California Department of Food and Agriculture

Agricultural Commissioners' Crop Reports

Santa Barbara County

1941-1960

California County Agricultural Commissioners' Reports from the California Department of Food and Agriculture. This collection consists of annual crop and livestock data from each of the 58 California Counties. The collection covers 1915-1981; digitization of the rest of the collection is forthcoming.

This digitization project was funded by the Giannini Foundation of Agricultural Economics,
<http://giannini.ucop.edu/>.

The work was completed by the staff of the Giannini Foundation Library, University of California, Berkeley, <http://are.berkeley.edu/library/>. **Please contact the Library to consult the originals.**

1941

AGRICULTURAL CROP REPORT

SANTA BARBARA COUNTY

Compiled by Eugene S. Kellogg, County Agricultural Commissioner

JANUARY 1, 1942

	ACREAGE		*F.O.B. VALUE	
	1940	1941	1940	1941
	Orchard Crops	12,290	12,558	\$3,623,924

Total	28,998	24,141	11,983	11,776	\$5,716,870	\$8,437,045

Note: Acreage of each crop planted as indicated, except mixed and miscellaneous, which includes also acreage for asparagus, beets, Bell peppers, corn, cucumbers, cabbage, onions, parsley, radishes, rhubarb, spinach, squash, sweet potatoes, and turnips.

Note: While returns this year are higher with smaller acreage in comparison to last year's figures, the net profit to the farmer is lower, due to the increased cost of production, such as high labor, operating and material costs.

Agricultural Crop
Report
1946

UNIVERSITY OF CALIFORNIA
LIBRARY
COLLEGE OF AGRICULTURE
DAVIS

Department of Agriculture

SANTA BARBARA COUNTY, CALIFORNIA

TO A. A. Brock, Director of the California State Dept. of Agriculture, and the Honorable Board of Supervisors of Santa Barbara County, California

The acreages shown in this report are the planted acres of fruit and orchard crops and harvested acres of field and vegetable crops. Yields are given in commercial packages or by weight. The valuation is the F.O.B. value, and includes the cost of production, harvesting, grading and packaging. The valuation, therefore, is not the income to the farmer but the gross valuation of agricultural production.

In comparison of the returns of 1946 with those of previous years, consideration should be given to increased costs of all operations from production to packaging. In some cases, low yields per acre, high operating costs, etc., have left little for the farmer.

My thanks are extended to the many individuals, companies and organizations for their very fine cooperation in giving to the various inspectors the necessary data from which this Crop Report is compiled.

Walter S. Cummings,
Agricultural Commissioner

Agricultural Crop Report 1947

OFFICE OF THE COUNTY AGROLOGIST
SANTA BARBARA COUNTY
BUREAU OF AGRICULTURE
DAVIS

Department of Agriculture
SANTA BARBARA COUNTY, CALIFORNIA

TO A. A. Brock, Director of the California State Dept. of Agriculture, and the Honorable Board of Supervisors of Santa Barbara County, California

The acreages shown in this report are the planted acres of fruit and orchard crops and harvested acres of field and vegetable crops. Yields are given in commercial packages or by weight. The valuation is the F.O.B. value, and includes the cost of **production, harvesting, grading and packaging**. The valuation, therefore, is not the income to the farmer but the gross valuation of agricultural production.

In comparison of the returns of 1947 with those of previous years, consideration should be given to increased costs of all operations from production to packaging. In some cases, low yields per acre, high operating costs, etc., have left little for the farmer.

My thanks are extended to the many individuals, companies and organizations for their very fine cooperation in giving to the various inspectors the necessary data from which this crop Report is compiled.

Walter S. Cummings,
Agricultural Commissioner

Department of Agriculture
1948*

Department of Agriculture
SANTA BARBARA COUNTY, CALIFORNIA

TO A. A. Brock, Director of the California State Department of Agriculture, and the Honorable Board of Supervisors of Santa Barbara County, California

The acreages shown in this report are the planted acres of fruit and orchard crops and harvested acres of field and vegetable crops. Yields are given in commercial packages or by weight. The valuation is the F.O.B. value, and includes the cost of production, harvesting, grading and packaging. The valuation, therefore, is not the income to the farmer but the gross valuation of agricultural production.

