code, I hereby submit the annual report of the acreage, production, and valuation of the agricultural products of Riverside County for the year 1975.

The gross value of agricultural crops was \$265,452,000, an increase of \$66,514,000 from the previous year 1974. The value of livestock production was \$193,702,000, an increase of \$840,000 from 1974. The total value of farm products grown in Riverside County in 1975 amounted to \$459,154,000. This is a \$67,354,000 increase from the previous total of \$391,800,000 in 1974, and an increase of \$62,425,000 more than the previous recorded high of \$396,729,000 in 1973. The list of crops exceeding one million dollars in value totaled 29, one less than was recorded in 1974. Asparagus and okra were dropped while cabbage was added.

The report for dates represents the 1974 production which was marketed in 1975.

It must be emphasized that this report reflects a gross return and in no way represents a measure of profit to the producer. Values on all crops are F. O. B. — Point of Shipment.

The valuable assistance of all those who have provided the information and records necessary for the compilation of this report is acknowledged and appreciated.

Respectfully submitted,

ROBERT M. HOWIE
Agricultural Commissioner

RIVERSIDE COUNTY AGRICULTURAL CROP REPORT

Commissioner

1976

UNIVERSITY OF CALIFORNIA
DAVIS
ENTD
GOVT. DOCS. - LIBRARY

Compiled by
**RIVERSIDE COUNTY
AGRICULTURAL COMMISSIONER**
Riverside County, California

Mr. L. T. Wallace, Director
California Department of Agriculture
Riverside County Board of Supervisors
Gentlemen:

75-1

In compliance with the requirements of Section 2279 of the California Agricultural Code, I hereby submit the annual report of the acreage, production and valuation of the agricultural products of Riverside County for the year 1976.

The gross value of agricultural crops was \$276,930,200, an increase of \$11,478,200 from the previous year 1975. The value of livestock production was \$215,970,000 an increase of \$22,268,000 from 1975. The total value of farm products grown in Riverside County in 1976 amounted to \$492,900,200. This is a \$33,746,200 increase from the previous total of \$459,154,000 in 1975. The list of crops exceeding one million dollars in value totaled 32, three more than were recorded in 1975. Tangelos were dropped while eggplant, corn ensilage, avocados and Sudan were added.

The report for dates represents the 1975 production which was marketed in 1976.

It must be emphasized that this report reflects a gross return and in no way represents a measure of profit to the producer. Values on all crops are F. O. B. - Point of Shipment.

The valuable assistance of all those who have provided the information and records necessary for the compilation of this report is acknowledged and appreciated.

Respectfully submitted,

Robert M. Howie
Agricultural Commissioner
