California Department of Food and Agriculture

Agricultural Commissioners' Crop Reports

Santa Clara County

1966-1969

California County Agricultural Commissioners' Reports from the California Department of Food and Agriculture. This collection consists of annual crop and livestock data from each of the 58 California Counties. The collection covers 1915-1981; digitization of the rest of the collection is forthcoming.

This digitization project was funded by the Giannini Foundation of Agricultural Economics,
<http://giannini.ucop.edu/> .

The work was completed by the staff of the Giannini Foundation Library, University of California, Berkeley, <http://are.berkeley.edu/library/> . Please contact the Library to consult the originals.

DEPARTMENT OF AGRICULTURE THEODORE J. MONIZ, COMMISSIONER
75 WEST ST. JAMES STREET
SAN JOSE, CALIFORNIA 95113

299-2171

March 15, 1967

MR. EARL COKE, DIRECTOR
CALIFORNIA DEPARTMENT OF AGRICULTURE:

THE HONORABLE BOARD OF SUPERVISORS OF THE
COUNTY OF SANTA CLARA:

AND:

MR. HOWARD W. CAMPEN, COUNTY EXECUTIVE:

Gentlemen:

This 1966 Annual Agricultural Crop Report for the County of Santa Clara, is herewith submitted in accordance with the provision of Section 65.5 of the California Agricultural Code.

The report shows the acreage, production and gross values of the commercial crops and products produced in the County.

Also included in this report, as a point of interest, are two data sheets, one showing the "Acreage Trend" of our total bearing and non-bearing acreage of fruit, nut and grape crops from 1950 through 1966, and the other showing the bearing and non-bearing acreage of our major fruit and nut crops for North and South County, using Coyote as the dividing line.

A. C. P. payments are not included in the gross value figures, but are only reported for informational purposes.

I wish to take this opportunity to express my appreciation and to sincerely thank all individuals and organizations who so willingly cooperated with this department in contributing the information necessary for this report.

To all the members of my staff, expressed appreciation is being given for their efforts in the compilation of this report.

Respectfully submitted,

THEODORE J. MONIZ
AGRICULTURAL COMMISSIONER

COUNTY OF SANTA CLARA

COMMENTS ON 1966 CROP PRODUCTION

Santa Clara County experienced a dry spring season with less than 2" of rain after February 1, 1966. This coupled with unusually warm weather resulted in a 7 to 10 day earlier harvest date for many crops. It also was the cause for extra irrigations of field, vegetable and orchard crops. In spite of adverse weather conditions, as well as decreased prices for some of the major crops, the total gross income was \$71,744,000. an increase of over 1 million dollars over 1965.

Fruit and nut tree acreage showed a loss of approx 2200 acres over the previous year. Urbanization was responsible for the bulk of this loss, although a few of the older orchards were replaced by vegetable, cut flower, and berry crops.

Apricot growers partially recovered from a near disastrous 1965 season. 1966 gross farm income from this crop was up almost one million dollars over the previous year on slightly less tonnage.

1966 prune prices for good quality fruit were the highest since 1961. In spite of reduced acreage and some poor quality fruit due to sunburn, side and end cracks, and small sizes, growers realized more than 1 million dollars over the 1965 gross income.

Livestock and poultry raisers benefited from slightly higher prices for meat, milk and eggs. However, total production in these commodities were less than in the previous year. This resulted in a decrease of almost 2 million dollars.

After considerable field experience with mechanical tomato harvesting equipment in 1965, local growers of canning tomatoes increased their acreage to 7,000 acres in 1966. Approximately 5,000 of the 7,000 acres were picked by about 50 of these harvester.

The fact that no established price was available for Bartlett and Hardy canning pears, when this report was prepared, an estimated price was used to compute the values, consequently the gross return for all pears showed a loss of \$2,073,250. Pear Decline continues to plague local pear growers. This disease was severe during 1966 and appears to be on the increase. Pear psylla populations were high last year and an apparent immunity to some spray chemicals was noted. This insect pest is considered to be the vector and the cause of the spread of this serious pear disease. To complicate the Pear Decline situation we now have the Pear Leaf Purple Curl disorder, a virus disease that may be transmitted by psylla, budding or seed.

Cut flowers led all individual crops in dollar value for the second season in a row. Increased field and green house growing areas and slightly higher prices per bloom resulted in a \$12,171,000 gross return to county flower growers. Lack of air transportation during the airplane strike caused considerable concern to this industry and prevented many eastern shipments, which resulted in a considerable loss of revenue.