The scarcity of rainfall materially reduced the yield and quality of many crops. Farm prices for most crops fell below those of previous years, although cost for material, labor, transportation, etc., have remained at a high level.

My thanks are extended to the many individuals, companies and organizations for their very fine cooperation in giving to the various inspectors the necessary data from which this Crop Report is compiled.

Walter S. Cummings,
Agricultural Commissioner

Agricultural Crop Report

1949

Department of Agriculture
SANTA BARBARA COUNTY, CALIFORNIA

TO A. A. BROCK, Director of the California State Department of Agriculture, and the Honorable Board of Supervisors of Santa Barbara County, California.

Farm prices for most crops fell below those of previous years, although cost for material, labor, transportation etc., have remained at a high level.

The acreages shown in this report are the planted acres of fruit and orchard crops and harvested acres of field and vegetable crops. Yields are given in commercial packages or by weight. The valuation is the F.O.B. value, and includes the cost of production, harvesting, grading and packaging. The valuation, therefore, is not the income to the farmer but the gross valuation of agricultural production.

My sincere thanks are extended to the many individuals, companies and organizations for their very fine cooperation in making available the necessary data from which this Crop Report is compiled.

Walter S. Cummings
Agricultural Commissioner

The acreages shown in this report are the planted acres of fruit and orchard crops and harvested acres of field and vegetable crops. Yields are given in commercial packages or by weight. The valuation is the F.O.B. value, and includes the cost of production, harvesting, grading and packaging. The valuation, therefore, is not the income to the farmer but the gross valuation of agricultural production.

The total F.O.B. value was less this year due to the lower prices for some of the major crops and decreased production and plantings of others. The costs of production of agricultural crops have remained at a high level, and have increased in many instances.

My sincere thanks are extended to the many individuals, companies and organizations for their very fine cooperation in making available the necessary data from which this Crop Report is compiled.

Walter S. Cummings
Agricultural Commissioner

Agricultural Crop Report

1952

DEPARTMENT OF AGRICULTURE
SANTA BARBARA COUNTY, CALIFORNIA

LIBRARY
UNIVERSITY OF CALIFORNIA
DAVIS

TO A.A. BROCK, Director of the California State Department of Agriculture, and the Honorable Board of Supervisors of Santa Barbara County, California.

The acreages shown in this report are the planted acres of fruit and orchard crops and harvested acres of field and vegetable crops. Yields are given in commercial packages or by weight. The value shown in this report is the F.O.B. value, which includes the costs of harvesting, grading and packaging, as well as the cost of production. The F.O.B. value is NOT the

net income to the farmer but is the gross valuation of agricultural production. Increased costs have reduced the net returns to the farmer, even though the gross valuation is somewhat higher this year.

My sincere thanks are extended to the many individuals, companies and organizations for their very fine cooperation in making available the necessary data from which this Crop Report is compiled.

Walter S. Cummings
Agricultural Commissioner

1953

Agricultural Crop Report

1953

DEPARTMENT OF AGRICULTURE
SANTA BARBARA COUNTY, CALIFORNIA

LIBRARY
UNIVERSITY OF CALIFORNIA
DAVIS

TO W. C. JACOBSEN, Director of the California State Department of Agriculture, and the Honorable Board of Supervisors of Santa Barbara County, California.

The acreages shown in this report are the planted acres of fruit and orchard crops and harvested acres of field and vegetable crops. Yields are given in commercial packages or by weight. The value shown in this report is the F.O.B. value, which includes the costs of harvesting, grading and packaging, as well as the cost of production. The F.O.B. value is NOT the net income to the farmer

but is the gross valuation of agricultural production. Declining prices and decreased yields of many farm commodities have resulted in a substantial reduction of the gross valuation from that of the record high of last year.

My sincere thanks are extended to the many individuals, companies and organizations for their very fine cooperation in making available the necessary data from which this Crop Report is compiled.

Walter S. Cummings
Agricultural Commissioner

1954

Agricultural Crop Report

1954

DEPARTMENT OF AGRICULTURE
SANTA BARBARA COUNTY, CALIFORNIA

LIBRARY
UNIVERSITY OF CALIFORNIA
DAVIS

TO W.C. JACOBSEN, Director of the California State Department of Agriculture, and the Honorable Board of Supervisors of Santa Barbara County, California.

