California Department of Food and Agriculture

Agricultural Commissioners' Crop Reports

Ventura County

1971-1977

California County Agricultural Commissioners' Reports from the California Department of Food and Agriculture. This collection consists of annual crop and livestock data from each of the 58 California Counties. The collection covers 1915-1981; digitization of the rest of the collection is forthcoming.

This digitization project was funded by the Giannini Foundation of Agricultural Economics,
<http://giannini.ucop.edu/> .

The work was completed by the staff of the Giannini Foundation Library, University of California, Berkeley, <http://are.berkeley.edu/library/> . **Please contact the Library to consult the originals.**

TO THE STATE DIRECTOR OF AGRICULTURE
and
THE VENTURA COUNTY BOARD OF SUPERVISORS

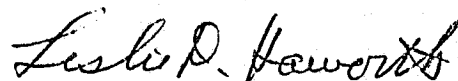

Gentlemen:

In accordance with Section 2279 of the California Agricultural Code, I hereby submit the 1971 Annual Crop and Livestock Report for Ventura County.

Agriculture's contribution of new money into the economy of Ventura County again increased over 1970. The value of agricultural crops is the gross return to the county not net profit to the grower. Production and marketing costs have continued to rise and limit net incomes. Certain commodities have in fact suffered sharp declines in income.

The gross income figure of \$200,195,000 does, however, have an important impact on the County's economy when related processing, marketing, and supporting businesses are considered.

I wish to extend my sincere appreciation to the many growers, individuals and agencies for their valuable contributions and for their willing cooperation. Their cooperative assistance made this report possible. The compilation of this report was under the direction of Deputy Agricultural Commissioner Edward R. Urban.

Leslie D. Haworth
Agricultural Commissioner

Donald H. Anderson

TO THE STATE DIRECTOR OF AGRICULTURE
AND
THE VENTURA COUNTY BOARD OF SUPERVISORS

Gentlemen:

It is a pleasure to comply with Section 2279 of the California Agricultural Code and to submit the 1972 crop report for Ventura County. Agriculture proudly presented \$220,374,400 to the economy of Ventura County, an increase of \$19,973,300 over 1971.

1972 was a good year for practically all crops. Production was above normal and prices received, while not excessively high except in the case of avocados, met or exceeded the cost of production almost all year.

Oranges, a major Ventura County crop didn't enjoy these blessings and was plagued with below average production and prices.

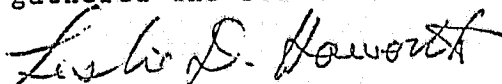

The reduction of \$9,240,400 in livestock production is largely due to the closing of the Feed Lot near Ventura, a temporary cut back in remaining feed lot operations and dry, short pasture conditions in the County. About one-third of this reduction can directly be contributed to the cost of improving the environment for the citizens of Ventura City.

The impact of Exotic Newcastle Disease eradication will not reflect in egg or poultry returns until the 1973 crop report.

Returns reported are F.O.B. prices and do not reflect the costs of production and packing. Income received from processing agricultural products is not included in this report but is another benefit the economy of the County receives from agriculture.

The cooperation and contributions received from the many growers, individuals, and organizations have made this report possible and to them I wish to extend my sincere appreciation.

Recognition goes to the entire department staff who under the direction of Deputy Agricultural Commissioner Edward R. Urban gathered the statistics for this report.

Leslie D. Haworth
Agricultural Commissioner

Department of Agriculture
L. D. Haworth
Agricultural Commissioner

TO THE STATE DIRECTOR OF AGRICULTURE
and
THE VENTURA COUNTY BOARD OF SUPERVISORS

DEPUTIES
Donald H. Anderson
Richard M. Chase
Clyde W. May
Edward R. Urban

Gentlemen:

An increase of \$57,464,700 in value of agricultural crops in Ventura County makes it a pleasure to comply with Section 2279 of the California Food and Agricultural Code. We hereby submit the 1973 Crop Report for Ventura County which shows a total return for agricultural crops of \$277,793,100. This figure allows agriculture to maintain its position as the number one industry of Ventura County.

This figure refers to the F.O.B. prices received by the grower and does not reflect the costs of production and packing.

Except for a noticeable increase in returns for Fruit and Nut Crops, attributable to a large lemon and orange crop, accompanied by good prices, the return for agricultural crops was largely static.

Agriculture's contribution to the economy of Ventura County and to the State of California can be estimated by the formula developed by the California Department of Food and Agriculture; whereby, agricultural income benefits local communities by two and one-half times the returns and statewide benefits are four times the returns. This means \$694,482,750 circulates throughout all phases of labor and business in Ventura County because of our Agricultural Industry. In addition, economics have forced agriculture to abandon many low-return-per-acre crops in favor of crops with higher returns. These newer crops in the area usually require more labor and, therefore, the benefit of employment opportunities.

The cooperation and contributions received from the many growers, individuals, and organizations have made this report possible and to them I wish to extend my sincere appreciation.

Recognition goes to the entire department staff who, under the direction of Deputy Agricultural Commissioner Edward R. Urban, gathered the statistics for this report.