SAN JOSE, CALIFORNIA 95113

299-2171

March 15, 1968

MR. EARL COKE, DIRECTOR
CALIFORNIA DEPARTMENT OF AGRICULTURE:

THE HONORABLE BOARD OF SUPERVISORS OF THE
COUNTY OF SANTA CLARA:

AND

MR. HOWARD W. CAMPEN, COUNTY EXECUTIVE:

Gentlemen:

In accordance with the provisions of Section 2279 of the California Agricultural Code, I am pleased to submit this 1967 Annual Agricultural Crop Report of the acreage, production and valuation of the agricultural crops and products of the County of Santa Clara.

The gross value of the commercial crops and products produced was \$71,978,895, which is an increase of \$376,100 over the year 1966. It must be emphasized that this report reflects a gross return and in no way represents the actual profit to the producer.

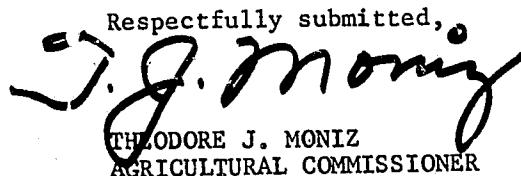

A. C. P. payments are not included in the gross value figures, but are only reported for informational purposes.

As a point of interest, also included in this report are three data sheets, one showing crops and products exceeding "One Million" dollars in value, one showing the "Acreage Trend" of our bearing and non-bearing acreage of our major fruit, nut and grape crops, and one showing the acreage of our major fruit, nut and grape crops for North and South County, using Coyote as the dividing line.

I wish to express my sincere appreciation for the cooperation and assistance of all individuals and organizations who so willingly cooperated with this department in contributing the information necessary to make this report possible.

To all the members of my staff, I express my sincere thanks for their diligent efforts in obtaining and compiling the information reflected in this report.

Respectfully submitted,

THEODORE J. MONIZ
AGRICULTURAL COMMISSIONER

COMMENTS ON 1967 CROP PRODUCTION

Production for most of the deciduous fruit crops in Santa Clara County was greatly reduced because of a very poor fruit set due to the prolonged rainy period during late March and April, while the fruit crops were in bloom. From this report it is quite evident that prune production was not as severely affected as were apples, apricots, cherries and pears. Prune production was up slightly, but a three to one dry-away was experienced along with a larger tonnage of smaller and inferior fruit. Due to lower prices the gross income for prunes decreased from \$10,212,900.00 to \$8,781,500.00, consequently prunes lost its rating in rank as the number one crop in Santa Clara County.

Apple income decreased \$38,100.00, apricot production dropped 12,840 tons below the 34,000 tons for 1966, and the value decreased \$1,541,000.00, cherries dropped from \$3,236,000.00 to \$1,189,000.00. Pear production undoubtedly suffered the greatest loss, decreasing from 57,710 tons to 20,445 tons, and even though pears received one of the highest prices ever paid the value still decreased \$1,417,100.00. Walnut production was lower, but due to higher prices the gross income increased \$285,000.00. Though higher prices were paid for most of the crops the over all gross income returns for all fruits, grapes and nuts decreased \$6,283,700.00. There was also a reduction of 4,123 acres of our major fruit crops, with prunes losing 2,164 acres. Strawberry production and gross value exceeded that of 1966, even though the first crop was damaged and picking hampered by wet weather.

Even though inclement weather severely hampered seeding and planting of many of our vegetable crops, and with approximately 1600 additional acres planted over 1966, the overall total gross value increased from \$13,223,600.00 to \$16,926,300.00, with tomatoes (the number two crop in Santa Clara County), cucumbers and bell peppers showing the largest increases, these three vegetable crops have received a place in the million dollar income category.

Additional new plantings of cut flowers in Santa Clara County continues to increase steadily. Total production area under glass, plastic or fiberglass is 11,267,000 square feet, and there was approximately 155 acres producing outdoor chrysanthemums, asters, gladioli, iris, daisies, statice, strawflowers, sweet peas and other cut flowers.

The total gross income for all cut flowers increased \$2,474,400.00, with chrysanthemums leading all other crops produced in the county in dollar value with a gross income of \$10,021,000.00, and now holds the number one rating in rank as the leading individual gross income crop in the County. Carnations also showed an increase in income of from \$2,494,000.00 to \$3,265,000.00.

With nearly ten (10) inches of rain falling in late March and April, which caused considerable anguish and near disaster for some crops, it nevertheless was beneficial from the standpoint of maintaining our water level. Most of the reservoirs were filled to capacity, and maintained a favorable water level throughout the summer. Pasture and range land benefited tremendously, and generally provided ample range feed for livestock throughout the summer months. Because of the late rains most growers saved from one to two irrigations of their orchards, and the same was true for other crops.

**MR. JERRY W. FIELDER
CALIFORNIA DEPARTMENT OF AGRICULTURE:**

**THE HONORABLE BOARD OF SUPERVISORS OF THE
COUNTY OF SANTA CLARA:**

AND

MR. HOWARD W. CAMPEN, COUNTY EXECUTIVE:

Gentlemen:

In accordance with the provisions of Section 2279 of the California Agricultural Code, I am pleased to submit this 1968 Annual Agricultural Crop Report of the acreage, production and valuation of the agricultural crops and products of the County of Santa Clara.