The acreages shown in this report are the planted acres of fruit and orchard crops and harvested acres of field and vegetable crops. Yields are given in commercial packages or by weight. The value shown in this report is the F.O.B. value, which includes the costs of harvesting, grading and packaging, as well as the cost of production. The F.O.B. value is NOT the net income to the farmer but is the

gross valuation of agricultural production. Increases in the yields of some crops and in the acreage of others have tended to offset lower returns resulting in a slightly higher gross valuation than last year.

My sincere thanks are extended to the many individuals, companies and organizations for their very fine cooperation in making available the necessary data from which this Crop Report is compiled.

Walter S. Cummings
Agricultural Commissioner

Agricultural Crop Report

1955

MAR 2 1955

DEPARTMENT OF AGRICULTURE
SANTA BARBARA COUNTY, CALIFORNIA

TO W.C. JACOBSEN, Director of the California State Department of Agriculture, and the Honorable Board of Supervisors of Santa Barbara County, California.

The acreages shown in this report are the planted acres of fruit and orchard crops and harvested acres of field and vegetable crops. Yields are given in commercial packages or by weight. The value shown in this report is the F. O. B. value, which includes the costs of harvesting, grading and packaging, as well as the cost of production. The F. O. B. value is NOT the net income to the farmer but is the

gross valuation of agricultural production. Increases in the yields of some crops and in the acreage of others has resulted in a slightly higher gross valuation than last year.

My sincere thanks are extended to the many individuals, companies and organizations for their very fine cooperation in making available the necessary data from which this Crop Report is compiled.

Walter S. Cummings
Agricultural Commissioner

Agricultural Crop Report

1959

UNIVERSITY OF CALIFORNIA
DAVIS
MAY 3 1960
LIBRARY

DEPARTMENT OF AGRICULTURE
SANTA BARBARA COUNTY, CALIFORNIA

TO WILLIAM E. WARNE, Director, California State Department of Agriculture, and the Honorable Board of Supervisors of Santa Barbara County, California.

The acreages shown in this report are the planted acres of fruit and nut crops and harvested acres of field and vegetable crops. The gross value shown is the F.O.B. value at shipping point, which included the cost of harvesting, grading and packaging, as well as the cost of production. This report does NOT indicate returns or profits to the producers or farmers. It does, however, show the amount of new wealth contributed by agriculture to the economy of Santa Barbara County. Agriculture continues to play an important part in the economics of Santa Barbara County and will continue to do so despite the increasing urbanization in some areas.

This year at the request of the State Department of Agriculture, several changes have been made in items included and the method of reporting. These changes were made to attain uniformity with reports of other crop reporting agencies.

My sincere thanks are extended to the many individuals, companies and organizations for their very fine cooperation in making available the necessary data from which this Crop Report is compiled.

Walter S. Cummings

Agricultural Commissioner

Agricultural Crop
Report

1960

DEPARTMENT OF AGRICULTURE
SANTA BARBARA COUNTY, CALIFORNIA

TO CHARLES PAUL, Director, California State Department of Agriculture, and the Honorable Board of Supervisors of Santa Barbara County, California.

The acreages shown in this report are the planted acres of fruit and nut crops and harvested acres of field and vegetable crops. The gross value shown is the F.O.B. value at first shipping point, which includes the cost of harvesting, grading and packaging, as well as the cost of production. This report does NOT indicate returns or profits to the producers or farmers. It does, however, show the amount of new wealth contributed by agriculture to the economy of Santa Barbara County. Agriculture continues to play an important part in the economics of Santa Barbara County and will continue to do so despite the increasing urbanization in some areas.

This year, at the request of the State Department of Agriculture, several changes have been made in items included and the method of reporting. These changes were made to attain uniformity with reports of other crop reporting agencies.

My sincere thanks are extended to the many individuals, companies and organizations for their very fine cooperation in making available the necessary data from which this Crop Report is compiled.

Walter S. Cummings

Agricultural Commissioner

NURSERY PRODUCTS: Production Area, Sales and Value 1959-60