Leslie D. Haworth
Agricultural Commissioner

county of ventura

Department of Agriculture
L. D. Haworth
Agricultural Commissioner

DEPUTIES
Donald H. Anderson
Richard M. Chase
Clyde W. May
Edward R. Urban

TO THE STATE DIRECTOR OF AGRICULTURE

and

THE VENTURA COUNTY BOARD OF SUPERVISORS

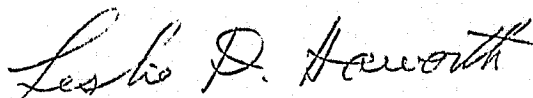

Gentlemen:

In compliance with section 2279 of the California Food and Agricultural Code we submit the Ventura County Agricultural Crop Report.

The \$306,039,100 return shown in no way represents the amount of profit to Ventura County growers. This is the F.O.B. price received by growers and does not reflect the cost of production, harvesting or packing. Production costs have increased due to higher costs of labor, fuel, and fertilizers, to name a few. This amount does reflect the influx of new money into the County's economy due to our agricultural industry. Equally important is that the amount continues to increase to benefit the economic picture while many non-agricultural enterprises have had to cut back on production and employment.

The cooperation and contributions received from the many growers, individuals and organizations have made this report possible and to them we wish to extend our sincere appreciation.

Recognition goes to the entire department staff who, under the direction of Deputy Agricultural Commissioner Edward R. Urban, gathered the statistics for this report.

Leslie D. Haworth
Agricultural Commissioner

Richard M. Chase
Clyde W. May
Edward R. Urban

TO THE STATE DIRECTOR OF AGRICULTURE
and
THE VENTURA COUNTY BOARD OF SUPERVISORS

Gentlemen:

It is a pleasure to announce that Ventura County Agriculture is alive, well, and growing. The increase of \$39,064,400 in agricultural returns over last year equals a total contribution of \$345,777,500 to Ventura County's economy and fiscal well being.

Factors affecting the increase in returns for agricultural products are: the trend to grow higher return, higher cost, and consequently higher risk crops; generally increased production per acre; no disastrous low returns or crop failures for any major crop this year; and an adequate, well-trained corps of agricultural workers.

The crop value quoted in this report is the F.O.B. price received by growers and does not reflect the cost of production, harvesting or packing.

Inflationary costs have affected agriculture and, since returns to the grower for products are established by supply and demand, in most cases all increased costs could not be passed on. However, in general, "it was a good year."

I wish to extend our sincere appreciation to the many growers, individuals, and organizations without whose cooperation this report would not have been possible.

Recognition goes to the entire staff who, under the direction of Deputy Agricultural Commissioner Edward R. Urban, gathered the statistics for this report.

TO THE STATE DIRECTOR OF AGRICULTURE
and
THE VENTURA COUNTY BOARD OF SUPERVISORS

Gentlemen:

In compliance with Section 2279 of the California Food and Agricultural Code, we submit the 1976 Agricultural Crop Report of Ventura County.

The total returns of \$330,214,600 for 1976 represents the F.O.B. returns to the growers. In spite of general inflation this figure is \$15,534,900 below 1975 returns and must cover costs of production, harvest and packing before any profit is realized.

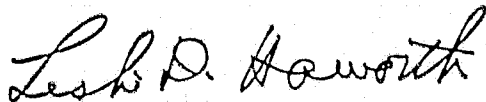

In addition to normal problems, growers started 1976 with a dry winter and many fields had to be irrigated prior to planting. Yields were below normal in many crops. Rains during harvest of dry lima beans and canning tomatoes caused further crop losses.

However, Agriculture continues to be the number one industry in Ventura County. Money earned by Agriculture is new money and is injected into Ventura County's economy for the benefit of all workers as well as all employers.

Agricultural products are renewable resources produced by an optimistic industry -- "next year must be better."

The cooperation and contributions received from the many growers, individuals and organizations have made this report possible and to them we wish to extend our sincere appreciation.

Recognition goes to the entire department staff who, under the direction of Deputy Agricultural Commissioner Edward R. Urban, gathered the statistics for this report.

Leslie D. Haworth
Agricultural Commissioner

TO THE STATE DIRECTOR OF AGRICULTURE

and

THE VENTURA COUNTY BOARD OF SUPERVISORS

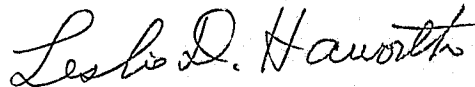

Gentlemen:

Ventura County growers have contributed over one million dollars a day to the economy of Ventura County. Total returns of \$377,837,500 for the 1977 crops actually contributed \$1,035,170 per day. These statistics are gathered and published in compliance with Section 2279 of the California Food and Agricultural Code.

While this figure is impressive it represents only the F.O.B. price paid to the growers and is no indication of profit. F.O.B. prices received by growers are based on "supply and demand" and it is not unusual that some crops may not return costs of production. Inflationary costs also plague growers. This year's F.O.B. returns reflect the high investment demanded of a grower to stay in business rather than a profit. In the final analysis it is the County that benefits.

We wish to extend our sincere appreciation to the many growers and organizations whose contributions have made this report possible.

Recognition goes to the entire staff who gathered the statistics for this report. Direction was given by Deputy Agricultural Commissioner Edward R. Urban, assisted by Senior Biologist Harold R. Hawkins.
