California Department of Food and Agriculture

Agricultural Commissioners' Crop Reports

Stanislaus County

1974-1978

California County Agricultural Commissioners' Reports from the California Department of Food and Agriculture. This collection consists of annual crop and livestock data from each of the 58 California Counties. The collection covers 1915-1981; digitization of the rest of the collection is forthcoming.

This digitization project was funded by the Giannini Foundation of Agricultural Economics,
<http://giannini.ucop.edu/> .

The work was completed by the staff of the Giannini Foundation Library, University of California, Berkeley, <http://are.berkeley.edu/library/> . **Please contact the Library to consult the originals.**

L. T. Wallace, Director
California Department of Food and Agriculture
and
The Honorable Board of Supervisors
Stanislaus County

Gentlemen:

In accordance with section 2279 of the California Food and Agriculture Code, the 1974 Crop Report for Stanislaus County is hereby submitted. The total gross income is estimated to have been \$426,581,000. It is emphasized that this figure represents gross income only, and does not indicate net income.

Although the 1974 gross income was 12.4 percent above that of 1973, and is a new high for the County, operational, production and marketing costs are also at record levels. Labor, fuel, feed, fertilizer and pesticide costs have had a serious affect on net incomes.

Moreover, many commodities were subject to drastic reductions in market values. The market prices received for nine major commodities averaged 32 percent below those received in 1973, and this of course had a further impact on net incomes.

The County's ten leading commodities in 1974 were:

Milk, all	\$79,561,000
Chickens, all	68,412,000
Egg, chicken, all	44,575,000
Cattle & calves, all	34,999,000
Peaches, all	27,030,000
Almonds	18,706,000
Alfalfa	17,415,000
Tomatoes, all	16,597,000
Grapes, all	14,517,000
Walnuts	10,090,000

We wish to express our appreciation to the many persons who have contributed to the preparation of this report.

Respectfully,

Armen V. Sarquis
Stanislaus County
Director of Extension

Stanley D. Ray
Stanislaus County
Agricultural Commissioner

L. T. Wallace, Director
California Department of Food and Agriculture
and
The Honorable Board of Supervisors
Stanislaus County

Gentlemen:

The Stanislaus County Agricultural Crop Report for 1975 is hereby submitted. Farm income in 1975 was approximately \$14,000,000 below 1974. This loss was due primarily to lower prices received by farmers. Decreases were noted in field crops, fruit and nut crops, livestock and poultry, and livestock and poultry products. Some increases were seen in vegetable crops, seed crops, nursery products and apiary products.

The County's 1975 gross farm income is estimated to have been \$395,418,990. It is emphasized that this figure represents gross income only. Operational and production costs increased steadily, limiting net income.

The County's ten leading commodities in 1975 were:

Milk, all	\$88,447,000
Chickens, all	45,811,000
Eggs, chicken, all	35,447,000
Cattle and calves, all	30,270,000
Peaches, all	27,972,000
Tomatoes	21,177,000
Almonds	14,763,000
Alfalfa	13,492,000
Apricots	11,802,000
Walnuts	11,610,000

We wish to express our appreciation to the many persons who have contributed to the preparation of this report.

Respectfully,

Armen V. Sarquis
Stanislaus County
Director of Extension

Stanley D. Ray
Stanislaus County
Agricultural Commissioner

Richard E. Rominger, Director
California Department of Food and Agriculture
and
The Honorable Board of Supervisors
Stanislaus County

Gentlemen:

The Stanislaus County Crop Report for 1976 is hereby submitted. Gross farm income is estimated to be \$424,884,660, an increase of 6.9 percent over the 1975 estimate. The gain is attributed primarily to nut crops and to livestock and poultry products.

Many individual farmers suffered significant financial loss, particularly livestock producers and fruit and vegetable growers. Collectively, gross income to these farmers was approximately \$17,000,000 below 1975. The continuing drought, strikes in the freezer and cannery industries, and unseasonal rains late in the summer resulted in some reduced yields, unharvested acreage and, in some cases, poorer quality in field and vegetable crops.

The number of cattle sold rose by 27,100 head because drought conditions forced the early sale of herds. In spite of the volume, however, gross income was down because animals were sold before attaining full weight and the increased number of sales depressed prices.

It must be emphasized that the estimates represent gross farm income only. Net incomes in many cases were drastically affected by the adverse conditions.

The County's ten leading commodities in 1976 were:

Milk, all	\$100,449,000
Chickens, all	54,137,000
Eggs, chicken, all	46,605,000
Cattle & Calves, all	29,210,000
Almonds	27,799,000
Peaches, all	20,415,000
Tomatoes	17,427,000
Walnuts	17,015,000
Grapes, all	14,516,000
Alfalfa	13,049,000

We wish to express our appreciation to the many persons who have contributed to the preparation of this report.

Respectfully,

Armen V. Sarquis
Stanislaus County
Director of Extension

Stanley D. Ray
Stanislaus County
Agricultural Commissioner

Three vertical black bars of varying widths are positioned on the left side of the page. The bars are solid black and extend from near the top to near the bottom of the page. The middle bar is the narrowest, while the two outer bars are wider and appear to have a slightly grainy or textured surface.

Richard E. Rominger, Director
California Department of Food and Agriculture
and
The Honorable Board of Supervisors
Stanislaus County

Gentlemen:

The Stanislaus County Crop Report for 1977 is hereby submitted. The total gross farm income is estimated to have been \$500,042,490, an increase of 18 percent over the 1976 estimate. This gain is principally attributed to fruit and nut crops, particularly almonds, apricots, grapes, peaches and walnuts. Other significant increases were seen in dry beans, poultry, tomatoes and milk production.

Much of the increase reflects the upward trend of nearly all commodity values, plus a return to relatively normal production of some crops following the strikes and unseasonal rains during the harvest periods of 1976. Overall drought conditions were present during both years but, except for cattle and rangeland, this had less of an impact during 1977. Crops appeared to emerge, develop and produce in excellent condition throughout the season. This was partially due to the use of new or deepened wells, which permitted adequate irrigation in most areas despite reduced deliveries of canal water.

The County's ten leading commodities in 1977 are listed below. Figures in parentheses indicate standings in 1976.

1. Milk, all (1)	\$111,887,000
2. Chickens, all (2)	59,178,000
3. Eggs, chicken, all (3)	46,121,000
4. Almonds (5)	41,732,000
5. Cattle and calves (4)	29,061,000
6. Peaches, all (6)	28,557,000
7. Walnuts (8)	28,492,000
8. Tomatoes (7)	20,713,000
9. Grapes, all (9)	19,290,000
10. Beans, dry, all (12)	15,843,000

It must be emphasized that the estimates represent gross farm income only. Net incomes, as always, were affected by the rising costs of production, higher prices on farm supplies and equipment, labor, and other costs.

We wish to express our appreciation to the many persons who contributed to the preparation of this report.

Respectfully,

Armen V. Sarquis
Stanislaus County
Director of Extension

Stanley D. Ray
Stanislaus County
Agricultural Commissioner