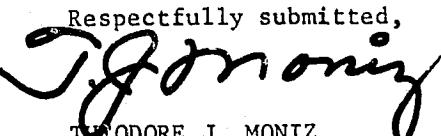

The gross value of the commercial crops and products produced was \$75,068,425, which is an increase of \$2,970,330 over the year 1967. It must be emphasized that this report reflects a gross return and in no way represents the actual profit to the producer.

Again, as a point of interest, also included in this report are three data sheets, one showing crops and products exceeding "One Million" dollars in value, one showing the "Acreage Trend" of our bearing and non-bearing acreage of our major fruit, nut and grape crops, and one showing the acreage of our major fruit, nut and grape crops for North and South County, using Coyote as the dividing line.

I wish to express my sincere appreciation for the cooperation and assistance of all individuals and organizations who so willingly cooperated with this department in contributing the information necessary to make this report possible.

To all the members of my staff, I express my sincere thanks for their diligent and conscientious efforts in obtaining and compiling the information for this report.

Respectfully submitted,

**THEODORE J. MONIZ
AGRICULTURAL COMMISSIONER**

COMMENTS ON 1968 CROP PRODUCTION

The 1968 total gross agricultural income for all crops, including livestock, poultry and their products that were produced in Santa Clara County was \$75,068,425., which is an increase of nearly \$3,000,000. over that of 1967. The 1968 total is also the highest since 1961, which was \$77,008,400.

The total gross incomes for berries, vegetables, field crops, cut flowers, honey, livestock and poultry products showed a slight decrease from 1967, but substantial increases are shown for deciduous fruits, nuts, grapes, seed crops, livestock and poultry.

For the second consecutive year, despite marketing difficulties from transportation problems and a surplus of flowers in midsummer, chrysanthemums, as a cut flower crop with a gross income of \$9,393,000. still holds the number one spot as the leading income crop in Santa Clara County.

Tomatoes and prunes, again ranked second and third respectively, for the second year in a row, with respective gross incomes of \$8,563,000. and \$8,498,000. It was anticipated that tomato tonnage per acre would show an increase over that of 1967, but due to unexpected heavy rains during the late harvest season, which spoiled considerable tonnage, the yield dropped from 25.7 tons per acre to 24.5. Even though prune prices were slightly higher in 1968, the gross income decrease of \$273,400. was due to a slightly lower yield per acre and a loss of 650 bearing acres.

Higher prices and better yields for most of the deciduous fruit, nut and grape crops is the reason for the \$23,982,700 gross value for all these crops, which is an increase of \$3,494,100 over 1967. A below normal yield of apricots, and a loss of nearly 10,000 tons of a predicted large bartlett pear crop that was not harvested because of sizing problems, accounted for a lesser increase than was anticipated.

In contrast to the spring of 1967, an early, warm, spring brought rapid development in all tree crops. The average bloom date was about 10 to 15 days early. Three warm days in late March, with a high of 82 degrees, did affect the apricot fruit set, and some injury was evident on prune and pear blossoms. Spotty severe frost in the San Martin - Gilroy area on the mornings of April 17th. through the 22nd., with temperatures as low as 28 degrees, caused some damage to walnuts, prunes, pears and tomatoes.

MR. JERRY W. FIELDER, DIRECTOR
CALIFORNIA DEPARTMENT OF AGRICULTURE:

THE HONORABLE BOARD OF SUPERVISORS OF THE
COUNTY OF SANTA CLARA:

AND

MR. HOWARD W. CAMPEN, COUNTY EXECUTIVE:

Gentlemen:

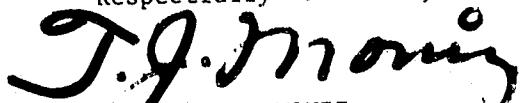

In accordance with the provisions of Section 2279 of the California Agricultural Code, I am pleased to submit this 1969 Annual Agricultural Crop Report of the acreage, production and valuation of the agricultural crops and products produced in the County of Santa Clara.

The gross value of the commercial crops and products produced was \$68,628,765, which is \$6,088,860 less than the year of 1968. It must be emphasized that this report reflects a gross return and in no way represents the actual profit to the producer.

I wish to express my sincere appreciation for the cooperation and assistance of all individuals and organizations who so willingly cooperated with this department in contributing the information necessary to make this report possible.

To all the members of my staff, I express my sincere thanks for their diligent and conscientious effort in obtaining and compiling the information for this report.

Respectfully submitted,

THEODORE J. MONIZ
AGRICULTURAL COMMISSIONER
